Lower Moments In Higher Education:

Lower Moments in Higher Education Otto Frank Bauer, 1997-07-01 **Working-class Minority Students' Routes to Higher Education** Roberta Espinoza, 2012 While stories of working class and minority students overcoming obstacles to attend and graduate from college tend to emphasize the individualistic and meritocratic aspect this text examines the social relations that often underpin such successes

Recognizing and Serving Low-Income Students in Higher Education Adrianna Kezar, 2010-09-13 Written for administrators faculty and staff in Higher Education who are working with low income and first generation college students Recognizing and Serving Low Income Students in Higher Education uncovers organizational biases that prevent post secondary institutions from adequately serving these students This volume offers practical guidance for adopting new or revised policies and practices that have the potential to help these students thrive This contributed volume is based on empirical studies that specifically examine the policies and practices of postsecondary institutions in the United States England and Canada The contributing authors argue that discussions of diversity will be enriched by a better understanding of how institutional policies and practices affect low income students Unlike most studies on this topic this volume focuses on institutional rather than federal state and public policy Institutional policies and practices have been largely ignored and this volume lifts the veil on processes that have remained hidden

Students, Staff and Academic Mobility in Higher Education Mike Byram, 2009-03-26 Academic mobility in higher education is an old phenomenon but it has become a high profile issue as the numbers of students and staff engaged and the number of countries involved has increased hugely in the last few decades For this reason and many others political cultural and educational this book reports research on the many facets of the experience and people involved both now and in the past The emphasis in research has so far tended to focus on contemporary student mobility but this collection deliberately includes articles on mobile staff because the question of mobility is a matter for universities and higher education in its entirety and not just a matter of bringing new students into existing and unchanging lectures laboratories and seminars Despite the fact that universities are and have been international institutions in their composition from the beginning universities became in the 19th and 20th century de facto national institutions This has changed and continues to change in the 21st century for many reasons but often financial as universities seek to enhance their budgets in a globalised economy and students seek to enhance their employment chances by acquiring qualifications with a difference However even if the starting point is financial nonetheless the chapters in this book demonstrate that the effects of mobility are much more far reaching The effects are on host universities on the university community of staff and students on the ways in which staff and students understand the nature of university study on the ways students may or may not integrate with a local community By experiencing something different for institutions an influx of students with different ideas about academic study for students an interaction with locals and with other internationals for staff a challenge to their assumptions about teaching and learning

all see themselves in a new light and are often forced to change This book charts the changes which are happening now and will undoubtedly continue for the foreseeable future It therefore offers all involved a reflection on their own experience and practice and the means of improving them

[A History of American Higher Education](#) John R. Thelin, 2019-04-02 The definitive history of American higher education now up to date Colleges and universities are among the most cherished and controversial institutions in the United States In this updated edition of A History of American Higher Education John R Thelin offers welcome perspective on the triumphs and crises of this highly influential sector in American life Exploring American higher education from its founding in the seventeenth century to its struggle to innovate and adapt in the first decades of the twenty first century Thelin demonstrates that the experience of going to college has been central to American life for generations of students and their families Drawing from archival research along with the pioneering scholarship of leading historians Thelin raises profound questions about what colleges are and what they should be Covering issues of social class race gender and ethnicity in each era and chapter this new edition showcases a fresh concluding chapter that focuses on both the opportunities and problems American higher education has faced since 2010 The essay on sources has been revised to incorporate books and articles published over the past decade The book also updates the discussion of perennial hot button issues such as big time sports programs online learning the debt crisis the adjunct crisis and the return of the culture wars and addresses current areas of contention including the changing role of governing boards and the financial challenges posed by the economic downturn Anyone

