Data-Oriented Maintenance Intervention Limit Determination for Ballasted Light Rail Tracks through Multibody Simulations David Camacho Alcocer,2021-07-13 Light rail trains LRT are an important part of public transport but due to perceived high life cycle costs are not always considered suitable Life cycle cost reduction might be achieved through a knowledge based maintenance management rather than just on experience This work develops limits of maintenance and renewal of LRT systems based on vehicle reactions to the current track quality through measured data multibody simulations and track geometry indices An approach based on knowledge would lead to a track condition which allows a safe comfortable and under an appropriate maintenance strategy economically profitable operation
