**Atlas de procedimientos en neonatología** Mhairi G. MacDonald, Jayashree Ramasethu, 2005.

Principles and Practice of Pediatrics Frank A. Oski, 1990. This monumental comprehensive textbook is edited by Oski, Johns Hopkins; Catherine D. DeAngelis, Johns Hopkins; and Jos Washburn, Yale. It is a worthy challenger to the ascendant Nelson 13th edition and Hoekelman. Some 265 contributors, virtually all associated with a medical school, are included. The organization is unusual: the five parts are general pediatrics, fetus and newborn, ambulatory pediatrics, a brief catchall on lab values, signs and differential diagnosis, and the 99 most common syndromes. Grouped by the demands upon the student or pediatrician in practical, predictable categories, the 800 illustrations are generally only fair, but we easily recognize that they have not been included with the intention of fluffing up the book. An impressive work. Annotation copyrighted by Book News, Inc., Portland, OR.