studying the history of this institution in America must read Thelin's classic text which has distinguished itself as the most wide ranging and engaging account of the origins and evolution of America's institutions of higher learning **Nebraska Trivia** ,1998-04-12 Discover fascinating facts about Cornhusker State history sports geography and more with this volume of curious questions and authoritative answers Nebraska Trivia is the ultimate resource on the who what when where and how of the great state of Nebraska Filled with interesting questions and answers about well known and not so well known facts of this colorful historic state Nebraska Trivia will provide hours of entertainment and education Easily adaptable for use with trivia format games it focuses on the history culture people and places of Indiana *Campus Sexual Assault* Evan Gerstmann,2019 Demonstrates how colleges routinely deny students fair hearings in sexual assault cases and define sexual assault in an unconstitutionally broad manner *The Working Classes and Higher Education* Amy E. Stich,Carrie Freie,2015-12-22 Within the broader context of the global knowledge economy wherein the college for all discourse grows more and more pervasive and systems of higher education become increasingly stratified by social class important and timely questions emerge regarding the future social location and mobility of the working classes Though the working classes look very different from the working classes of previous generations the weight of a universal working class identity background amounts to much of the same economic vulnerability and negative cultural stereotypes all of which continue to present obstacles for new generations of working class youth many of whom pursue higher education as a necessity rather than a choice Using a sociological lens contributors examine the complicated relationship between the working classes and higher education through students' distinct experiences challenges and triumphs during three moments on a transitional continuum the transition from secondary to higher education experiences within higher education and the transition from higher education to the workforce In doing so this volume challenges the popular notion of higher education as a means to equality of opportunity and social mobility for working class students *Unequal Choices* Yang Va Lor,2023-03-17 High achieving students from socioeconomically disadvantaged backgrounds are more likely to end up at less selective institutions compared to their socioeconomically advantaged peers with similar academic qualifications A key reason for this is that few highly able socioeconomically disadvantaged students apply to selective institutions in the first place In *Unequal Choices* Yang Va Lor examines the college application choices of high achieving students looking closely at the ways the larger contexts of family school and community influence their decisions For students today contexts like high schools and college preparation programs shape the type of colleges that they deem appropriate while family upbringing and personal experiences influence how far from home students imagine they can apply to college Additionally several mechanisms reinforce the reproduction of social inequality showing how institutions and families of the middle and upper middle class work to procure advantages by cultivating dispositions among their children for specific types of higher education opportunities **Exploring Consensual Leadership in Higher Education** Lynne Gornall,Brychan Thomas,Lucy Sweetman,2018-07-26 Exploring Consensual

Leadership in Higher Education explores the idea that the nature of academic work is both creative and consensual Higher education relationships whether between managers staff learners or the public sphere are at their most effective when rooted in partnership teamwork collaboration and collegiality The term consensual is used because it situates new leadership models as structures based on consent reflecting tacit traditions in education alongside ideas of leadership in other settings including emerging industries The aim is to celebrate achievements encourage engagement opportunities and add to the problem solving knowledge base However issues and problems in participatory engagement are also considered and the borderlines between consensus collective assent and agreement and dissensus widespread serious disagreement are examined critically The contributors offer a range of alternative perspectives on leadership reflecting the diverse forms and ways of working practised in different national higher educational contexts and cultural settings The volume incorporates a variety of approaches and points of view including stories of leadership and change innovation projects and case studies key interviews and insights and collective team writing

The Moment of Complexity Mark C. Taylor, 2003-09 We live in a moment of unprecedented complexity an era in which change occurs faster than our ability to comprehend it With *The Moment of Complexity* Mark C Taylor offers a map for the unfamiliar terrain opening in our midst unfolding an original philosophy of our time through a remarkable synthesis of science and culture According to Taylor complexity is not just a breakthrough scientific concept but the defining quality of the post Cold War era The flux of digital currents swirling around us he argues has created a new network culture with its own distinctive logic and dynamic

Enhancing Teaching and Learning Through Collaborative Structures Jeffrey L. Bernstein, Brooke A. Flinders, 2017-01-12 In this volume the authors contend that teaching and learning must be viewed as communal work whether conducted in one classroom with colleagues at a programmatic level or when tackled on a university wide scale When educators partner with faculty colleagues or students in teaching and learning it becomes possible to improve the educational experiences of all students model professional behaviors that students will soon be expected to embrace and positively impact graduates peers campuses and even communities at large By intentionally creating collaborative structures for communal work to occur educators can broaden access to opportunities for students improve engagement experiences within the community and improve faculty

support and scholarship Exploring multiple perspectives on collaborative structures in teaching and learning this volume discusses ways to consider the collaborative structures within education that allow for shared contributions to teaching and learning It discusses the need for practitioners to view teaching and learning as truly communal work regardless of the type of setting This is the 148th volume of this Jossey Bass higher education series It offers a comprehensive range of ideas and techniques for improving college teaching based on the experience of seasoned instructors and the latest findings of educational and psychological researchers

A Moment of Equality for Latin America? Prof Dr Barbara Fritz, Professor Lena Lavinas, 2015-10-28 Unlike other regions around the world several Latin American countries have managed to reduce income inequality over the last decade Higher growth rates and growing employment but also innovative wage policies and social programs have contributed to reducing poverty and narrow income disparities Yet despite this progress nation states in the region demonstrate little capacity to substantially change their patterns of deeply rooted inequalities Focusing on the limits and challenges of redistributive policies in Latin America this volume synthesizes and updates the discussion of inequality in the region introducing the perspective of global and transnational interdependencies The book explores the extent to which redistributive policies have been interlinked with the provision and quality of public goods as well as with structural changes of the productive sector Inspired by structuralist and neostructuralist thinking of Latin American economists such as Raúl Prebisch and Celso Furtado authors question the redistributive impact of the interplay of recent macroeconomic fiscal and social policies particularly under left and center left administrations committed to greater equality Bringing together experts in social fiscal and macroeconomic policies to investigate the interdependent and global character of inequalities this book will appeal to scholars of sociology economics development and politics with interests in Latin America inequality and public policy

