Don't Read Poetry Stephanie Burt, 2019-05-21

An award winning poet offers a brilliant introduction to the joys and challenges of the genre In Don't Read Poetry award winning poet and literary critic Stephanie Burt offers an accessible introduction to the seemingly daunting task of reading understanding and appreciating poetry Burt dispels preconceptions about poetry and explains how poems speak to one another and how they can speak to our lives She shows readers how to find more poems once they have some poems they like and how to connect the poetry of the past to the poetry of the present Burt moves seamlessly from Shakespeare and other classics to the contemporary poetry circulated on Tumblr and Twitter She challenges the assumptions that many of us make about poetry whether we think we like it or think we don't in order to help us cherish and distinguish among individual poems A masterful guide to a sometimes confounding genre Don't Read Poetry will instruct and delight in new and old poems alike

Romantic Poetry Angela Esterhammer, 2002-01-01

Romantic Poetry encompasses twenty seven new essays by prominent scholars on the influences and interrelations among Romantic movements throughout Europe and the Americas It provides an expansive overview of eighteenth and nineteenth century poetry in the European languages The essays take account of interrelated currents in American Argentinian Brazilian Bulgarian Canadian Caribbean Chilean Colombian Croatian Czech Danish English Estonian Finnish French German Greek Hungarian Irish Italian Mexican Norwegian Peruvian Polish Romanian Russian Serbian Slovak Spanish Swedish and Uruguayan literature Contributors adopt different models for comparative study tracing a theme or motif through several literatures developing innovative models of transnational influence studying the role of Romantic poetry in socio political developments or focusing on an issue that appears most prominently in one national literature yet is illuminated by the international context This collaborative volume provides an invaluable resource for students of comparative literature and Romanticism

SPECIAL OFFER 30% discount for a complete set order 5 vols

The Romanticism series in the Comparative History of Literatures in European Languages is the result of a remarkable international collaboration The editorial team coordinated the efforts of over 100 experts from more than two dozen countries to produce five independently conceived yet interrelated volumes that show not only how Romanticism developed and spread in its principal European homelands and throughout the New World but also the ways in which the affected literatures in reaction to Romanticism have redefined themselves on into Modernism A glance at the index of each volume quickly reveals the extraordinary richness of the series total contents

Romantic Irony sets the broader experimental parameters of comparison by concentrating on the myriad expressions of irony as one of the major impulses in the Romantic philosophical and artistic revolution and by combining cross cultural and interdisciplinary studies with special attention also to literatures in less widely diffused language streams

Romantic Drama traces creative innovations that deeply

altered the understanding of genre at large fed popular imagination through vehicles like the opera and laid the foundations for a modernist theater of the absurd Romantic Poetry demonstrates deep patterns and a sharing of crucial themes of the revolutionary age which underlie the lyrical expression that flourished in so many languages and environments Nonfictional Romantic Prose assists us in coping with the vast array of writings from the personal and intimate sphere to modes of public discourse including Romanticism's own self commentary in theoretical statements on the arts society life the sciences and more Nor are the discursive dimensions of imaginative literature neglected in the closing volume Romantic Prose Fiction where the basic Romantic themes and story types the romance novel novella short story and other narrative forms are considered throughout Europe and the New World This enormous realm is seen not just in terms of Romantic theorizing but in the light of the impact of Romantic ideas and narration on later generations As an aid to readers the introduction to Romantic Prose Fiction explains the relationships among the volumes in the series and carries a listing of their tables of contents in an appendix No other series exists comparable to these volumes which treat the entirety of Romanticism as a cultural happening across the whole breadth of the Old and New Worlds and thus render a complex picture of European spiritual strivings in the late eighteenth and the nineteenth centuries a heritage still very close to our age **Library of Congress Subject Headings** Library of Congress,1992 *Computational Linguistics and Intelligent Text Processing* Alexander Gelbukh,2015-04-09 The two volumes LNCS 9041 and 9042 constitute the proceedings of the 16th International Conference on Computational Linguistics and Intelligent Text Processing CICLing 2015 held in Cairo Egypt in April 2015 The total of 95 full papers presented was carefully reviewed and selected from 329 submissions They were organized in topical sections on grammar formalisms and lexical resources morphology and chunking syntax and parsing anaphora resolution and word sense disambiguation semantics and dialogue machine translation and multilingualism sentiment analysis and emotion detection opinion mining and social network analysis natural language generation and text summarization information retrieval question answering and information extraction text classification speech processing and applications Poetry's Data Meredith Martin,2025-04-22 Why literary studies must confront digital mediation We live and research in a technologically mediated landscape in which old models of reading and researching methods that presume an autonomous single scholar gathering resources and making claims no longer hold Scholars have yet to theorize either the embeddedness of their sources inside multiple layers of mediation or their own place in an information ecosystem that demands our active participation In Poetry's Data Meredith Martin explores what current access to data might mean for mapping the discourse of poems Martin's account of her work learning about digital humanities so that she could build a database of historic prosodic materials becomes a through line in a narrative that chronicles how literature has understood poetry's data its sounds from the sixteenth century to the present day Digital knowledge infrastructures have historical antecedents that scholars have been trained to theorize And yet as Martin points out we have not been trained to identify and navigate let

alone critique the current landscape of knowledge production Through five chapters and five examples from the Princeton Prosody Archive Martin shows that the histories of mediation and format are essential to the teaching of poetry and poetic form

Applications and Innovations in Intelligent Systems VIII Ann Macintosh, Mike Moulton, Frans Coenen, 2012-12-06
Ann Macintosh Napier University UK The papers in this volume are the refereed application papers presented at ES2000 the Twentieth SGES International Conference on Knowledge Based Systems and Applied Artificial Intelligence held in Cambridge in December 2000 The scope of the Application papers has expanded over recent years to cover not just innovative applications using traditional knowledge based systems but also to include applications demonstrating the whole range of AI technologies This volume contains thirteen refereed papers describing deployed applications or emerging applications together with an invited keynote paper by Dr Daniel Clancy of NASA Ames Research Centre The papers were subject to refereeing by at least two expert referees All papers which were controversial for some reason were discussed in depth by the Application Programme Committee For the application stream a paper is acceptable even if it describes a system which has not yet been installed provided the application is original and the paper discusses the kinds of things that would help others needing to solve a similar problem Papers have been selected to highlight critical areas of success and failure and to present the benefits and lessons learnt to other developers Papers this year cover topics as diverse as KBS for maintaining offshore platforms Data Mining to predict corporate business failure integrated AI techniques to support field service engineers Natural Language applied to the Data Protection Act knowledge management and the application of neural networks
