,      The Governance of Rangelands Pedro M. Herrera,Jonathan Davies,Pablo Manzano Baena,2014-10-10 Rangelands are large natural landscapes that can include grasslands shrublands savannahs and woodlands They are greatly influenced by and often dependent on the action of herbivores In the majority of rangelands the dominant herbivores are found in domestic herds that are managed by mobile pastoralists Most pastoralists manage their rangelands communally benefitting from the greater flexibility and seasonal resource access that common property regimes can offer As this book shows this creates a major challenge for governance and institutions This work improves our understanding of the importance of governance how it can be strengthened and the principles that underpin good governance in order to prevent degradation of rangelands and ensure their sustainability It describes the nature of governance at different levels community governance state governance international governance and the unique features of rangelands that demand collective action issues of scale ecological disequilibrium and seasonality A series of country case studies is presented drawn from a wide spectrum of examples from Africa the Middle East Central Asia Europe and North America These provide contrasting lessons which are summarised to promote improved governance of rangelands and pastoralist livelihoods      *Rangeland Systems* David D. Briske,2017-04-12 This book is open access under a CC BY NC 2 5 license This book provides an unprecedented synthesis of the current status of scientific and management knowledge regarding global rangelands and the major challenges that confront them It has been organized around three major themes The first summarizes the conceptual advances that have occurred in the rangeland profession The second addresses the implications of these conceptual advances to management and policy The third assesses several major challenges confronting global rangelands in the 21st century This book will compliment applied range management textbooks by describing the conceptual foundation on which the rangeland profession is based It has been written to be accessible to a broad audience including ecosystem managers educators students and policy makers The content is founded on the collective experience knowledge and commitment of 80 authors who have worked in rangelands

throughout the world Their collective contributions indicate that a more comprehensive framework is necessary to address the complex challenges confronting global rangelands Rangelands represent adaptive social ecological systems in which societal values organizations and capacities are of equal importance to and interact with those of ecological processes A more comprehensive framework for rangeland systems may enable management agencies and educational research and policy making organizations to more effectively assess complex problems and develop appropriate solutions
