Channel *Not Here, Not There, Not Anywhere* Daniel J. Sherman, 2012-06-25 In 1979 provoked by the Three Mile Island nuclear accident governors of states hosting disposal facilities for low level radioactive waste LLRW refused to accept additional shipments The resulting shortage of disposal sites for wastes spurred Congress to devolve responsibility for establishing new geographically diffuse LLRW disposal sites to states and regional compacts with siting authorities often employing socio economic and political data to target communities that would give little resistance to their plans The communities however were far from compliant organizing nearly 1000 opposition events that ended up blocking the implementation of any new disposal sites Sherman provides comprehensive coverage of this opposition testing hypotheses regarding movement mobilization and opposition strategy by analyzing the frequency and disruptive qualities of activism In the process he bridges applied policy questions about hazardous waste disposal with broader questions about the dynamics of social movements and the intergovernmental politics of policy implementation The issues raised in this book are sure to be renewed as interest grows in nuclear power and the disposal of the resulting waste remains uncertain *The Economics of Waste* Richard C. Porter, 2010-09-30 In this concise engaging and provocative work Richard Porter introduces readers to the economic tools that can be applied to problems involved in handling a diverse range of waste products from business and households Emphasizing the impossibility of achieving a zero risk environment Porter focuses on the choices that apply in real world decisions about waste Acknowledging that effective waste policy integrates knowledge from several disciplines Porter focuses on the use of economic analysis to reveal the costs of different policies and therefore how much can be done to meet goals to protect human health and the environment With abundant examples he considers subjects such as landfills incineration and illegal disposal He discusses the international trade in waste the costs and benefits of recycling and special topics such as hazardous materials Superfund and nuclear waste While making clear his belief that not every form of waste presents the same amount of risk Porter stresses the need for open minded approaches to developing new policies For students policymakers and general readers he provides insight and accessibility to a subject that others might leave out of sight out of mind or buried under an impenetrable prose of statistics and jargon Energy and Water Development Appropriations for Fiscal Year 2003 United States.
