Video-to-Video Face Recognition for Low-Quality Surveillance Data Herrmann, Christian, 2018-08-03 The availability of video data is an opportunity and a challenge for law enforcement agencies Face recognition methods can play a key role in the automated search for persons in the data This work targets efficient representations of low quality face sequences to enable fast and accurate face search Novel concepts for multi scale analysis dataset augmentation CNN loss function and sequence description lead to improvements over state of the art methods on surveillance video footage

Video Search and Mining Dan Schonfeld, Caifeng Shan, Dacheng Tao, Liang Wang, 2010-04-20 As cameras become more pervasive in our daily life vast amounts of video data are generated The popularity of YouTube and similar websites such as Tudou and Youku provides strong evidence for the increasing role of video in society One of the main challenges confronting us in the era of information technology is to effectively rely on the huge and rapidly growing video data accumulating in large multimedia archives Innovative video processing and analysis techniques will play an increasingly important role in resolving the difficult task of video search and retrieval A wide range of video based applications have benefited from advances in video search and mining including multimedia information management human computer interaction security and surveillance copyright protection and personal entertainment to name a few This book provides an overview of emerging new approaches to video search and mining based on promising methods being developed in the computer vision and image analysis community Video search and mining is a rapidly evolving discipline whose aim is to capture interesting patterns in video data It has become one of the core areas in the data mining research community In comparison to other types of data mining e.g. text video mining is still in its infancy Many challenging research problems are facing video mining researchers

Low-Budget Video Editing: Unleash Your Creativity with Ease Pasquale De Marco, 2025-04-08 In a world where visual storytelling reigns supreme Low Budget Video Editing Unleash Your Creativity with Ease emerges as your ultimate guide to captivating video editing This comprehensive resource empowers you to transform raw footage into compelling narratives engaging tutorials and stunning cinematic experiences With Low Budget Video Editing Unleash Your Creativity with Ease as your creative companion you will embark on a journey through the art of video editing mastering essential techniques and discovering innovative approaches Delve into the intricacies of the editing timeline learn to manipulate clips with precision and apply an array of filters and transitions to enhance your videos Explore the transformative power of color correction and grading bringing your visuals to life with vibrant hues and cinematic effects As you progress through this comprehensive guide you will uncover the secrets of crafting engaging video content Learn to structure compelling narratives capture captivating footage and conduct effective interviews that draw your audience into your stories Discover the art of incorporating B roll and establishing shots to set the scene and leverage the emotional impact of music and sound effects to elevate your videos Low Budget Video Editing Unleash Your Creativity with Ease goes beyond technical instruction inspiring

you to think creatively and push the boundaries of video editing Through practical exercises and real world examples you ll gain the confidence to tackle any video project from creating marketing videos and tutorials to producing short films and documentaries Whether you re a seasoned professional or just starting your video editing journey this book is your ultimate companion With *Low Budget Video Editing Unleash Your Creativity with Ease* in hand you ll unlock the full potential of video editing transforming your creative vision into captivating realities Get ready to embark on an exciting adventure where your videos will leave a lasting impact on your audience If you like this book write a review

A Text-Book of Low Complexity Restoration Algorithms for Video Images Dr.Shylaja S.L. Dr.Vinayadatt V. Kohir, *Robust Subspace Estimation Using Low-Rank Optimization* Omar Oreifej,Mubarak Shah,2014-03-24 Various fundamental applications in computer vision and machine learning require finding the basis of a certain subspace Examples of such applications include face detection motion estimation and activity recognition An increasing interest has been recently placed on this area as a result of significant advances in the mathematics of matrix rank optimization Interestingly robust subspace estimation can be posed as a low rank optimization problem which can be solved efficiently using techniques such as the method of Augmented Lagrange Multiplier In this book the authors discuss fundamental formulations and extensions for low rank optimization based subspace estimation and representation By minimizing the rank of the matrix containing observations drawn from images the authors demonstrate how to solve four fundamental computer vision problems including video denosing background subtraction motion estimation and activity recognition

