

Social & Behavior Change in Nutrition: What Works?

Nutrition programs are meaningful only to the degree that they help people do something differently. That is where social and behavior change (SBC) methods can help. In our experience, we have seen program planners miss opportunities to achieve much bigger and more lasting impact of their SBC work. The nine tips we offer here show you what you can do at each stage of a program cycle to avoid missing such great opportunities and to contribute to real, positive changes in people's lives.

PROJECT DESIGN

1. Plan an ongoing, iterative workflow of the ever-evolving and flexible evidence, study, or program cycle. This approach allows for continuous learning and adaptation, and the program can evolve as the evidence base grows. It is important to build in time for reflection and adaptation in response to new evidence and needs.

2. Develop a strong evidence base. Evidence is the foundation for change, and there is no one-size-fits-all approach. It is important to understand the context of the problem and the population, and to use a mix of qualitative and quantitative methods to build a strong evidence base. The evidence base should be a mix of qualitative and quantitative methods, and it should be updated as the evidence base grows.

3. Address the key challenges. Address the key challenges that are the most significant barriers to change. In our experience, the key challenges are often related to the evidence base, the program design, and the implementation. Addressing these challenges is essential for the program to be successful.

EVALUATION

9. Understand what a program that will work. We only understand what a program that will work by understanding what a program that will work. This is a continuous process, and it is important to understand what a program that will work. This is a continuous process, and it is important to understand what a program that will work.

Abstract
This paper presents a framework for the design and implementation of social and behavior change (SBC) programs. The framework is based on the following principles: (1) Plan an ongoing, iterative workflow of the ever-evolving and flexible evidence, study, or program cycle. (2) Develop a strong evidence base. (3) Address the key challenges. (4) Implement and monitor the program. (5) Evaluate the program. (6) Adapt the program. (7) Scale the program. (8) Sustain the program. (9) Understand what a program that will work. The framework is designed to help program planners to design and implement SBC programs that are effective and sustainable. The framework is based on the following principles: (1) Plan an ongoing, iterative workflow of the ever-evolving and flexible evidence, study, or program cycle. (2) Develop a strong evidence base. (3) Address the key challenges. (4) Implement and monitor the program. (5) Evaluate the program. (6) Adapt the program. (7) Scale the program. (8) Sustain the program.
