Paradoxes in Nurses' Identity, Culture and Image Margaret McAllister, Donna Brien, 2020-01-29 This book examines some of the more disturbing representations of nurses in popular culture to understand nursing s complex identities challenges and future directions It critically analyses disquieting representations of nurses who don t care who kill who inspire fear or who do not comply with laws and policies Also addressed are stories about how power is used as well as supernatural experiences in nursing Using a series of examples taken from popular culture ranging from film television and novels to memoirs and true crime podcasts it interrogates the meaning of the shadow side of nursing and the underlying paradoxes that influence professional identity Iconic nursing figures are still powerful today Decades after they were first created Ratched and Annie Wilkes continue to make readers and viewers shudder at the prospect of ever being ill Modern storytelling modes are bringing to audiences the grim reality that some nurses are members of the working poor like Cath Hardacre in *Trust Me* and others can be dangerous con artists like the nurse in *Dirty John* This book is important reading for

all those interested in understanding the links between nursing's image and the profession's potential as an agent for change

Professional Identity in the Caring Professions Roger Ellis, Elaine Hogard, 2020-12-29 Professional identity is a central topic in all courses of professional training and educators must decide what kind of identity they hope their students will develop as well as think about how they can recruit for, facilitate and assess this development. This unique book explores professional identity in a group of caring professions looking at definition, assessment and teaching and learning. Professional Identity in the Caring Professions includes overviews of professional identity in nursing, medicine, social work, teaching and lecturing along with a further chapter on identity in emergent professions in healthcare. Additional chapters look at innovative approaches to selection, competency development, professional values, leadership potential and reflection as a key element in professional and interprofessional identity. The book ends with guidance for curriculum development in professional education and training and the assessment of professional identity. This international collection is essential reading for those who plan, deliver and evaluate programs of professional training as well as scholars and advanced students researching identity in the caring professions including medicine, nursing, allied health, social work and teaching. **Current**

Issues in Nursing and Midwifery I Melike YAVAŞ ÇELİK, 2025-07-11 **The Nurse in Popular Media** Marcus K. Harmes, Barbara Harmes, Meredith A. Harmes, 2021-10-28 The image of the nurse is ubiquitous both in life and in popular media. One of the earliest instances of nursing and media intersecting is the Edison phonographic recording of Florence Nightingale's voice in 1890. Since then a parade of nurses, good, bad or otherwise, has appeared on both cinema and television screens. How do we interpret the many different types of nurses, real and fictional, lifelike and distorted, sexual and forbidding, who are so visible in the public consciousness? This book is a comprehensive collection of unique insights from scholars across the Western world. Essays explore a diversity of nursing types that traverse popular characterizations of nurses from various time periods. The shifting roles of nurses are explored across media including picture postcards, film, television, journalism and the collection and preservation of uniforms and memorabilia. **Patient and Medical Staff Safety and Healthy Work**

Environment in the 21st Century Adriano Friganovic, Sabina Krupa-Nurcek, Justyna Kosydar-Bochenek, Biljana Filipovic, Sandra Bošković, Irena Kovačević, 2025-11-05 Patient safety is a top priority for the global healthcare system and a prerequisite for high quality medical and nursing care. Ensuring the safety of patients and medical staff is very difficult all over the world regardless of the healthcare system model that is in place. The number of adverse events that occur during the provision of medical services and the associated costs are enormous. World Health Organization reports that each year in low and middle income countries there are approximately 134 million adverse events that result in failure to ensure safety in healthcare entities. The provision of medical services depends on the involvement of many stakeholders of various medical profession methods of financing, infrastructure, applied medical technologies and a level of safety culture in the implementation of numerous processes including nursing diagnostic and therapeutic interventions. It is crucial to assure

