Modular Programming Languages Hanspeter Mössenböck, 1997-02-26 This book constitutes the refereed proceedings of the Joint Modular Languages Conference JMLC 97 held in Linz Austria in March 1997 The 24 revised full papers presented were carefully selected from a total of 55 submissions also included are full papers of two invited presentations The book is devoted to languages techniques and tools for the development of modular extensible and type safe software systems Among the programming languages covered are Modula Oberon Ada95 Eiffel Salher Java and others The issues addressed include compiler technology persistence data structures typing distribution active objects real time programming inheritance reflection languages etc **Papers Presented at ACM SIGCSE Second Symposium on Education in Computer Science**, 1972 A Second Course in Computer Science with Modula-2 Daniel D. McCracken, William I. Salmon, 1987 This new text introduces students of computer science to the theory implementation and applications of data structures and algorithms Important features of this book include an abstract data type ADT approach and informally analyzed implementations using the Big Oh notation There is a strong emphasis on program readability a point which is made in the first chapter and reinforced by example throughout Recursion is also stressed and a chapter is devoted to its explanation Clear tables and figures are used throughout the text and there are end of chapter exercises and suggestions for further study **A Second Course in Computer Science with PASCAL** Daniel D. McCracken, 1987-03-10 Focuses on the systematic study of data structures and algorithms Coverage is almost identical to the recommendation of the Koffman Committee report for curriculum revisions for CS2 Using a strong Abstract Data Type ADT approach McCracken explores each topic in theory implementations and applications Also data abstraction modularization and program verification are interwoven throughout the text so that their interrelationships with software engineering are clearly evident Chapters cover the program development process arrays and records sets and strings stacks and queues recursion linked lists trees sorting searching and graphs Text contains chapter introductions and summaries bibliographical notes historical references and footnotes *Hybrid Artificial Intelligent Systems, Part II* Manuel Grana Romay, Alexandre Manhaes Savio, 2010-06-14 th The 5 International Conference on Hybrid Artificial Intelligence Systems HAIS 2010 has become a unique established and broad interdisciplinary forum for researchers and practitioners who are involved in developing and applying symbolic and sub symbolic techniques aimed at the construction of highly robust and reliable problem solving techniques and bringing the

most relevant achievements in this field Overcoming the rigid encasing imposed by the arising orthodoxy in the field of artificial intelligence which has led to the partition of researchers into so called areas or fields interest in hybrid intelligent systems is growing because they give freedom to design innovative solutions to the ever increasing complexities of real world problems Noise and uncertainty call for probabilistic often Bayesian methods while the huge amount of data in some cases asks for fast heuristic in the sense of suboptimal and ad hoc algorithms able to give answers in acceptable time frames High dimensionality demands linear and non linear dimensionality reduction and feature extraction algorithms while the imprecision and vagueness call for fuzzy reasoning and linguistic variable formalization Nothing impedes real life problems to mix difficulties presenting huge quantities of noisy vague and high dimensional data therefore the design of solutions must be able to resort to any tool of the trade to attack the problem Combining diverse paradigms poses challenging problems of computational and methodological interfacing of several previously incompatible approaches This is thus the setting of HAIS conference series and its increasing success is the proof of the vitality of this exciting field

Hybrid Artificial Intelligent Systems, Part II Manuel Graña Romay, Emilio Corchado, M. Teresa Garcia-Sebastian, Alexandre Manhaes Savio, 2010 Annotation This book constitutes the proceedings of the 5th International Conference on Hybrid Artificial Intelligent Systems held in San Sebastian Spain in June 2010
