

rammed

rammed earth is a building material made by compressing earth, sand, and gravel into a solid mass. It is a traditional building technique that has been used for centuries. The material is made by mixing earth, sand, and gravel in a specific ratio and then compressing it into a solid mass. The resulting material is strong and durable, and it can be used for a variety of building applications, including walls, floors, and foundations. The technique is also environmentally friendly, as it uses natural materials and requires less energy to produce than other building materials.
