Nature Historical Experience:

On the Natural History of Destruction W.G. Sebald, 2011-06-22 W G Sebald completed this extraordinary important and controversial book before his untimely death in December 2001 It is a harrowing study of the devastation of German cities by Allied bombardment in World War II and an examination of the silence in German literature and culture about this unprecedented trauma On the Natural History of Destruction is an essential and deeply relevant study of war and society suffering and amnesia Like Sebald s novels it is studded with meticulous observation moments of black humour and throughout the author s unmatched intelligence and humanity *Natural History Dioramas* Sue Dale Tunnicliffe, Annette Scheersoi, 2014-12-05 This book brings together in a unique perspective aspects of natural history dioramas their history construction and rationale interpretation and educational importance from a number of different countries from the west coast of the USA across Europe to China It describes the journey of dioramas from their inception through development to visions of their future A complementary journey is that of visitors and their individual sense making and construction of their understanding from their own starting points often interacting with others e g teachers peers parents as well as media e g labels Dioramas have been hitherto a rather neglected area of museum exhibits but a renaissance is beginning for them and their educational importance in contributing to people s understanding of the natural world This volume showcases how dioramas can reach a wide audience and increase access to biological knowledge **Times of History, Times of Nature** Anders Ekström, Staffan Bergwik, 2022-02-11 As climate change becomes an increasingly important part of public discourse the relationship between time in nature and history is changing Nature can no longer be considered a slow and immobile background to human history and the future can no longer be viewed as open and detached from the past Times of History Times of Nature engages with this historical shift in temporal sensibilities through a combination of detailed case studies and synthesizing efforts Focusing on the history of knowledge media theory and environmental humanities this volume explores the rich and nuanced notions of time and temporality that have emerged in response to climate change **Natural History Societies and Civic Culture in Victorian Scotland** Diarmid A. Finnegan, 2016-09-12 The relationship between science and civil society is essential to our understanding of cultural change during the Victorian era Science was frequently packaged as an appropriate form of civic culture inculcating virtues necessary for civic progress In turn civic culture was presented as an appropriate context for enabling and supporting scientific progress Finnegan s study looks at the shifting nature of this process during the nineteenth century using Scotland as the focus for his argument Considerations of class religion and gender are explored illuminating changing social identities as public interest in science was allowed even encouraged beyond the environs of universities and elite metropolitan societies *The British Cyclopædia of Natural History* Charles Frederick Partington, 1835 **The British cyclopædia of natural history** Charles Frederick Partington, 1835 [Kant and the Transformation of Natural History](#) Andrew Cooper, 2023 Andrew Cooper presents the first systematic study of Kant s account

of natural history Cooper contends that Kant made a decisive contribution to one of the most explosive and understudied revolutions in the history of science the addition of time to the frame in which explanations are required sought and justified in natural science Through addressing a wide range of Kant s works Cooper challenges the claim that Kant s theory of science denies a developmental conception of nature and argues instead that it establishes a method by which natural historians can genuinely dispute historical claims and potentially come to consensus This method Cooper argues can be used to expose serious flaws in Kant s own historical reasoning including the formation and defence of his racist views The book will be valuable to philosophers seeking to discern both the power and limitations of Kant s theory of science and to historians of science working on the fractured landscape of eighteenth century Newtonianism Writing Natural History Edward Lueders,1989 The edited record of four public dialogues held at the University of Utah in 1988 between eminent writers in the fields of natural history **The Natural History of Sydney** Daniel Lunney,Pat Hutchings,Dieter Hochuli,2009-09-01 On 3 November 2007 the Royal Zoological Society of NSW held its annual forum with the topic being The natural history of Sydney It has remained as the title of this book The program contained the following introduction as the theme of the forum and it has remained as the theme for this book Sydney has a unique natural history providing a home for iconic animals and plants while remaining a global city It captured the imagination of prominent naturalists and inspired visits and collecting trips to the infant colony of New South Wales in the late 1790s and early to late 1800s From these collections flowed great descriptive works detailing the new and unusual animals and plants of the antipodes Gould Owen Huxley Peron Banks and many others recounted new and evocative flora and fauna Many collecting trips for the great museums and institutions in Europe began in Sydney Sydney still continues to engage naturalists and those grappling with the current drama of climate change and conservation The Royal Zoological Society of New South Wales founded in Sydney in 1879 is a product of the grand 19th century tradition of natural history with a particular emphasis on animal life Sydney is also home to some of Australia s oldest and finest institutions such as the Australian Museum the University of Sydney and the Royal Botanic Gardens Throughout Sydney there are places where the natural habitat has not been supplanted by urban growth and the interest in Sydney s endemic flora and fauna remains strong This forum draws on a magnificent interdisciplinary vision while continuing to employ all the modern tools in the investigation and communication of Sydney s natural history It reflects a resurgence in local history and pursues the natural history of our harbour side city in a modern framework The day of the forum was a captivating display of the diversity of the fauna of Sydney both native and introduced and its varied habitats and of the diverse ways of appreciating natural history including the history of natural history Also on display was the depth of scholarship lying behind each of the presentations The subject clearly has a profound hold on many professional biologists historians and those keen to conserve their local area but if the day is any guide there are vastly more people living in or visiting Sydney who have more than a passing interest in this topic The subject matter ranged from the

