Popular Monthly Frank Leslie, 1882 **American Illustrated Magazine**, 1882 **Moonlighting** Nathan Waddell, 2019-06-27 How and why did the life and music of Ludwig van Beethoven 1770 1827 matter to experimental writers in the early twentieth century Previous answers to this question have tended to focus on structural analogies between musical works and literary texts charting the many different ways in which poetry and prose resemble Beethoven s compositions This book takes a different approach It focuses on how early twentieth century writers chief among them E M Forster Aldous Huxley Wyndham Lewis Dorothy Richardson Rebecca West and Virginia Woolf profited from the representational conventions associated in the nineteenth century and beyond with Beethovenian culture The emphasis of Moonlighting falls for the most part on how modernist writers made use of Beethovenian legend It is concerned neither with

formal similarities between Beethoven's music and modernist writing nor with the music of Beethoven per se but with certain ways of understanding Beethoven's music which had long before 1900 taken shape as habit myth cliché and fantasy and with the influence they had on experimental writing up to 1930 Moonlighting suggests that the modernists drew knowingly and creatively on the conventional It proposes that many of the most experimental works of modernist literature were shaped by a knowing reliance on Beethovenian consensus in short that the literary modernists knew Beethovenian legend when they saw it and that they were eager to use it

Why Do People Sing? Paddy Scannell, 2019-07-09 In Why Do People Sing Paddy Scannell explores some of the mysteries at the heart of vocal communication What explains the communicative musicality of the voices between parent and child as a baby learns to talk Can readers of fiction hear the voices of authors and characters within soundless written texts How has radio affected voice talk music and singing and how has it made them public in new ways And by putting the voice into recordings to what extent have broadcasting technologies provided a radically new resource for historians These questions and more are explored in the first three chapters In the final chapter Scannell boldly puts into words the inexpressible experience of listening to singing wherein the glory of the human voice finds its purest expression This highly original book makes a distinctive intervention by stressing the inherently positive qualities of talk rather than language as the basis for communication Concise and beautifully written it is suitable for students and scholars of media communication and other disciplines across the humanities as well as general readers with an interest in this fascinating topic
