Qualitative Research in Clinical Psychology and Psychotherapy in Latin America Alemka Tomicic, Javiera Duarte Soto, 2025-08-11 This book presents a comprehensive overview of a distinctive tradition of qualitative research in clinical psychology and psychotherapy developed in Latin America Originating mainly from Chile Argentina and Peru this tradition has developed innovative qualitative methods to study indicators of change in psychotherapy mechanisms of change in the psychotherapeutic process and complex phenomena in clinical psychology and psychotherapy These three lines of research are richly illustrated by the chapters brought together in this volume that showcase the work of psychotherapist researchers who developed a research approach that mirrors the qualitative nature of the psychotherapeutic work Qualitative research in psychotherapy has shown significant developments in the context of the Global South Much of this in contrast to the strong quantitative tradition based on Randomized Clinical Trials RCTs developed in North America and Europe is due to the fact that psychotherapy research societies in Latin America were organized by psychotherapists This has created the identity of the psychotherapist

researcher a dual identity that entails the notion that psychotherapy research requires a qualitative dimension to make research a part of clinical practice and clinician identity regardless of their theoretical technical orientations This contributed volume aims to provide the reader an overview of the main qualitative methods developed by these psychotherapist researchers Qualitative Research in Clinical Psychology and Psychotherapy in Latin America Creativity for Studying Complex Objects in Context will be of interest to both researchers and practitioners in the fields of clinical psychology and psychotherapy interested in methodologies that can contribute to the organic incorporation of research into clinical practice and to the study of complex objects in context Some chapters in this book were originally written in Spanish and translated into English with the help of artificial intelligence A subsequent human revision was done primarily in terms of content

Gherardi ,2024-12-13 Sabido es que la manera de pensar el diagnóstico repercute en la labor psicoterapéutica favoreciendo o restringiendo la meta primordial de todo psicólogo mejorar la calidad de vida de sus pacientes Freud luego Abraham dieron comienzo a una nosografía psicoanalítica que relacionaba cuadros psicopatológicos con las etapas del desarrollo psicosexual El esfuerzo se dirige a ubicar una determinada subjetividad dentro de algunas de las estructuras conocidas neurosis y psicosis lo que fue dando lugar cuando las mismas no se adecuaban por completo a las características planteadas por algún caso particular a la emergencia de diagnósticos caracterizados por la falta de claridad o la ambigüedad Tal es el caso de la categoría de Borderline como también la de prepsicosis que de este modo emergen más como una manera de zanjear las

dificultades planteadas por el paradigma estructuralista clásico que como un intento genuino de comprender al sujeto que padece. A diferencia de ello autores tales como Bion, Bleger, Liberman y de manera más específica Maldavsky propusieron una nosografía que permitiera abordar la subjetividad contemplando su naturaleza compleja. En este libro eminentemente práctico la autora toma en particular la propuesta diagnóstica del Dr. David Maldavsky quien a su vez fuera discípulo de Liberman y cuyo instrumento para el análisis del discurso ADL Algoritmo David Liberman llamado así en homenaje a su maestro permite llegar a un diagnóstico por corrientes psíquicas las cuales pueden coexistir dentro de la personalidad bajo el predominio de alguna de ellas que se erige como la rectora. Del mismo modo a través de la presente publicación la autora presenta un instrumento de su autoría de aplicación al Rorschach al que bautizó ADMR Análisis Diagnóstico Multidimensional Rorschach que toma los aportes de la Lic. Alicia Passalacqua pero reorganizados a la luz del sistema categorial propuesto por el Dr. David Maldavsky. El ADMR constituye una manera de pensar la subjetividad que no busca cerrar. En un todo coherente con el fenómeno que procura abarcar, el fenómeno psíquico representa un enfoque diagnóstico polivalente que toma en cuenta los diversos matices en que puede manifestarse la subjetividad.

Carla Gherardi es Perito Psicóloga de oficio en el Poder Judicial de la Nación.