history of institutions engaged in natural history through animal groups as diverse as reptiles and cicadas to ideas on how to see Sydney as a natural setting Other papers dealt with the use by Aboriginal people of the native biota in terms of fishing and being displayed in rock paintings before the arrival of the colonists There is little doubt that this theme could run to 10 volumes not just this one but the diversity of ideas skills and organisms displayed in this one book will serve as a guide to what lies beyond these pages A considerable effort was made by each author to present their material as both interesting and accurate The material is built on lifetimes of sustained effort to study record and communicate findings and ideas It is also built on the lifetime work of our predecessors who laboured to find and record the natural history of Sydney We are indebted to their efforts This book records not only the outcome of a successful day of presentations but more importantly the lifelong scholarship of those authors in each of the specialist fields Not only have the authors been absorbed by documenting the biodiversity they have included studies or intelligent speculation on the factors which have impacted on this diversity since Cook sailed along the NSW coast in 1770 The Macquarie Dictionary e g the revised third edition defines natural history as the science or study dealing with all objects in nature and the aggregate of knowledge connected with such knowledge This makes natural history of wide interest to the entire community of Sydney both residents and visitors However we have specialised to the extent that we have focused principally on fauna the RZS being a zoological society Nevertheless plant communities are recognised as part and parcel of the natural history of Sydney as is a sense of the geography of the city with its magnificent harbour sandstone backdrop and spectacular national parks surrounding the city Also of great importance is how others in the past have seen the natural history of what is now called Sydney All these ideas are captured in this book One of the strengths of being a naturalist i e one who is versed in or devoted to natural history especially a zoologist or botanist Macquarie Dictionary is the opportunity to look across the individual disciplines be it a specialist in birds mammals or polychaetes a taxonomist or an ecologist or writer Their advantage is the ability to see the richness of a place such as Sydney Consequently most botanists and zoologists have one or two highly specialised skills but a keen interest in the broader picture and can thus appreciate the importance of for example cave art or fish diversity in the harbour and recognise that the vertebrate fauna of Sydney has changed over the 222 years since European settlement and no doubt the invertebrate fauna has changed although it is less easily assessed Our aim in this book is to draw attention to the natural history of Sydney for scholars as well as those who have the task of looking after a particular area such as within a local government area or a particular taxon such as reptiles or fish and those who have the opportunity to conserve areas taxa or institutions through their employment or legislative responsibilities It is also for teachers and lecturers colleagues in other cities and towns in Australia and those with a keen interest in managing our urban wildlife our cultural heritage or promoting the profound value of our natural heritage within a city landscape It also displays the importance of museum and herbarium collections in documenting the changes since 1770

