Lost In Familiar Places Creating New Connections Between The Individual Society:

Lost in Familiar Places Edward R. Shapiro, A. Wesley Carr, 2011 **Finding a Place to Stand** Edward R.

Shapiro, 2020-04-29 What stands between us and authoritarianism seems increasingly fragile Democratic practices are under attack by foreign intrusion into elections voter suppression restricts citizen participation Nations are turning to autocratic leaders in the face of rapid social change Democratic values and open society can only be preserved if citizens can discover and claim their voices We access society through our organisations yet the collective voices and irrationalities of these organisations do not currently offer clear pathways for individuals to locate themselves How can we move through the mounting chaos of our social systems through our multiple roles in groups and institutions to find a voice that matters What kind of perspective will allow institutional leaders to facilitate the discovery of active citizenship and support engagement This book draws on psychodynamic systems thinking to offer a new understanding of the journey from being an individual to joining society as a citizen With detailed stories the steps and the conscious and unconscious linkages from being a family member to entering outside groups to taking up and making sense of institutional roles illuminate the process of claiming the citizen role With the help of leaders who recognise and utilise the dynamics of social systems there may be hope for us as citizens to use our institutional experiences to discover a place to stand *Disseminating Lacan* David Pettigrew, François

Raffoul, 1996-01-01 Brings together parts of the Lacanian discourse that have remained isolated in their respective research areas and outlines the shape of Lacanian discourse showing the relation of Lacan's thought to philosophy science literature and aesthetics gender and sexuality and psychoanalytic theory **Embracing Organisational Development and Change**

Antonie van Nistelrooij, 2020-11-02 This book focuses on human behavioural processes and describes them from an interdisciplinary perspective It introduces readers to the main theories and approaches in the field of organisational development and change ODC and discusses their relevance and purpose with a clear focus on improving how readers perceive and handle change The book is tailor made for business students without any background in the humanities helping them to conceptualise organisational development and change and to practically organise interventions to increase organisational effectiveness The book's goal is to help future managers and consultants recognise and handle the full situation which includes purposes people and relationships Furthermore it elaborates on those theories and instruments that can deliver real benefits to real people working in real fuzzy and complex circumstances and includes several practical cases focusing on the role of the interventionist **Group Analysis: Working with Staff, Teams and Organizations**

Aleksandra Novakovic, David Vincent, 2019-02-12 Featuring contributions from a range of organizational contexts Group Analysis Working with Staff Teams and Organizations identifies the key features to group analytic practice as well as how different theoretical orientations such as Systemic and Tavistock Consultancy approaches can be incorporated into the process The book addresses two essential features of group analysis the exploration of unconscious dynamics in groups and

Heroine Abuse Thomas Gaiton Marullo, 2015-10-15 Fyodor Dostoevsky's first novel *Netochka Nezvanova* written in 1849 remains the least studied and understood of the writer's long fiction but it was a seedbed for many topics and themes that became hallmarks of his major works Specifically *Netochka Nezvanova* was the first in Dostoevsky's corpus to focus on the psychology of children and the first to feature a woman in a leading and narrative role It was also the first work in Russian literature to deal with problems of the family In *Heroine Abuse* Thomas Marullo contends that *Netochka Nezvanova* also provides a striking example of what psychologists today call codependency the ways often deviant and destructive in which individuals bond with people places and things as well as with images and ideas to cope with the vicissitudes of life Marullo shows how at age twenty eight Dostoevsky intuited and illustrated the workings of relationship addiction almost a century and a half before it became the scholarly focus of practitioners of mental health The moral monsters infernal women children adults and adult children who populate *Netochka Nezvanova* seek codependence in people places and things and in images ideas and ideals to satiate cravings for love dominance and control as well as to indulge in narcissism sexual perversion and other aberrant or alternative behaviors Indeed in no other work would Dostoevsky examine such phenomena as pedophilia and lesbianism with such abandon Racing from tie to tie bond to bond and caught in a debilitating loop that they claim to detest but sadomasochistically enjoy the characters in *Netochka Nezvanova* wreak havoc on themselves and the world They do so moreover with impunity their addictions moving them from momentary exultation as self-styled extraordinary men and women through prolonged darkness and despair and once again to old and new addictions for physical and emotional release Readers of *Heroine Abuse* will see *Netochka Nezvanova* as a timeless model in depicting codependency in the world of the twenty first century as it did in St Petersburg in 1849 Marullo's original work will appeal to scholars and students of Russian and comparative fiction to doctors psychologists and therapists to laymen and women interested in relationship addiction and finally to codependents and relationship addicts of all types

Psychodynamic Psychopharmacology David Mintz, M.D., 2022-02-10 The troubling increase in treatment resistance in psychiatry has many culprits the rise of biomedical psychiatry and corresponding sidelining of psychodynamic and psychosocial factors the increased emphasis on treating the symptoms rather than the person and a greater focus on the electronic medical record rather than the patient all of which point to a breakdown in the person centered prescriber patient relationship Psychodynamic Psychopharmacology illuminates a new path forward It examines the psychological and interpersonal mechanisms of pharmacological treatment resistance integrating research on evidence based prescribing processes with psychodynamic insights and skills to enhance treatment outcomes for patients who are difficult to treat The first part of the book explores the evidence base that guides how rather than simply what to prescribe It describes precisely what psychodynamic psychopharmacology is and why its emphasis on combining the often neglected psychosocial aspects of medication with biomedical considerations provides a more optimized approach to addressing treatment resistance Part II delves into the psychodynamics that contribute to pharmacological treatment resistance both when patients ambivalence about their illness the medication itself or their prescriber manifests in nonadherence and when medications support a negative identity or are used as replacements for healthy capacities Readers will gain basic skills for addressing the psychological and interpersonal dynamics that underpin both scenarios and will be better positioned to ameliorate interferences with the healthy use of medications The final section of the book offers detailed technical recommendations for addressing pharmacological treatment resistance It tackles issues that include countertransference driven irrational prescribing primitive dynamics such as splitting and projective identification and the overlap between psychopharmacological treatment resistance and the dynamics of treatment nonadherence and nonresponse in integrated

and collaborative medical care settings By putting the individual patient back at the center of the therapeutic equation psychodynamic psychopharmacology as outlined in this book offers a model that moves beyond compliance and emphasizes instead the alliance between patient and prescriber In doing so it empowers patients to become more active contributors in their own recovery

The Parables of Jesus Richard Q. Ford, In this startling new way to read the parables Ford unlocks seven of the longer parables attributed to Jesus He focuses on the two major characters in each parable who are separated by social inequality and he entirely bypasses the common approach that assumes that the superior character represents God and the subordinate character the Christian believer Drawing on his own therapeutic training Ford offers unique insight into the psychodynamics at work in the parables He proposes that the two characters are equally balanced in their multiple misperceptions of each other and shows how Jesus stories invite listeners to advert to issues of conflict and power and to struggle toward reconciliation
