Implications of Multinational Corporations in Cameroon's Underdevelopment, 1960-2015 Kingsly Awang

Ollong,2025-06-05 This book explores the complex role of MNCs in the country s economic development It argues that while MNCs can theoretically contribute to growth through positive spill over effects like R D innovation and human resource development the actual impact in Cameroon remains unclear and under researched The book presents an empirical survey of MNCs in Cameroon focusing on their corporate social responsibility CSR initiatives and their paradoxes Despite the presence of valuable natural resources the study finds that some MNCs such as BAT may contribute more to underdevelopment than development The book concludes that MNCs could play a more positive role if Cameroon implements policies to better regulate their activities thereby ensuring that their presence benefits the country s economic growth This work adds valuable insights to the literature on MNCs in Cameroon Environmental Aspects of the North American Free Trade Agreement

Asia's Free Trade Agreements

Masahiro Kawai,Ganeshan Wignaraja,2011 East Asia is the region of the world that is changing fastest in terms of trade arrangements Dozens of free trade agreements are signed every year turning a complex situation into the East Asian noodle bowl of FTAs This book addresses the crucial question posed by these new agreements how do they affect business While many studies have focused on government to government issues this book gets to the heart of the matter studying what it means for the firms actually doing the trade and investment I recommend this book to any serious student of trade particularly those interested in understanding the rapidly evolving landscape in this most dynamic part of the world Richard Baldwin Professor of International Economics Graduate Institute Geneva Switzerland The pursuit of more than one hundred Free Trade Agreements in East Asia is quietly producing a fundamental change in the global economic architecture This path breaking new volume provides an indispensable guide to the practical effect of such agreements on commercial transactions in the region It is a must read for businessmen and policymakers who seek to both understand the impact of FTAs in the real world and expand their contributions to economic growth and development C Fred Bergsten Director Peterson Institute for International Economics US East Asia needs to think about appropriate measures to overcome the Asian FTA noodle bowl in the future In this vein the study suggests several practical measures including encouraging rationalization and flexibility of rules of origin upgrading origin administration improving business participation in FTA consultations and strengthening institutional support systems for SMEs It is hoped that this study will contribute to strengthening regional trade policies in Asia and compatibilities with global trade rules Haruhiko Kuroda President Asian Development Bank This is a valuable contribution in a crowded field Kawai and Wignaraja have gone beyond familiar arguments about the relative merits of regionalism and multilateralism to ask businesses what it all means to them Policymakers should take note Patrick Low Chief

Economist WTO For policymakers in the region the debate is no longer between regionalism and multilateralism The real question is how we should create the model for regionalism that will become the building blocks to a multilateral trading system and avoid raising costs of doing business from the noodle bowl effect Therefore the comparative and micro level research found in this book provides valuable insights on the impact of FTAs on businesses These insights will be relevant input as policymakers forge ahead in implementing regional FTAs thinking of ways to amend and improve on them and most importantly harmonize or consolidate between existing regional FTAs in East Asia Mari Pangestu Minister of Trade Indonesia The spread of Asia s free trade agreements FTAs has sparked an important debate on the impact of such agreements on business activity This pioneering study uses new evidence from surveys of East Asian exporters including Japan the People s Republic of China the Republic of Korea and three ASEAN economies of the Philippines Singapore and Thailand to shed light on the FTA debate Critics are concerned that FTAs erode the multilateral trading process and foster an alarming noodle bowl of overlapping regulations and rules of origin requirements which may be costly to business Asia s Free Trade Agreements makes key recommendations for improving business use of FTA preferences reducing costs of FTAs and creating a region wide FTA This well researched and documented book will appeal to undergraduate and postgraduate students in international business international economics economic development public administration and public policy Academics researchers and members of think tanks around the world will also benefit from this book as will trad

Global Corporations and National Governments

Edward Graham,1996-06-01 There is inherent tension between the increasingly global focus of foreign investors and the continuing national focus of governments Countries particularly developing ones compete to attract investment from global corporations and they attach performance requirements to tilt the impact of those investments in their favor This is because the host nations expect investment to raise growth levels efficiency and living standards At the same time the home countries of such corporations worry that their firms are not accorded fair and reciprocal treatment abroad These issues have become a source of conflict among nations one that could escalate considerably if an agreement is not soon reached Graham s study analyzes the nature and depth of the international investment problem and its potential impact on the world economy and on economic relations among nations He urges that current rules on foreign direct investment be enlarged and restructured via new international rules and institutional arrangements and offers two alternatives for doing so

International Trade Commission trade brief These findings show that the growth of company revenues in an overseas market does not just have to depend on the sale of manufactured products or agricultural commodities Opportunities also exist for

service providers International Trade in Services Effective Practice and Policy addresses a reality that receives minimal attention in the current debate about international trade how the export and import of services drive a significant portion of international trade The United States has a US 269 billion surplus in trade in services with the world On other hand U S trade in goods with the world continues to experience a wide trade deficit of US 946 billion Nevertheless U S policy response focuses mainly on the manufacturing and agricultural sectors In addition as an international trade educator in business schools at different universities many of the textbooks emphasize the various aspects of importing and exporting goods Workshops aimed to educate and inform the business community also focus on the trade in goods Consequently business students and practitioners miss another important component of international trade that presents opportunities trade in services The book provides a simple yet thorough introduction on how to export a service to an overseas market The book will guide its audience with a step by step process on exporting a service from research to strategy to implementation Furthermore the book will highlight the opportunities presented by the international level General Agreement on Trade in Services GATS and bilateral and regional level reciprocal trade agreements Service providers will be able to use the book as a guide to start the export process successfully with the first step Essentially the book will provide results in the following areas Time saving The step by step process which highlights various programs and the list of key resources will save future exporters of a service the time that they would spend trying to just understand another market Frustration reduction The book s outline of the formal mechanisms available to service exporters will save them from the frustration that may arise from encountering trade practices some of which can also be very costly in different markets that make it difficult to compete against local service providers Money saving Having substantive knowledge of formal mechanisms and key resources that help to reduce the risks associated with exporting to another market such as not receiving payment will help the services based exporter to use its financial resources more efficiently while reducing its risk of nonpayment
