*Love* Anthony Walsh, 2017-07-05 Love is a little word with a universe of meanings and has engaged people's interest throughout human history. The need to give and receive love lies deep within human nature. Philosophers, poets, theologians, sociologists, and scientists have all attempted to explain its exact origin, but is it an evolutionary adaptation or a social construct? Walsh discusses that the nature of and need for love has biological origins. He draws upon Darwin's sexual selection theory to define the perceptions of love by infants through the process of experience-dependent brain wiring. He observes that mother love makes a child capable of loving and that father love makes a child feel worthy of love. He appraises the origin and purpose of romantic love in his discussions on sexual reproduction by looking at chemical and neurological responses to love and the influence of love on one's physical and mental health. With frequent quotes from literary masters like Shakespeare to orient one's scientific and humanistic understanding of love, Walsh goes on to explore various styles of romantic love, including monogamy, promiscuity, bartering love, and betrayed love, the effects of a skewed sex ratio on dating and mating practices, and the age-old quest for a perfect society populated by perfect people obeying the biblical command to love one another.

**Lovelaw** Anthony W. Clare, 1986 **The Subtlety of Emotions** Aaron Ben-Ze'Ev, 2001-08-24 An informal yet rigorous exploration of human emotions in all their complexity and subtlety. Why do we cry at the movies? What is the best way to manage destructive feelings such as jealousy? Although emotions pervade our lives, their nature, causes, and effects have only recently been studied by social scientists and philosophers. Despite growing scientific interest in the subject, empirical findings have not yet caught up with our intuitive knowledge. In this book, Aaron Ben-Ze'ev carries out what he calls a careful search for general patterns in the primeval jungle of emotions. In an engaging informal style, he draws on a variety of theoretical approaches and popular sources to produce a coherent account of emotions in all their subtlety. All of the ideas are illustrated with examples drawn from everyday life. The book is organized into two parts. The first presents an overall conceptual framework for understanding emotions. It looks at the typical characteristics and components of emotions, distinguishes emotions from other affective phenomena, classifies the emotions, and covers such related issues as emotional intelligence, regulating emotions, and emotions and morality. The second part discusses individual emotions, including envy, jealousy, pleasure in others, misfortune, pity, compassion, anger, hate, disgust, love, sexual desire, happiness, sadness, pride, regret, and shame. The text is laced with insightful and often amusing quotations from sources ranging from Mae West to Montesquieu.
