Nukespeak The Selling Of Nuclear Technology In America

Joseph Masco

Nukespeak The Selling Of Nuclear Technology In America:

Being Nuclear Gabrielle Hecht, 2014-08-29 The hidden history of African uranium and what it means for a state an object an industry a workplace to be nuclear Uranium from Africa has long been a major source of fuel for nuclear power and atomic weapons including the bomb dropped on Hiroshima In 2003 after the infamous yellow cake from Niger Africa suddenly became notorious as a source of uranium a component of nuclear weapons But did that admit Niger or any of Africa's other uranium producing countries to the select society of nuclear states Does uranium itself count as a nuclear thing In this book Gabrielle Hecht lucidly probes the question of what it means for something a state an object an industry a workplace to be nuclear Hecht shows that questions about being nuclear a state that she calls nuclearity lie at the heart of today's global nuclear order and the relationships between developing nations often former colonies and nuclear powers often former colonizers Hecht enters African nuclear worlds focusing on miners and the occupational hazard of radiation exposure Could a mine be a nuclear workplace if as in some South African mines its radiation levels went undetected and unmeasured With this book Hecht is the first to put Africa in the nuclear world and the nuclear world in Africa By doing so she remakes our understanding of the nuclear age

The Nuclear Borderlands Joseph Masco, 2020-03-24 An important investigation of the sociocultural fallout of America's work on the atomic bomb In *The Nuclear Borderlands* Joseph Masco offers an in depth look at the long term consequences of the Manhattan Project Masco examines how diverse groups in and around Los Alamos New Mexico understood and responded to the U S nuclear weapons project in the post Cold War period He shows that the American focus on potential nuclear apocalypse during the Cold War obscured the broader effects of the nuclear complex on society and that the atomic bomb produced a new cognitive orientation toward daily life reconfiguring concepts of time nature race and citizenship This updated edition includes a brand new preface by the author discussing current developments in nuclear politics and the scientific impact of the nuclear age on the present epoch of a human altered climate

Uranium Chetan Bisariya, 1982 **Civil Defense Begins at Home** Laura McEnaney, 2020-10-06 Dad built a bomb shelter in the backyard Mom stocked the survival kit in the basement and the kids practiced ducking under their desks at school This was family life in the new era of the A bomb This was civil defense In this provocative work of social and political history Laura McEnaney takes us into the secretive world of defense planners and the homes of ordinary citizens to explore how postwar civil defense turned the front lawn into the front line The reliance on atomic weaponry as a centerpiece of U S foreign policy cast a mushroom cloud over everyday life American citizens now had to imagine a new kind of war one in which they were both combatants and targets It was the Federal Civil Defense Administration's job to encourage citizens to adapt to their nuclear present and future As McEnaney demonstrates the creation of a civil defense program produced new dilemmas about the degree to which civilian society should be militarized to defend itself against internal and external threats Conflicts arose about the relative responsibilities of state and citizen to fund and implement a home front security

program The defense establishment's resolution was to popularize and privatize military preparedness The doctrine of self help defense demanded that citizens become autonomous rather than rely on the federal government for protection Families would reconstitute themselves as paramilitary units that could quash subversion from within and absorb attack from without Because it solicited an unprecedented degree of popular involvement the FCDA offers a unique opportunity to explore how average citizens community leaders and elected officials both participated in and resisted the creation of the national security state Drawing on a wide variety of archival sources McEnaney uncovers the broad range of responses to this militarization of daily life and reveals how government planners and ordinary people negotiated their way at the dawn of the atomic age Her work sheds new light on the important postwar debate about what total military preparedness would actually mean for American society

The Environmental Pendulum R. Allan Freeze, 2023-04-28 The pendulum of environmental policy swings from one extreme to the other depending on which camp is in power and who has the ear of the media Underkill is followed by overkill Concern breeds action disillusion breeds reaction The Environmental Pendulum provides a thoughtful and evenhanded assessment of this conflict Tens of thousands of sites across the country are contaminated with toxic chemicals Environmentalists warn us that this legacy of carelessness is seriously affecting both human health and the ecological balance of nature They point out that even improved industrial practices will not eliminate future chemical releases to the environment Their demand for regulatory control has received wide public support and led to the passage of the Superfund legislation in 1980 Now after twenty years the value of the Superfund program is being challenged by corporate America which argues that excessive cleanup costs have the potential to bankrupt the nation R Allan Freeze outlines the difficulties associated with the management of hazardous waste and offers a balanced account of the controversy over the role of environmental contamination in human health Freeze clarifies what matters and what doesn't with respect to chemical contaminants in the environment arguing that environmental policies should be based on an accurate appraisal of the risks associated with these toxins He concludes the book with a brilliant summation of the good news and the bad news of environmental pollution describing what can and can't be done to bring the situation under control This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 2000 The pendulum of environmental policy swings from one extreme to the other depending on which camp is in power and who has the ear of the media Underkill is followed by overkill Concern breeds action disillusion breeds reaction The Environmental Pe

