accomplishment In the second part of the book the author argues that the effects of low level radiation can be beneficial rather than damaging Evidence is presented proving that low level radiation in the US from both natural sources and human activities such as nuclear bombs tests actually reduces death rates from cancer and other diseases and increases longevity In the Indian State of Kerala life span has been shown to increase 10 5 years due to the natural radiation from thorium mines The book proposes that primitive life forms must have developed immune systems to counter the harmful effects of natural radioactivity and that low level radiation from nuclear waste may one day be transformed from trash to treasure Nature has always been kind to humans But our self aggrandizing species has mistaken blessings for disasters and spoiled the otherwise splendid 20th century
