Private Landscapes Pamela Burton, Marie Botnick, 2002 When we think of the gardens of Southern California we tend to think of the enormous semiarid landscapes of the Huntington and Rancho Los Alamitos often built on the sprawling grounds of former ranches But there is another garden tradition in Southern California the modest rectangular suburban plots designed by the most famous architects of mid century modernism Richard Neutra Rudolph Schindler Gregory Ain Raphael Soriano Harwell Hamilton Harris A Quincy Jones and John Lautner These architects saw the garden as an outdoor extension of the space of the houses they designed rather than a neo Spanish fantasy to be added later by a landscapist Their modern gardens made use of low maintenance drought resistant plants and made room for informal outdoor living by children and adults with an emphasis on recreation and exercise The first book of its kind Private Landscapes profiles twenty significant gardens and their accompanying houses by these celebrated architects Using contemporary photographs by Julius Shulman and newly commissioned color images along with plans and plant lists Private Landscapes provides a never before seen look at these gardens As beautiful and practical now as they were 50 years ago these designs continue to provide inspiration for gardeners and designers everywhere

The Urban Condition Ghent Urban Studies Team, 1999 What does the Western city at the end of the twentieth century look like How did the modern metropolis of congestion and density turn into a posturban or even postsuburban cityscape What are edge cities and technoburbs How has the social composition of cities changed in the postwar era What do gated communities tell us about social fragmentation Is public space in the contemporary city being privatized and militarized How can the urban self still be defined What role does consumer aestheticism have to play in this These and many more questions are addressed by this uniquely conceived multidisciplinary study *The Urban Condition* seeks to interfere in current debates over the future and interpretation of our

Pierre Koenig Neil Jackson, 2019-02-05 A heavily illustrated and highly designed tribute to Los Angeles architect Pierre Koenig a key figure of the Los Angeles Modernist movement In this remarkable and gorgeously illustrated book Neil Jackson presents a vibrant profile of the Los Angeles architect Pierre Koenig who Time magazine said lived long enough to become cool twice From the influences of Koenig's youth in San Francisco and his military service during World War II to the Case Study Houses and his later award laden years Jackson's study plots the evolution of Koenig's oeuvre against the backdrop of Los Angeles a city that both shaped and was shaped by his architecture The book is anchored by Jackson's exciting discoveries in

Koenig's archive at the Getty Research Institute Drawings photographs diaries letters lecture notes building contracts and university projects many of which are published for the first time provide an expanded understanding of Koenig and additional context for his architectural achievements An examination of Koenig's Case Study Houses shows how his often single minded and pragmatic approach to domestic architecture recognized the advantages of production housing and presciently embraced sustainable ecologically responsible design A new account of the Chemehuevi housing project in Havasu Lake California demonstrates the special role that learning and teaching played in the development of his architecture Over his fifty year career Koenig not only designed iconic houses but also directed their restoration and curated their legacy ensuring that his work could be seen and appreciated by present and future admirers of midcentury Los Angeles

Contemporary Architects Ann Lee Morgan, Colin Naylor, 1987 To strengthen the contemporary focus of this volume we have added about forty architects and have deleted some whose activity ceased before World War II In making these decisions we have been assisted by an Advisory Board As in the first volume we have continued to define the word architect very broadly so as to include planners theorists structural engineers and landscape architects whose work seems to be central to the enterprise of creating habitable spaces in our day Editor's note *A History of Artificially Intelligent Architecture* Danyal Ahmed, 2023-10-23 *A History of Artificially Intelligent Architecture Case Studies from the USA UK Europe and Japan 1949-1987* provides a comprehensive survey of architectural projects exhibiting intelligence since the Late First Century right up to the present day Tracing the social scientific and technological developments this book analyses case studies from both conceived and executed architectural projects by Architects and Cyberneticians from the United States United Kingdom Europe and Japan from 1949-87 From the Late First Century through to the Seventeenth Century the scientific endeavors of the Hero of Alexandria Ramon Llull Paracelsus Ren Descartes Jacques de Vaucanson Pierre Jaquet Droz and Charles Babbage have been presented in which they attempted to review analyse and conclude the notion of artificial intelligence Coming to the Twenty First Century and witnessing a period particularly from 1949-87 where nothing had been constant Architects and Cyberneticians whose architectural projects attempted to simulate intelligence include Cedric Price Richard Saul Wurman Nicholas Negroponte Kenzo Tange Arata Isozaki Charles Eames Ezra D Ehrenkrantz Richard Rogers Renzo Piano and Gordon Pask respectively This book asks How have Polymaths Architects and Cyberneticians simulated artificial intelligence in their scientific architectural projects Is it possible to define intelligence purely based on the history of architecture Or on a more extensive level is it possible to view artificial intelligence originating from the history of architecture instead of computational paradigm The transdisciplinarity of the book makes it of interest to researchers and students of technologically advanced architecture's history theory and criticism artificial intelligence cybernetics information and communications urban and sustainable design ergonomics computer applications and digital design and fabrication **Silver Lake Bohemia** Michael Locke, Vincent Brook, 2016-11-07 Since the early 1900s Silver Lake