The Nightmare Considered Nancy Anisfield, 1991 These essays assess the nature of nuclear war literature from a variety of perspectives Scholars activists novelists poets and teachers challenge nuclear ideologies and traditional readings of apocalyptic texts Included Holocaust literature of the 1950s Michael Dorris and Louise Erdrich poetry

and nuclear war Riddley Walker Fiskadoro haiku and Hiroshima Kopit's End of the World O'Brien's The Nuclear Age and Vonnegut's cataclysmic novels

Bombs in the Backyard A. Constandina Titus, 2016-04-15 On January 27 1951 the first atomic weapon was detonated over a section of desert known as Frenchman Flat in southern Nevada providing dramatic evidence of the Nevada Test Site's beginnings Fifty years later author A. Constandina Titus reviews contemporary nuclear policy issues concerning the continued viability of that site for weapons testing Titus has updated her now classic study of atomic testing with fifteen years of political and cultural history from the mid 1980s Reagan Gorbachev nuclear standoff to the authorization of the Nevada Test Site Research Center a Desert Research Institute facility scheduled to open in 2001 In this second edition of Bombs in the Backyard Titus deftly covers the post Cold War transformation of American atomic policy as well as our overarching cultural interest in all matters atomic making this a must read for anyone interested in atomic policy and politics

Learning to Glow John Bradley, 2000 Provides personal accounts of people who were raised during the Cold War and of those who were directly in contact with nuclear weapons during World War II the Korean War and the Persian Gulf War focusing on the health and environmental hazards of nuclear weapons

Selling Air Power Steve Call, 2009-03-01 In Selling Air Power Steve Call provides the first comprehensive study of the efforts of post war air power advocates to harness popular culture in support of their agenda In the 1940s and much of the 1950s hardly a month went by without at least one blatantly pro air power article appearing in general interest magazines Public fascination with flight helped create and sustain exaggerated expectations for air power in the minds of both its official proponents and the American public Articles in the Saturday Evening Post Reader's Digest and Life trumpeted the secure future assured by American air superiority Military figures like Henry H. Hap Arnold and Curtis E. LeMay radio television personalities such as Arthur Godfrey cartoon figures like Steve Canyon and actors like Jimmy Stewart played key roles in the unfolding campaign Movies like Twelve O'Clock High The Court Martial of Billy Mitchell and A Gathering of Eagles projected onto the public imagination vivid images confirming what was coming to be the accepted wisdom that America's safety against the Soviet threat could best be guaranteed by air power coupled with nuclear capability But as the Cold War continued and the specter of the mushroom cloud grew more prominent in American minds another more sinister interpretation began to take hold Call chronicles the shift away from the heroic patriotic posture of the years just after World War II toward the threatening even bizarre imagery of books and movies like Catch 22 On the Beach and Dr. Strangelove Call's careful analysis goes beyond the public relations campaigns to probe the intellectual climate that shaped them and gave them power Selling Air Power adds a critical layer of understanding to studies in military and aviation history as well as American popular culture

Multiple Exposures Catherine Caufield, 1990-04-16 Catherine Caufield has written an important book on an important topic the history behind the safety standards limiting the effects of high energy radiation on human beings Provides an immense amount of information in a very readable form W. Alan Runciman Prometheus From fallout and radon to radioactive smoke detectors

and dental X rays Caufield traces the proliferation of the uses of radiation in medicine industry and the military and in generating energy An intelligent non alarmist history Publishers Weekly

This is likewise one of the factors by obtaining the soft documents of this **Nukespeak The Selling Of Nuclear Technology In America** by online. You might not require more period to spend to go to the book inauguration as well as search for them. In some cases, you likewise reach not discover the pronouncement Nukespeak The Selling Of Nuclear Technology In America that you are looking for. It will agreed squander the time.

However below, subsequently you visit this web page, it will be fittingly unconditionally simple to acquire as skillfully as download guide Nukespeak The Selling Of Nuclear Technology In America

It will not receive many epoch as we explain before. You can get it while put-on something else at home and even in your workplace. consequently easy! So, are you question? Just exercise just what we give below as well as evaluation **Nukespeak The Selling Of Nuclear Technology In America** what you past to read!
