Gura,2004-06-11 The Crossroads of American History and Literature collects two decades worth of the best known essays of Philip F Gura Beginning with a definitive overview of studies of colonial literature Gura ranges through such subjects in colonial American history as the intellectual life of the Connecticut River Valley Cotton Mather's understanding of political leadership and the religious upheavals of the Great Awakening In the

nineteenth century he visits such varied topics as the history of print culture in rural communities the philological interests of the Transcendentalist Elizabeth Peabody the craft and business of the early American music trades and Thoreau's interest in exploration literature and in the Native American. Displaying remarkable sophistication in a variety of fields that taken together constitute the heart of American Studies this collection illustrates the complexity of American cultural history.

Romantic Education in Nineteenth-Century American Literature Monika Elbert, Lesley Ginsberg, 2014-12-05 American publishing in the long nineteenth century was flooded with readers primers teaching training manuals children's literature and popular periodicals aimed at families. These publications attest to an abiding faith in the power of pedagogy that has its roots in transatlantic Romantic conceptions of pedagogy and literacy. The essays in this collection examine the on going influence of Romanticism in the long nineteenth century on American thinking about education as depicted in literary texts in historical accounts of classroom dynamics or in pedagogical treatises. They also point out that though this influence was generally progressive the benefits of this social change did not reach many parts of American society. This book is therefore an important reference for scholars of Romantic studies American studies historical pedagogy and education. Transcendental Utopias Richard Francis, 2018-10-18 New England Transcendentalism was a vibrant and many sided movement whose members are probably best remembered for their utopian experiments their attempts to reconcile the contingent world of history with what they perceived as the stable and patterned world of nature. Richard Francis has written the first book to explore in detail the ideological basis of the three famous experiments during the 1840s Brook Farm Fruitlands and Henry David Thoreau's community of one on the shores of Walden Pond. Francis suggests that at the heart of Transcendentalism was a belief that all phenomena are connected in a repetitive sequence. The task was to explain how human society could be reordered to benefit from this seriality. Some members of the movement believed in evolutionary progress whereas others hoped to be the agents of a sudden millennial transformation. They differed as well in their views as to whether the fundamental social unit was the individual the family the phalanstery or the community. The story of the three communities was inevitably also the story of particular individuals and Francis highlights

the lives and ideas of such leaders as George Ripley W H Channing Bronson Alcott Charles Lane and Theodore Parker The consistent underlying beliefs of the New England Transcendentalists have exerted a powerful influence on American intellectual and cultural history ever since *Authority and Reform* Mark G. Vásquez,2003 As a reformatory force the literary text encouraged activism among all its readers but affected and was affected by women more profoundly than and differently from men **Backwoods Utopias** Arthur Bestor,2018-07-09 The new society that the world awaited might yet be born in the humble guise of a backwoods village This was the belief shared by the many groups which moved into the American frontier to create experimental communities communities which they hoped would be models for revolutionary changes in religion politics economics and education in American society For as James Madison wrote the American Republic was useful in proving things before held impossible The communitarian ideal had its roots in the radical Protestant sects of the Reformation Arthur Bestor shows the connection between the holy commonwealths of the colonial period and the nonsectarian experiments of the nineteenth century He examines in particular detail Robert Owen s ideals and problems in creating New Harmony Two essays have been added to this volume for the second edition In these Patent Office Models of the Good Society and The Transit of Communitarian Socialism to America Bestor discusses the effects of the frontier and of the migration of European ideas and people on these communities He holds that the communitarians could believe in the possibility of nonviolent revolution through imitation of a small perfect society only as long as they saw American institutions as flexible By the end of the nineteenth century as American society became less plastic belief in the power of successful models weakened The Letters of William Lloyd Garrison, Volume II: a House Dividing Against Itself William Lloyd Garrison,1971 This volume covers the five year period in which Garrison s three sons were born and he entered the arena of social reform with full force **Historic Furnishings Plan, the Wayside, Minute Man National Historical Park, Concord, Massachusetts** Doris Devine Fanelli,1983