Speaking of Universities Stefan Collini, 2017-02-07 In recent decades there has been an immense global surge in the numbers both of universities and of students In the UK alone there are now over 140 institutions teaching more subjects than ever to nearly 2.5 million students New technology offers new ways of learning and teaching Globalisation forces institutions to consider a new economic horizon At the same time governments have systematically imposed new procedures regulating funding governance and assessment Universities are being forced to behave more like business enterprises in a commercial marketplace than centres of learning In *Speaking of Universities* historian and critic Stefan Collini analyses these changes and challenges the assumptions of policy makers and commentators Does marketisation threaten to destroy what we most value about education does this new era of accountability distort what it purports to measure and who does the modern university belong to Responding to recent policies and their underlying ideology the book is a call to focus on what is actually happening and the clichés behind which it hides an incitement to think again think more clearly and then to press for something better

More than a Moment Steven D. Krause, 2020-01-02 As recently as 2012 massive open online courses MOOCs looked poised to revolutionize higher education but in just a few years their flaws and problems have made them into a less relevant model In *More than a Moment* Steven D. Krause explores MOOCs and their continuing impact on distance learning in higher education putting them in the context of technical innovations that have come before and those that will be part of the educational future Krause writes about his own experiences as a participant in several MOOCs and the experiences of faculty who developed and taught MOOCs Contrary to many early claims from educational entrepreneurs they were never entirely new and MOOCs and their aftermath are still at the heart of the tensions between nonprofit universities and for-profit entities particularly online program management firms in delivering distance education While MOOCs are no longer a threat to education in the United States they are part of the ongoing corporatization of education and remain part of conversations about experienced-based credit corporate training and open education Presenting historical student teacher and administrative perspectives *More than a Moment* is a well-rounded treatment that will be of interest to academics and entrepreneurs interested in distance education online pedagogy online program management and public-private partnerships in higher education

Decline and Revival in Higher Education Herbert I. London, 2018-02-06 This is an analysis of higher education in the past half century a period of dramatic change and democratization But it is more than that The author has been a participant in the struggle to stem the decline in higher education as it moved from an emphasis on classical liberal values toward relativism and ideological extremism This volume reflects an awareness of what has been lost but sees hope for a revival of traditional values as technological change and awareness of failure forces institutions to examine their premise Herbert I. London has provided here fuel for fundamental redirection in American college and university affairs *Decline and Revival in Higher Education* is uncompromising in its concerns but points the way toward a

future linked to the best of the past The work follows the personal evolution of the author while at the same time describes the devolution of university standards in such institutions as Columbia Duke the University of California at Berkeley and New York University While seeing optimistic trends in oases of traditional programming that can serve as a counterweight to campus orthodoxies London argues that the dramatic transformation of the academy cannot be denied The social sciences and humanities in particular have become isolated from mainstream requirements in the nation London deals with concrete concerns such as the collapse of classic book programs in the contemporary curriculum the decline and even vigilante raids on opposition in campus publications the collapse of moral judgment in favor of pure relativism the transformation of many museums into a storage houses of debris and the confusion of coarse language with democratization These developments lead the author to write this book for if the culture wars are over the American people may be the losers *Government reform of higher education* Great Britain: Parliament: House of Commons: Business, Innovation and Skills Committee, Adrian Bailey, 2011-11-10 This report concludes that the Government's communications strategy on tuition fees could have been more effectively realised It urges the government to reconsider funding widening participation in higher education through a programme similar to the pupil premium The committee also concluded that focusing financial support on providing money for living costs to students while they are studying would be a more effective means of support than fee waivers and would be more consistent with the message that students should not be dissuaded from applying to university because of the cost and recommends that the National Scholarship Programme be refocused accordingly Furthermore reforms are not yet complete with a number of consultation exercises currently out for responses including early repayment penalties for loans the future of student number controls loans for students studying at alternative providers off quota students and a new regulatory framework for new and alternative providers The detail to be required in the Key Information Sets has yet to be finalised There will also need to be changes to both OFFA and HEFCE to reflect their changing responsibilities in higher education The committee highlights the fact that the new fee regime is to start at the beginning of the next academic year and there is concern that the necessary coherent package of reforms be delivered to that timetable The report also stresses that the reforms should be implemented as a package and not in a piecemeal way