A Natural History of Oregon's Lake Abert in the Northwest

Great Basin Landscape Ron Larson, 2023-12-12 A beautifully detailed exploration of flora and fauna Author Ron Larson offers a natural history of a Great Basin landscape that focuses on the northern region including Lake Abert and Abert Rim and the adjacent area in southcentral Oregon Although the jewel of this landscape is a lake the real story is the many plants and animals from the very primitive reddish bacteria like archaea that thrive only in its high salinity waters to the Golden Eagles and ravens that soar above the desert The untold species in and around the lake are part of an ecosystem shaped by ageless processes from massive lava flows repeated drought and blinding snowstorms It is an environment rich with biotic and physical interconnections going back millions of years The Great Basin and in particular the Lake Abert region is special and needs our attention to ensure it remains that way We must recognize the importance of water for Great Basin ecosystems and the need to manage it better and we must acknowledge how rich the Great Basin is in natural history Salt lakes wherever they occur are valuable and provide critically important habitat for migratory water birds which are unfortunately under threat from upstream water diversions and climate change Larson s book will help people understand that the Great Basin is unique and that wise stewardship is necessary to keep it unspoiled The book is an essential reference source drawing together a wide range of materials that will appeal to general readers and researchers alike [A Natural History, General and Particular](#) Georges Louis Leclerc comte de Buffon, 1856 *A History of Chinese Science and Technology* Yongxiang Lu, 2014-10-20 A History of Chinese Science and Technology Volumes 1 2 3 presents 44 individual lectures beginning with Ancient Chinese Science and Technology in the Process of Human Civilizations and An Overview of Ancient Chinese Science and Technology and continuing with in depth discussions of several issues in the history of science and the Needham Puzzle interspersed with topics on Astronomy Arithmetic Agriculture and Medicine The Four Great Inventions and various technological areas closely related to clothing food shelter and transportation This book is the most authoritative work on the history of Chinese Science and Technology It is the Winner of the China Book Award the Shanghai Book Award 1st prize and the China Classics International State Administration of Press Publication Radio Film and Television of The People s Republic of China and offers an essential resource for academic researchers and non experts alike It originated with a series of 44 lectures presented to top Chinese leaders which received very positive feedback Written by top Chinese scholars in their respective fields from the Institute for the History of Nature Sciences Chinese Academic Sciences and many other respected Chinese organizations the book is intended for scientists researchers and postgraduate students working in the history of science philosophy of science and technology and related disciplines Yongxiang Lu is a professor former president and member of the Chinese Academy of Sciences [Wild Apples and Other Natural History Essays](#) Henry David Thoreau, 2010-04-15 This volume of seven essays and a late lecture by Henry David Thoreau makes available important material written both before and after Walden First appearing in the 1840s through the 1860s the essays were written during a time of great change in Thoreau s environs as the Massachusetts of his childhood became increasingly

urbanized and industrialized William Rossi's introduction puts the essays in the context of Thoreau's other major works both chronologically and intellectually Rossi also shows how these writings relate to Thoreau's life and career as both writer and naturalist his readings of Ralph Waldo Emerson and Charles Darwin his failed bid for commercial acceptance of his work and his pivotal encounter with the utter wildness of the Maine woods In the essays themselves readers will see how Thoreau melded conventions of natural history writing with elements of two popular literary forms travel writing and landscape writing to explore concerns ranging from America's westward expansion to the figural dimensions of scientific facts and phenomena Thoreau the thinker observer wanderer and inquiring naturalist all emerge in this distinctive composite picture of the economic natural and spiritual communities that left their marks on one of our most important early environmentalists

The art of experimental natural history Dana Jalobeanu, 2015 Francis Bacon introduced his contemporaries to a new way of investigating nature He called it natural and experimental history Despite its rather traditional name Bacon's natural and experimental history was a new discipline it comprised new ideas new practices and new models of collaborative research This new discipline was in many ways a surprisingly successful project It provided early modern naturalists with tools methods and models for both investigating nature and writing about their subject It also offered a set of norms and values for guiding research And yet this new discipline was not a science of nature it was more like an art This book aims to trace the emergence evolution and reception of Francis Bacon's art of experimental natural history *Hobbes and History* G.A. John Rogers, Thomas Sorell, 2013-01-11 Much of Thomas Hobbes's work can be read as historical commentary taking up questions in the philosophy of history and the rhetorical possibilities of written history This collection of scholarly essays explores the relation of Hobbes's work to history as a branch of learning *Bulletin of the American Museum of Natural History* Joel Asaph Allen, 1929 Comprises articles on geology paleontology mammalogy ornithology entomology and anthropology

Pictorial Natural History ... From the German Friedrich Wilhelm LINDNER (and LACHMANN (F. H. A.)), 1845

The Journal of the Bombay Natural History Society, 1912 *Essays on Natural History, Chiefly Ornithology* Charl Waterton, 1844 **History, Experience and Cultural Studies** Michael Pickering, 1997-10-06 This elegantly written and illuminating book explores the attenuated relationship between history and cultural studies reappraising some of the issues and positions which have led to the impasse between them and highlighting the contribution to be made by a new engagement between cultural and historical theory Focusing on the contested concept of experience as a central part of his argument Pickering advances new ways of attending to the myriad voices of everyday cultures past and present
