Pioneer Settlement In Northeast Argentina:

Pioneer Settlement in Northeast Argentina Robert C. Eidt, Pioneer Settlement in Northeast Argentina Robert C. Eidt, 1971 The physical surroundings Colonial land opening in misiones the beginning of european settlement Corrientes province and the development of latifundismo in misiones Public lands and government colonization Foreign colonization companies in misiones A summing Up settlement and population growth in misiones **Pioneer Settlement in South Brazil: The Case of Toledo, Paraná** K.D. Muller, 2012-12-06 In the period since the end of world War II numerous developing countries have employed colonization or planned pioneer settlement as one method of building a more reliable and balanced economy It is felt that the traditional single sided systems of farm ownership and production with their latifundium and minifundium holdings will gradually and peacefully become less prominent as better settlement systems are introduced and extended Marked increases in population pressure large tracts of unused or underused land and modern improvements in settlement planning are among other compelling reasons for starting colonization programs Of all the areas in the world the continent of South America probably has the widest variety of planned pioneer settlements as well as the most sizeable programs Brazil the largest country on the continent is actively engaged in populating the vast empty spaces of its interior and provides excellent opportunities for the scholarly investigation of new frontier settlement types In addition to the academic discussion of the origin and development of these expressions of man's expansion into marginal areas the critical examination of relatively new attempts at land settlement is a useful thing because what is to be learned from such studies may be directly applicable to other pioneer zones and moreover may be of vital significance to overall economic improvement on the continent In this monograph my student K Muller analyzes the South Brazilian frontier colony of Toledo Parana founded in 1946 *Borderlines and Borderlands* Alexander C. Diener, 2010-01-16 From our earliest schooldays we are shown the world as a colorful collage of countries each defined by their own immutable borders What we often don't realize is that every political boundary was created by people No political border is more natural or real than another yet some international borders make no apparent sense at all While focusing on some of these unusual border shapes this fascinating book highlights the important truth that all borders even those that appear normal are social constructions In an era where the continued relevance of the nation state is being questioned and where transnationalism is altering the degree to which borders effectively demarcate spaces of belonging the contributors argue that this point is vital to our understanding of the world The unique and compelling histories of some of the world's oddest borders provide an ideal context for this group of experts to offer accessible and enlightening discussions of cultural globalization economic integration international migration imperialism postcolonialism global terrorism nationalism and supranationalism Each author's regional expertise enriches a textured account of the historical context in which these borders came into existence as well as their historical and ongoing influence on the people and states they bound To view more maps from the David Rumsey Map Collection visit [www](http://www.davidrumsey.com)

Fernando, 2024-03-08 In this collection of essays *Theorizing Built Form and Culture* The Legacy of Amos Rapoport a felicitation volume to celebrate the significance of Professor Amos Rapoport's lifelong scholarship scholars from around the world discuss the analytical relevance expansion and continuing application of these contributions in developing an advanced understanding of mutual relationships between people and built environments across cultures Professor Amos Rapoport has espoused an intellectual and theoretical legacy on environmental design scholarship that explains how cultural factors play a significant role in the ways people create and use environments as well as the way environments in turn influence people's behavior This volume presents a hitherto not seen unique and singular work that simultaneously articulates a cohesive framework of Rapoport's architectural theories and demonstrates how that theoretical approach be used in architectural inquiry education and practice across environmental scales types and cultural contexts It also acknowledges for the very first time how this theoretical legacy has pioneered the decolonizing of the Eurocentric approaches to architectural inquiry and has thus privileged an inclusive cross cultural perspective that laid the groundwork to understand and analyze non Western design traditions The book thus reflects a wide range of cross cultural and cross contextual range to which Professor Rapoport's theories apply a general notion of theoretical validity he always advocated for in his own writings The volume is a paramount source for scholars and students of architecture who are interested in understanding how culture mediates the creation use and preservation of the built environment **Guide to the Hispanic American Historical Review, 1956-1975** Wilber A. Ellison, 1980 *German Buenos Aires, 1900-1933* Ronald C. Newton, 2014-08-27 This study of the German community of early twentieth century Buenos Aires is a major contribution to the literature on Argentine history and on the New World immigrant experience Beginning with the first wave of immigration in the late nineteenth century and continuing to the outbreak of World War II Ronald C Newton reconstructs the growth development and influence of a powerful foreign population in what was then the largest city in South America In the three decades before World War I Argentina became a major food producing and exporting country Through the port of Buenos Aires was funneled the bulk of the Pampas foodstuff and fiber in one direction and Europe's capital technology and surplus labor in the other The German speakers made up one of the smaller Western European communities within the Argentine metropolis but their cultural and economic influence was far out of proportion to their numbers Based in a large and occupationally diverse middle class the German community was represented at all social levels Newton analyzes the experience of this well demarcated group during a period of rapid demographic growth and increasing pressure to assimilate He constructs working hypotheses that may be applied and refined in further investigations The book draws substantially on materials from within the Buenos Aires German community newspapers memoirs the records of associations and welfare agencies to reconstruct its intense daily life The author highlights for instance the sharp economic reversals German speaking residents suffered during World War I and shows how

