naturales para la gestión fiscal y de las finanzas públicas. El objetivo del estudio de tres volúmenes denominado *Essentials for Economists and Public Finance Professionals* publicado en la serie de estudios realizados por el Banco Mundial es presentar un panorama general conciso de los temas relacionados con las IE que estos profesionales probablemente deban encarar. En el primer volumen *The Extractive Industries Sector* se ofrece una reseña general de las cuestiones fundamentales para la economía de las IE: se analizan los componentes principales del buen gobierno, las políticas y los marcos institucionales del sector y se identifican las obligaciones de financiamiento del sector público relacionadas con las IE. El análisis de la economía de las IE abarca la valuación de los activos subterráneos, la interpretación económica del mineral y la estructura de los mercados de la energía y los minerales. En este volumen se determinan las responsabilidades de las entidades gubernamentales correspondientes y se describen las características de los marcos jurídicos y normativos del sector de las IE. Se analizan brevemente las funciones clave y específicas del sector, además de las estructuras financieras que sustentan las salvaguardas ambientales y sociales, la inversión de los ingresos públicos provenientes del petróleo, el gas o los minerales, así como la diversificación económica basada en las industrias extractivas. Los autores esperan que este volumen resulte de utilidad a los economistas y los profesionales de las finanzas públicas que trabajan en países ricos en recursos, incluidos los encargados de la toma de decisiones en ministerios de finanzas, organizaciones internacionales y otras entidades relevantes para la comprensión y el análisis del sector de las IE.

Refined Material Sean Nesselrode Moncada, 2023-08-29. Beginning with the oil blowout in 1922 that is considered the moment that marked Venezuela's entry into a modern era, *Refined Material* explores the integral relationship between Venezuelan oil industry and artistic production. In this groundbreaking study, Sean Nesselrode Moncada examines Venezuela's mid-century art and architecture in an argument that reinforces the inextricability of the rise of a capitalist and centralized state from life, activism, and art. Oil provided the crucible for national reinvention, ushering in a period of dizzying optimism and bitter disillusion as artists, architects, graphic designers, activists, and critics sought to define the terms of modernity. Looking at five different but interrelated case studies—a print magazine, a planned housing community, a luxury hotel, a kinetic museum installation, and a documentary film—this book brings forth a novel reading to the renowned Venezuelan modernist canon and reveals how the logic of refinement conditioned the terms of development and redefined our relationship to nature, matter, and one another.
