How to Build a Better World for Our Generation Habtemariam Micael,2018-09-21 Teach about what matters Our job is to excite students and adult learners about the world to help them see the role that they can play in making society more equal and more just to express their ideas powerfully to see that social and historical materialism studies is about real people s lives and about their relationship to each other and to nature to be enlightened No matter how long the night the day is sure to come Transformation is only valid if it is carried out with the people not for them Liberation is like a childbirth and a painful one The person who emerges is a new person no longer oppressor or oppressed but a person in the process of achieving freedom is only the oppressed who by freeing themselves can free their oppressors The age of nations is past The task before us now If we would not perish it is to shake off our ancient prejudices and to build the earth You can be the most beautiful person in the world and everybody sees light and rainbows when they look at you But if you yourself don t know it all of that doesn t even matter To achieve a new and better order of society the oppressed working class need not allow their oppressors to represent them in parliament To decide which member of the ruling class is to repress and crush the people through parliament is the real essence of to realize the dictatorship character in the parliament Dictatorship is a rule based directly upon force and unrestricted by any laws The role of the oppressed societies need to be organized for the necessity of revolution to defeat dictatorship s ideology as it can never be solved by reformation according the revolutionary theory What we achieve inwardly will change outer reality Most people are not achieving their dreams because they are living in their fears Achievement is the product of conscious decisions and action that can challenge the tragedy of life Action clarity dare create the achievement of the required goal

Speech and System Peter Bornedal,1997 In this investigation creative writing and philosophy are shown to be specific types of language games distinct from speech as used in communicative interaction between individuals The author deals with thinking speech and systems respectively I Thinking is understood as a soliloquy preceding any kind of creative activity and any kind of writing The author analyses thinking as a subject s listening to its own voice with a split between I and me close to Derrida s notion of difference as a condition for the production of meaning II Analyzing with reference to Benveniste Austin and Searle what speech is the author deduces the so called pragmatic subject in contrast to the first section s reflective In its elementary speech act the pragmatic subject does constitute itself in rudimentary ways III In dealing with the product of reflective activity the author finds the so called textual inconsistency or logical aporias inherent in any logical or pseudo logical system to be in line with Goedel s incompleteness theorems and he rejects the tendency to use deconstruction to understand these aporias as is usual in Western metaphysics The author s philosophical position is closest to that of Paul Ricoeur and Jacques Derrida but on crucial issues he advances his own ideas on the relationship between speech and writing also establishing a criticism of metaphysics that may be more radical than what has previously been developed

Instincts Norris Ray Peery, 2003-07-13 This book is the third in my series of four books dealing with Intelligence Instincts and Consciousness The simple and truthful realization of what we are and how we got to where we are within nature s world is the ultimate truth that any philosophy could ever propose to know It is ultimately the most powerful state that any human mind can ever attain It is a true kind of nirvana It is with this knowing state of mind that we can make ever new beginnings and provide for a future where our chances are best for surviving whatever random hells that nature will with great certainty rise up against us The fact that we might have to eventually face up to what we are as completely definable creatures in terms of a very complex organization of billions of very simple structures is not in anyway whatsoever a degradation of the truth of our humanity Understanding what we are has led us to realize both the miraculous and morally good achievements of our kind and also to an understanding of the basic nature of our more hidden ugly and evil actions