their fortunes declined further after continued Germanic immigration in the 1920s Especially significant is his finding that the German community which until 1914 had seemed impervious to the currents of Argentine nationalism became susceptible to assimilation into Argentine society In concluding chapters Newton demonstrates the way the German economic elite came to terms with the Nazis for opportunistic reasons thus the volume also serves as an introduction to the question of Nazism s diffusion in Argentina

The Geography of South America Thomas A. Rumney,2013-04-18 South America is an area of fascination and study for geographers and other scholars from around the world and its land and people have played important roles in the discovery and distribution of civilizations resources and nations for millennia The region has long stimulated a large amount of research across the many subdisciplines of geography and Thomas A Rumney collects organizes and presents as many scholarly publications as possible in The Geography of South America A Scholarly Guide and Bibliography Every South American nation is included Argentina Bolivia Brazil Chile Colombia Ecuador French Guiana Guyana Paraguay Peru Surinam Uruguay and Venezuela Beginning with an overview of the region as a whole successive chapters one per nation are divided by specific subdisciplines of geography cultural social economic historical physical and environmental political and urban Each section is then divided by document type atlases books book chapters articles from scholarly journals master s theses and doctoral dissertations Although the majority of entries focus on English language works selected entries written in Spanish French German and other languages are also included with the entry titles translated into English and noted accordingly

Routledge Library Editions: Social & Cultural Geography Various Authors,2022-07-30 Re issuing books originally published between 1969 and 1990 this set of 15 volumes gives a 20 year perspective on the development of the discipline of social geography The books emphasize the increasingly important contribution of geographical theory to the understanding of social change values economic and political organization and ethical imperatives The volumes are authored by well known international geographers and discuss the philosophy and sociology of geography as well as key themes such as the geography of health crime space They also examine the cross over of geography with other disciplines such as literature and history

The Power of Place (RLE Social & Cultural Geography) John Agnew,James Duncan,2014-01-10 Reflecting the revival of interest in a social theory that takes place and space seriously this book focuses on geographical place in the practice of social science and history There is significant interest among scholars from a range of disciplines in bringing together the geographical and sociological imaginations The geographical imagination is a concrete and descriptive one concerned with determining the nature of places and classifying them and the links between them The sociological imagination aspires to explanation of human activities in terms of abstract social processes The chapters in this book focus on both the intellectual histories of the concept of place and on its empirical uses They show that place is as important for understanding contemporary America as it is for 18th century Sri Lanka They also show how the concept can provide insight into old problems such as the nature of social life in Renaissance Florence and

Venice The editors are leading exponents of the view of place as a concept that can mediate the geographical and sociological imaginations

The Meaning of the Built Environment Amos Rapoport, 1990 The Meaning of the Built Environment is a lively illustrated study of the meanings of everyday buildings for their users Professor Rapoport uses examples and vignettes drawn from many cultures and historical eras as well as contemporary America to explicate a new framework for understanding how the built environment comes to have meaning both for individual people and whole societies

