CONTRACT LAW A COMMONWEALTH CARIBBEAN CASE BOOK Timothy A. Affonso,2013-11-19 *Contract Law A Commonwealth Caribbean Case Book* focusses on contract law as articulated by the jurists of the Commonwealth Caribbean region Case law from across the region has been combed to source the cases identified in this text The jurisdictions from which the cases have emanated span the full breadth of the Commonwealth Caribbean region The quality of the judgments referenced and the clarity of expression of the legal principles by our regional jurists should greatly assist the young law student in his journey through this interesting area of law The Caribbean jurisprudence in the area of contract law operates within statutory and common law boundaries The absence of statutory intervention in some situations and the presence of legislation in others makes this area of law unique in its operation While it is important for students to be able to conduct research there is a need for Commonwealth Caribbean resource material This book seeks to achieve this objective The wide body of contractual principles have been categorised into identifiable elements of contract law so as to guide a student

through this vast area of law I hope to underscore the essential nature of contract law to not only the law student's arsenal of legal expertise but also to his eventual practice of law. It is hoped that this book can assist in developing a genuine interest and understanding of contract law. **Personnel Literature** United States. Office of Personnel Management. Library, 1987

The End of Negotiable Instruments James Steven Rogers, 2011-12-23 In *The End of Negotiable Instruments Bringing Payment Systems Law Out of the Past* author James Rogers challenges the basic assumptions of the law of checks and notes and its history and provides a well reasoned account of how the law could be changed to better suit the evolution of new payment technologies. The modern American law of payment systems is in disarray. Efforts to create a unified body of law for payment systems have so far been unsuccessful. Part of the reason for that failure is the assumption that the existing law works well for the traditional paper based check system and that problems have been created only by the evolution of new technologies. *The End of Negotiable Instruments* argues that this assumption is unfounded. The basic law of checks is itself anachronistic. There are no other books that undertake a similar analysis; there are legal treatises on the law of checks and notes but all of them take for granted the basic assumptions challenged in this book. Several articles were published in the late twentieth century concerning the dispute over the application of certain doctrines of traditional negotiable instruments law to modern consumer finance transactions but none of this literature went on to consider the broader question of whether there is anything worthwhile left in negotiable instruments law. *Bowker's Law Books and Serials in Print*, 1998 **Cases, Problems, and Materials on Payment Systems** Peter A. Alces, Marion W. Benfield, 1993 Strategic Change Management in the Public Sector Francesco Longo, Daniela Cristofoli, 2008-04-30 The ability to manage change management processes depends on individual skills and organisational culture. These skills have to be increased and practiced. In this perspective the reading and analysis of this casebook can generate mental training about innovation. In order to look for common problems and solutions for implementing managerial development a rich portfolio of European cases with at least one representative for every European component is presented. Typically comparative works select different countries according to criteria such as English speaking countries from the same region or industrialised countries. This book looks at comparative differences but also has sufficient cultural, social, political and economic homogeneity. Comparisons are more useful and easier to understand due to common implementation difficulties and possible change strategies. A general introduction leads on to some theoretical background which presents the Editors thinking about strategy change management and the strategic approach to change management representing the framework at the core of the book. A guide through the European examples introduces the cases themselves. Teaching notes on how to position the case learning objectives, question discussion, case analysis and further reference are provided in order to show teachers and trainers how to use each individual case. This book is a tool for discussion and a framework to structure a debate about the evaluation of managerial evolution providing trainers, students and practitioners with an instrument to understand how to face the

difficulties each change management process is affected by
