Naturalism and Social Science David Thomas, 1980-01-24 This 1979 text addresses the ways in which the dominant theories in large areas of Western social science have been subject to strong criticisms particularly of their supposed philosophical deficiencies In the philosophy of science this resulted in empiricist views being replaced by an emphasis on the potential obstinacy of theory in the face of the empirical world After introducing this contemporary philosophy of science Dr Thomas uses it to argue that social study can both retain the natural scientific commitment to the constraint of the external world and assimilate the sorts of philosophical criticisms that were made of the old social scientific theories In particular he shows that social study understood in terms of the new philosophy of science can give an account of the former's distinctive concerns with issues of the meaning and value of social life Dr Thomas supports his abstract arguments by detailed case studies

Anthropological Critique of Development Mark Hobart,2002-05-03 Challenges the utopian view of Western knowledge as uniquely successful in its application to economic and social development The contributors offer an ethnographic critique using case studies from Europe Africa Asia and Latin America Phenomenological Approaches to Religion and Spirituality Essien, Essien D.,2021-01-29 There is an interesting knowledge trajectory that God remains incomprehensible not imperceptible This lends credence to the fact that religious study since the Enlightenment has dedicated itself almost entirely to the problem of reconciling the non existence of God in the physical world with his necessary existence in the metaphysical world When seriously examined it would be discovered that these two aspects are logically contradictory and this is a problem with no solution But interpreting God not as a physical being but as a phenomenological thing changes the nature of the problem enough that a solution emerges almost automatically In this phenomenological model the crux of the matter is that God does not exist but God is real Therefore it is imperative to return to experience and verifiability hence purging it of unexamined and often hidden assumptions Phenomenological Approaches to Religion and Spirituality brings together the different disciplines and research approaches to provide a comprehensive analysis of the phenomenology of God and

McKenzie,2012-12-06 The essays in this volume were a challenge to me to write I am an economist to the core inclined to evaluate most observed behavior and public policies with conventional neoclassical theory The essays represent my attempt to come to grips with the meaning and importance of what I try to do as a professional economist They reflect my attempt to acquire a new and improved understanding of the usefulness and limitations of the writings of professional economists especially my own In this regard although I hope others will find the thoughts useful the volume represents a personal statement of how one economist views his and others work For that reason the discussion is often openly normative tinged with the conviction that social discourse is more than costs and benefits and that economics cannot be fully evaluated by the methods economic methods that are the subject of the evaluation These essays could not have been written without considerable encouragement and help from colleagues and friends The following people are recognized for having read one or more chapters and for having contributed critical substantive comments Diana Bailey Wilfred Beckerman Geoffrey Brennan William Briet James Buchanan Delores Martin David Maxwell Mary Ann McKenzie Warren Samuels Robert Staaf Richard Wagner Karen Vaughn and Bruce Yandle I am very much in their debt However they should not be held accountable for any of the positions taken and any errors that may remain **Critical Readings on Piaget** Leslie Smith,2002-09-26

First published in 1996 Routledge is an imprint of Taylor Francis an informa company **International Relations Theory** Michael Haas,2016-12-27 While many texts on international relations deal only with ideologies this book goes beyond discussion of ideology to provide an understanding of how global economics politics and society operate The book begins with a history of the International Studies Association which was founded to develop empirically based knowledge and was opposed to ideological isms as biased guides to policy The book focuses on four major paradigms Marxian Mass Society Community Building and Rational Choice with diagrams indicating their empirical predictions over time The Marxian paradigm focuses on scientific claims of Marx and Engels The Mass Society paradigm explains why democracies become dysfunctional The Community Building paradigm explains how communities can be and are built at the local national regional and international levels The Rational Choice paradigm assembles proposed explanations of reason based economic political and social life to demonstrate what they have in common Other candidates for paradigms are reviewed with a focus on why they need further development to become major paradigms at the decision making dyadic societal national and international

Sociological Theory Bert N. Adams, R. A. Sydie, 2001-01-30 This book connects theorists and their work to larger themes and ideas All too often in the opinion of the authors theory texts focus too much on individual theorists and insufficiently on the relationship between their theories and how these have contributed in turn to the evolution of ideas concerning social life Treatment of individual theories and theorists is balanced with the development of key themes ideas about social life introduced in Chapter 1 which then reappear in the discussion of individual theorists and their work A key organizing principle of this text is to trace major schools of thought over the past 150 years as they appear and reappear in different chapters Section 1 introductions help remind students of the big picture within which any given theory or theorist is only one part A consistent organization and presentation within chapters helps provide students with a context for learning and a means of much more easily comparing and contrasting theorists and their ideas Important new voices in a text for social theory In Chapter 2 Harriet Martineau is introduced as one of sociology s founders From then on the views of women theorists and others are represented in far more than token fashion Examples include W E B DuBois Marianne Weber Charlotte Gilman Rosa Luxemburg Joseph Schumpeter V I Lenin Niklas Luhmann Theda Skocpol Erik Wright Elman Service Arlie Hochschild Dorothy Smith Patricia Hill Collins and Immanuel Wallerstein A timeline showing when social theorists lived and wrote and connecting their biographies to important social events over 300 years is at the back of the text The organization of every chapter along similar lines provides a consistency in presentation that encourages comparisons among the theorists The authors do a very good job presenting overlooked theorists and making their relevance to social theorizing doing sociology clear Joan Alway formerly University of Miami The strengths of this text are the breadth of theories covered the integration of gender related topics family work religion the use of substantial quotes from primary texts the consistent inclusion of methodological issues and the goals of the project to provide an expansive and readable theory text I have no doubt that it will find a solid position in the field of popular theory texts for undergraduate course use Kathleen Slobin North Dakota State University
