Natural Order:

Contingency and Natural Order in Early Modern Science Pietro Daniel Omodeo, Rodolfo Garau, 2019-09-09 This volume considers contingency as a historical category resulting from the combination of various intellectual elements epistemological philosophical material as well as theological and broadly speaking intellectual With contributions ranging from fields as diverse as the histories of physics astronomy astrology medicine mechanics physiology and natural philosophy it explores the transformation of the notion of contingency across the late medieval Renaissance and the early modern period Underpinned by a necessitated vision of nature seventeenth century mechanism widely identified apparent natural irregularities with the epistemological limits of a certain explanatory framework However this picture was preceded by and in fact emerged from a widespread characterization of contingency as an ontological trait of nature typical of late Scholastic and Renaissance science On these bases this volume shows how epistemological categories which are preconditions of knowledge as historically situated a priori and seemingly self evident are ultimately rooted in time Contingency is intrinsic to scientific practice Whether observing the behaviour of a photon diagnosing a patient or calculating the orbit of a distant planet scientists face the unavoidable challenge of dealing with data that differ from their models and expectations However epistemological categories are not fixed in time Indeed there is something fundamentally different in the way an Aristotelian natural philosopher defined a wonder or a monstrous birth as contingent a modern scientist defines the unexpected result of an experiment and a quantum physicist the behavior of a photon Although to each inquirer these instances appeared self evidently contingent each also employs the concept differently Law and Morality in Ancient China R. P.

Peerenboom, 1993-02-11 Huang Lao thought a unique and sophisticated political philosophy which combines elements of Daoism and Legalism dominated the intellectual life of late Warring States and Early Han China providing the ideological foundation for post Qin reforms In the absence of extant texts however scholars of classical Chinese philosophy remained in the dark about this important school for over 2000 years Finally in 1973 archaeologists unearthed four ancient silk scrolls the Silk Manuscripts of Huang Lao This work is the first detailed book length treatment in English of these lost treasures