Real-Time Heterogeneous Video Transcoding for Low-Power Applications Tarek Elarabi,Ahmed Abdelgawad,Magdy Bayoumi,2014-04-09 This book introduces a novel transcoding algorithm for real time video applications designed to overcome inter operability problems between MPEG 2 to H 264 AVC The new algorithm achieves 92.8% reduction in the transcoding run time at a price of an acceptable Peak Signal to Noise Ratio PSNR degradation enabling readers to use it for real time video applications The algorithm described is evaluated through simulation and experimental results In addition the authors present a hardware implementation of the new algorithm using Field Programmable Gate Array FPGA and Application specific standard products ASIC Describes a novel transcoding algorithm for real time video applications designed to overcome inter operability problems between H 264 AVC to MPEG 2 Implements algorithm presented using Field Programmable Gate Array FPGA and Application specific Integrated Circuit ASIC Demonstrates the solution to real problems with verification through simulation and experimental results

Low-latency and Robust Peer-to-peer Video Streaming JeongHun Noh,2010 Peer to peer P2P systems have emerged as a promising and cost effective transport solution for streaming video to a group of users in the Internet In the P2P architecture users not only consume video but also forward it to other users Thus P2P systems scale better than client server systems as users bring resources to the system The challenge is to achieve low latency and robust video dissemination by overcoming a number of adversarial aspects and challenges peer dynamics heterogeneous uplink bandwidth of peers heterogeneous

hardware and capabilities of peers and peer wise connection restrictions due to NATs firewalls This dissertation presents Stanford Peer to Peer Multicast SPPM a P2P video streaming system SPPM is designed to achieve low latency and robust streaming by constructing an overlay of multiple complementary trees and dynamically rearranging the position of peers by Active Overlay Management in a distributed fashion Next we extend SPPM for providing playback control to users by time shifted streaming To perform time shifted streaming peers store past portions of video and forward them to other users when requested thereby reducing server load To further alleviate server load we propose fast prefetching by which peers can disseminate content quickly Finally we present a way to accommodate mobile users Video transcoding is often required to adapt video for the mobile users We propose interleaved distributed transcoding IDT which allows a video stream to be transcoded at multiple peers that are more capable than mobile users IDT is shown not only to reduce computation required at a peer but also to achieve higher error resilience in case of peer failure or packet loss

Next-Generation Video Coding and Streaming Benny Bing, 2015-10-01 Reviews the new High Efficiency Video Coding HEVC standard and advancements in adaptive streaming technologies for use in broadband networks and the Internet This book describes next generation video coding and streaming technologies with a comparative assessment of the strengths and weaknesses Specific emphasis is placed on the H 265 HEVC video coding standard and adaptive bit rate video streaming In addition to evaluating the impact of different types of video content and powerful feature sets on HEVC coding efficiency the text provides an in depth study on the practical performance of popular adaptive streaming platforms and useful tips for streaming optimization Readers will learn of new over the top OTT online TV advancements the direction of the broadband telecommunications industry and the latest developments that will help keep implementation costs down and maximize return on infrastructure investment Reviews the emerging High Efficiency Video Coding HEVC standard and compares its coding performance with the MPEG 4 Advanced Video Coding AVC and MPEG 2 standards Provides invaluable insights into the intra and inter coding efficiencies of HEVC such as the impact of hierarchical block partitioning and new prediction modes Evaluates the performance of the Apple and Microsoft adaptive streaming platforms and presents innovative techniques related to aggregate stream bandwidth prediction duplicate chunk Includes end of chapter homework problems and access to instructor slides Next Generation Video Coding and Streaming is written for students researchers and industry professionals working in the field of video communications Benny Bing has worked in academia for over 20 years He has published over 80 research papers and 12 books and has 6 video patents licensed to industry He has served as a technical editor for several IEEE journals and an IEEE Communications Society Distinguished lecturer He also received the National Association of Broadcasters NAB Technology Innovation Award for demonstrations of advanced media technologies Video in the Age of Digital Learning Jonas Köster, 2018-08-28 Although video is now ubiquitous in education its full potential is oftentimes not fully understood nor is it used to utmost potential This timely volume seeks to address this gap by providing

educators and instructional designers with a comprehensive and in depth understanding of video production processes and methods for designing effective instructional videos From its discussion of the significance of digital learning and impact of instructional video to its unique focus on the best design and production techniques that make video an effective teaching tool this book offers applicable and tested strategies for creating quality instructional video The accompanying website which allows readers to see sample videos and access additional online resources underscores the book s practitioner focus Among the topics covered Instructional videos for teaching and learning Design and interactivity of instructional videos Production distribution and integration of instructional videos The future of instructional video Video in the Age of Digital Learning is an important practical contribution to the scholarship exploring methods for sharing and acquiring knowledge in the digital age It promises to be a valuable resource for educators instructional designers instructional media producers and educational technology professionals