has been a magnet for iconoclastic writers architects and political activists Famed architect Frank Lloyd Wright who designed the Hollyhock House for socialist and oil heiress Aline Barnsdall drew a wave of visionary modernists to the area Local civil rights advocate Loren Miller spearheaded the fight against housing discrimination Silver Lake s Black Cat bar and Harry Hay s Mattachine Society were central to the early gay rights movement Literary artists An is Nin and James Leo Herlihy made the neighborhood their home as did other notables like first lady of baseball Effa Manley and Hobo Millionaire James Eads How Michael Locke and Vincent Brook chronicle these and other people and places that helped make Silver Lake the bohemian epicenter of Los Angeles The Grove Encyclopedia of American Art Joan M. Marter,2011 Arranged in alphabetical order these 5 volumes encompass the history of the cultural development of America with over 2300 entries

NorCalMod Pierluigi Serraino,2006-08-03 Many people think modernist architecture never flowered in California north of the San Fernando Valley NorCalMod dispels that notion in a copiously illustrated history showcasing extraordinary examples of its proud contribution to the Bay Area and environs As a style modernist architecture was hotly debated in its day why create modern structures where such distinctive Victorian and Arts and Crafts buildings already existed pulling heavyweights such as Frank Lloyd Wright Lewis Mumford and Walter Gropius into the fray Ultimately that existing Bay Region Style would remain the area s architectural hallmark but not before hundreds of important modernist projects many still standing yet unjustly neglected today had been established The remarkable photos in this book open our eyes to a long lost chapter in the history of California architecture and make NorCalMod a volume to be enjoyed by those interested in California history and style as well as by architecture students and professionals **Building Art** Paul

Goldberger,2017-11-14 From Pulitzer Prize winning critic Paul Goldberger a full fledged critical biography of Frank Gehry undoubtedly the most famous architect of our time Fascinating An informative startling journey into the inner sanctums of modern architecture s power structure The New York Times Book Review Riveting Full of little known facts about the Pritzker Prize winner that will surprise the most knowledgable Gehry philes Architectural Digest Goldberger follows Gehry from his humble origins the son of working class Jewish immigrants in Toronto to the heights of his extraordinary career He explores Gehry s relationship to Los Angeles a city that welcomed outsider artists and profoundly shaped him in his formative years He surveys the full range of his work from the Bilbao Guggenheim to the Walt Disney Concert Hall in L A to the architect s own home in Santa Monica which galvanized his neighbors and astonished the world He analyzes his carefully crafted persona in which an amiable surface masks a driving ambition And he discusses his use of technology not just to change the way a building looks but to revolutionize the very practice of the field Comprehensive and incisive Building Art is a sweeping view of a singular artist and an essential story of architecture s modern era *Architectural Regionalism*

Vincent B. Canizaro,2012-03-20 In this rapidly globalizing world any investigation of architecture inevitably leads to considerations of regionalism But despite its omnipresence in contemporary practice and theory architectural regionalism

remains a fluid concept its historical development and current influence largely undocumented This comprehensive reader brings together over 40 key essays illustrating the full range of ideas embodied by the term Authored by important critics historians and architects such as Kenneth Frampton Lewis Mumford Sigfried Giedion and Alan Colquhoun Architectural Regionalism represents the history of regionalist thinking in architecture from the early twentieth century to today Hut Pavilion Shrine: Architectural Archetypes in Mid-Century Modernism Miles David Samson,2016-03-09 The phase of American architectural history we call mid century modernism 1940 1980 saw the spread of Modern Movement tenets of functionalism social service and anonymity into mainstream practice It also saw the spread of their seeming opposites Temples arcades domes and other traditional types occur in both modernist and traditionalist forms from the 1950s to the 1970s Hut Pavilion Shrine examines this crossroads of modernism and the archetypal and critiques its buildings and theory The book centers on one particularly important and omnipresent type the pavilion a type which was the basis of major work by Louis I Kahn Paul Rudolph Philip Johnson Minoru Yamasaki and other eminent architects While focusing primarily on the architecture culture of the United States it also includes the work of British European Team X and Scandinavian designers and writers Making connections between formal analysis historical context and theory the book continues lines of inquiry which have been pursued by Neil Levine and Anthony Vidler on representation and by Sarah Goldhagen and Alice Friedman on modernism s forbidden elements of the honorific and the visually pleasurable It highlights the significance of pavilionizing mid century designers such as Victor Lundy John Johansen Eero Saarinen and Edward Durell Stone and shows how frequently essentialist and traditionalist types appeared in the roadside vernacular of drive in restaurants gas stations furniture and car showrooms branch banks and motels The book ties together the threads in mid century architectural theory that addressed aspects of type essential structure and primal humanistic aspects of environment making and discusses how these concerns outlived the mid century moment and in the designs and writings of Aldo Rossi and others they paved the way for Post Modernism