Environment and Culture Irwin Altman, Joachim F. Wohlwill, 2013-06-29 Following upon the first two volumes in this series which dealt with a broad spectrum of topics in the environment and behavior field ranging from theoretical to applied and including disciplinary interdisciplinary and professionally oriented approaches we have chosen to devote subsequent volumes to more specifically defined topics Thus Volume Three dealt with Children and the Environment seen from the combined perspective of researchers in environmental and developmental psychology The present volume has a similarly topical coverage dealing with the complex set of relationships between culture and the physical environment It is broad and necessarily eclectic with respect to content theory methodology and epistemological stance and the contributors to it represent a wide variety of fields and disciplines including psychology geography anthropology economics and environmental design We were fortunate to enlist the collaboration of Amos Rapoport in the organization and editing of this volume as he brings to this task a particularly pertinent perspective that combines anthropology and architecture Volume Five of the series presently in preparation will cover the subject of behavioral science aspects of transportation

Tradition, Location and Community Adenrele Awotona, Necdet Teymur, 2024-11-07 Originally published in 1997 as part of the Ethnoscapes Current Challenges in the Environmental Social Sciences series reissued now with a new series introduction Tradition Location and Community Place making and Development brings together the selected papers of seventeen architects social scientists and planners It offers a range of original perspectives on the relationship between the design and habituation of the built environment on the one hand and social and cultural development on the other As an archival volume it attempts to present a mixture of cross disciplinary and cross cultural perspectives It explores the view that planning and design the

organization of the physical built environment which follow from the rapid transformations wrought by development must respond to and be based on the wants and needs of the people affected that is it must be in accord with their notions of environmental quality Divided into two sections The first section has five chapters which explore the theoretical and conceptual aspects of place making and development Section two consists of twelve chapters each of which presents a case study

Journal of Agricultural Economics Research ,1949 Catalog of Copyright Entries. Third Series Library of Congress. Copyright Office,1973 *The Other Argentina* Larry Sawers,2018-02-07 In the early part of this century Argentina was one of the most affluent nations in the world Since then the Argentine economy has experienced long periods of stagnation and recession Larry Sawers links the country s economic failure to the backwardness of the interior which comprises 70 percent of the area of the country and in which nearly one third of the population resides The interior s poverty according to Sawers is caused by the scarcity of agricultural resources and by serious inequalities in the distribution of those resources The region is poorly endowed land has been degraded through abuse and overuse and most farmers work tiny unproductive plots Moreover most of the products of the interior are produced for highly protected domestic markets and face stiff competition and falling prices in world markets Recent reforms in Argentina have dramatically aggravated the economic crisis of the interior Sawers shows how the poverty of the interior has contributed to the dismal performance of the Argentine economy as a whole He emphasizes the deleterious effects of extensive emigration from the interior to the major urban areas that are unable to absorb the human tide Additionally the national government has taxed the more prosperous regions in order to subsidize the interior placing a severe drain on the federal government budget and worsening inflation The effects of the interior s poverty on the nation are also political Sawers argues that the backward political system in the interior exacerbates the worst features of the national political culture and governance which in turn pose profound obstacles to economic progress

Settlement Ecology Glenn Davis Stone,1996-11 What determines agrarian settlement patterns Glenn Davis Stone addresses this question by analyzing the spatial aspects of agrarian ecology the relationship between how farmers farm and where they settle and how farming and settlement change as population density rises Crosscutting the fields of cultural anthropology archaeology geography and agricultural economics Settlement Ecology presents a new perspective on the process of agricultural intensification and explores the relationships between intensification and settlement decision making Stone insists that paleotechnic traditional agriculture must be seen as a social process with the social organization of agricultural work playing a key role in shaping settlement characteristics These relationships are demonstrated in a richly documented case study of the Kofyar who have been settling a frontier in the Nigerian savanna The history of agricultural change and the development of the settlement pattern are reconstructed through ethnography archival research and aerial photos and are analyzed using innovative graphical methods Stone also reflects on the limits of ecological determination of settlement comparing the farming and settlement trajectories of the Kofyar and Tiv on the same frontier
