The volume takes on topics such as discussion of the transformation of efforts to identify a best language approach, the sign versus speech debate, to a stronger focus on individual strengths, potentials, and choices for selecting and even combining approaches, the effects of language on other areas of development, as well as effects from other domains on language itself, and how neurological, socio-cognitive, and linguistic bases of learning are leading to more specialized approaches to instruction that address the challenges that remain for deaf and hard of hearing individuals. This volume both complements and extends *The Oxford Handbook of Deaf Studies and Deaf Education Volumes 1 and 2*, going further into the unique challenges and demands for deaf or hard of hearing individuals than any other text, and providing not only compilations of what is known but setting the course for investigating what is still to be learned.

[Nurturing Your Child's Math and Literacy in Pre-K-Fifth Grade](#) Mary Mueller, Alisa Hindin, 2016-11-23. With recent changes in the curriculum and standards in language arts and mathematics, parents often are challenged to find ways to help their children be successful in their learning endeavors. While parents want to be involved in their children's education, they are often unsure of their role in their children's learning and the best ways to help their children to succeed academically. Moreover, with the changes in how math and literacy are being taught, parents often struggle with helping even first-grade children with their homework. In this book, we set out to alleviate this struggle by offering parents a resource they can use to navigate their child's education, communicate with teachers, and support their children in learning mathematics and literacy. After providing an overview of the current educational climate and tips for communication with teachers, we share strategies and suggestions parents can use to assist their children in language arts and mathematics. We provide detailed descriptions of activities, games, books, and conversations that connect with what children will be learning at each grade level.

[Small Steps, Big Differences](#) Hilary Craig, 2014-03-06. Each one of us learns in a different way. Traditional teaching approaches don't always suit the variety of different ways people learn. A conflict that can damage confidence and sometimes lead to failure. The key question that faces parents and teachers is how to help those who learn differently find long-term success. In *Small Steps, Big Differences: A Toolkit for Parents of Children Who Fall through the Cracks*, author Hilary Craig challenges this question and offers parents strategies to help. The resources provided within this toolkit are framed around the core belief that all children can make progress even if traditional learning and teaching methods in the classroom are inadequate for the way they learn. This toolkit provides support to those parents who recognize the unique abilities and talents in their children and who want practical tools to enable them to learn and succeed. Hilary Craig's experience, insight, and strategies for helping children learn effectively provide a valuable resource to accompany classroom learning. In this toolkit, she also addresses the four essential skills for effective learning: memory, listening, attention, and social skills, and strategies to develop each of these with the final