continuing safety training and optimizing the training modules and evaluation methods which will maximize the effectiveness of safety training Medical personnel shortages an ageing workforce the decreasing number of new graduates and the increasing migration of young people are important factors associated with the hospital safety climate in Central European countries Shortage of medical personal with huge influence on nursing profession can lead to missed nursing care affects patient safety and education of nursing students Incorporating practical training modules into curricula establishing preceptorship programs and incorporating ethics education into clinical practice are crucial to address missed nursing care Health policies should focus on protecting the worker so in addition to improving working conditions it would be interesting to promote coping skills to improve the quality of care and patient safety Managers should focus on how to empower medical personnel to foster a no blame culture and effective reporting In whole process of patient safety assurance patient must be included due to the fact that patients provide a unique irreplaceable and essential perspective in evaluating patient safety Without safe environment for medical personal we can not assure adequate safety for patients At the first place should be safety of health care workers Sub topics of possible interest include but are not limited to New management and leadership roles in healthcare system The culture of safety teamwork standardization of care AI and other technologies to support medical personnel New teaching techniques to assure healthy work environment Missed nursing care and assuring patient safety Healthy work environment in 21st century Health care workers safety for overall patient safety

Media and Health Clive Seale, 2003-01-17 This book appears to fill a substantial gap in the literature at present There are quite simply no books available which engage seriously and competently with the presentation of health issues in the media and certainly none which focuses on representations of health and illness in as thematically coherent a manner as Seale proposes to do Richard Gwyn University of Cardiff This is an excellent resource for students It provides a comprehensive review of secondary literature in the field and is very well researched Students of sociology of health and illness and in media and communication studies will find the book invaluable David Oswell Goldsmiths College University of London This is a comprehensive work on media health providing an invaluable toolkit for understanding health and the media in contemporary society Seale goes further than previous textbooks critiquing the lament of media health promoters in order to explore the moralisation and commercialisation of media health Dr Annette Hill University of Westminster How are health matters presented by the mass media How accurate are the messages we are receiving This book demonstrates how health messages in popular mass media are important influences in our lives and that they are not neutral being subject to many determining influences It demonstrates the importance of mass media for understanding the experience of illness health and health care bringing together the latest thinking in the field of media studies and the sociology of health and illness This book provides a thorough review of research literature on media representations of health illness and health care covering their production characteristic forms and relationships with the everyday lives of media audiences It brings together both well

known and lesser known studies in the context of an integrated sociological argument about media and health Media producers are subject to a variety of influences from medical lobbies scientific organizations and not least the commercial pressure to satisfy media saturated audiences These mean that aims of health promoters are not always easily achieved leading to considerable tensions that require a deeper understanding of media health than has hitherto been applied to them This book will be essential reading for health educators and promoters as well as health care providers interested in the cultural aspects of health sociologists of health and illness and students and academics of media studies

Beyond Reflective Practice Helen Bradbury, Nick Frost, Sue Kilminster, Miriam Zukas, 2012-09-11 Reflective practice has moved from the margins to the mainstream of professional education However in this process its radical potential has been subsumed by individualistic rather than situated understandings of practice Presenting critical perspectives that challenge the current paradigm this book aims to move beyond reflective practice It proposes new conceptualisations and offers fresh approaches relevant across professions Contributors include both academics and practitioners concerned with the training and development of professionals Definitions of reflection which are often implicit often focus on the individual's internal thought processes and responsibility for their actions The individual what they did thought felt is emphasised with little recognition of context power dynamics or ideological challenge This book presents the work of practitioners educators academics and researchers who see this as problematic and are moving towards a more critical approach to reflective practice With an overview from the editors and fourteen chapters considering new conceptualisations professional perspectives and new practices Beyond Reflective Practice examines what new forms of professional reflective practice are emerging It examines in particular the relationships between reflective practitioners and those upon whom they practise It looks at the ways in which the world of professional work has changed and the ways in which professional practice needs to change to meet the needs of this new world It will be relevant for those concerned with initial and ongoing professional learning both in work and in educational contexts

Reflective Practice Janet Hargreaves, Louise Page, 2013-12-19 Reflective practice is an essential skill for those working in health and social care but why is it so vital and how can it be learned As inter disciplinary working becomes more common finding shared ways of reflection on practice are becoming more and more important How do we share our ideas and thoughts to enrich both professionals and their client base This book uses stories and exercises to enable readers to develop their skills Its emphasis is on the practical from how to construct a reflective essay to the ethical ambiguities of whistleblowing and constructing a professional persona The book is written with the needs of students of health and social care in mind For those who want to develop their skills beyond the scope of the book each chapter ends by with a step up suggestion enabling them to build on what they have already learned
