Lost Railways of the World Nigel

Welbourn,2023-02-16 Many readers will be familiar with Nigel Welbourn's long running series of books covering lost railways in Britain and Ireland. This new book *Lost Railways of the World* is the latest by this author on the subject of disused railways. The material for this volume has been collected and researched over a period of almost fifty years of world travel by the author. Informative text records the fortunes of the world's lost railways and every country with significant disused railways is included. Lost railways are a unifying theme being found throughout the world from the hottest African desert to the coldest steppes of Russia. The book has a surprisingly British flavor as historically many railways throughout the world used British equipment and operating practices. On his first trip in the 1970s the author discovered British signaling equipment in Europe. In 2020 he discovered the same firm's equipment in South America. The world's top ten lost lines are listed from the seven mile long sea bridge on a line that ran through the Florida Keys to the rugged mountain splendor of the Khyber Pass Railway. Some of the oldest largest longest most northerly southerly expensive crookedest steepest highest lowest and most notorious lost railways are included. Quirky and other unique tales from lost railways are included such as the disappearing phantom bridge a line destroyed by molten lava to one that sank under the sea another that conveyed giant turtles to a memorial to a brave railway elephant. The author also visited remote areas of Argentina and provides more information on the mysterious disappearance of the ex Lynton Barnstaple Railway locomotive Lew. A large number of the 300 color illustrations have not been published before maps and stories from around the world will delight not only the railway enthusiast but appeal to a wider cadre of readers with an interest in nostalgia history geography and travel. To some the book will be an informative source of information to others it is written in a way that highlights the most amazing lost railways in the world but either way it is a fascinating and unique book.

Lost Lines Tom Ferris,2020-07-05 Take a nostalgic steam powered journey back in time on the long closed line between Aberystwyth and Carmarthen. Built by the ill fated Manchester and Milford Railway the fact that it didn't go to either only adds to the romance of this once popular route which fell victim to the Beeching cuts of the 1960s. Includes an essay on the history of the line and photographs of its locomotives trains and stations.
