If in my study of a foreign language I were not pressed by time and if I wanted to have a pleasant and interesting classroom experience, I would gladly sign up for a course following the explorative-creative methodology. If, however, I was concerned with maximum efficiency, I would opt for a different pedagogical treatment relying more on planning and guidance than on exploration and spontaneity.

The British Association for Applied Linguistics (BAAL) runs an annual Book Prize which is awarded to the author of an outstanding book in applied linguistics. This volume was the winner of the 1990 prize, and I thought it would be interesting to use this review not just to talk about Spolsky's book but also to discuss how it is that a book of this sort comes to win a prize.

As literary prizes go, the BAAL prize is relatively small beer—in comparison, say with the Booker prize for fiction or the Pulitzer prize—but many of the problems that beset these bigger prizes also affect the BAAL. My role for five of the last six prizes has been as non-voting chairman of the judging panel, and this has given me a chance to observe how several different panels of judges have come to agreement (or disagreement, as the case fell out). The views expressed here are personal ones and not those of BAAL.

Obviously, the number of books that qualify for the prize in any one year is huge. Applied linguistics is not a simple, unified field, and the entry qualifications are deliberately left vague and unspecified. In practice, books have to pass through a number of hurdles. The first hurdle is that nominations for the prize come from publishers—any publisher can put forward any number of its own books, but in practice most publishers only put forward one or two nominations. This stage usually results in 20 or so nominations, often varying wildly in topic, style and quality.

For the second stage of the judging process, all these volumes are sent to a short-listing panel. These three people are not expected to read all the books in detail, but they eventually produce a list of eight books that they would like to see short-listed. Surprisingly, it is rare for the short-listing panel to be in complete agreement: hardly any book fails to pick up at least one vote at this stage, but it is equally rare that a book is singled out by all the short-listers. We aim to produce a short-list of four or five books, and in practice, we have been able to do this by short-listing any volume chosen by at least two of the short-listing panel.

Some prizes use the same panel of judges for both short-listing and for detailed assessment. We have found that this does not work terribly well. In an extreme case, a judge could end up judging four volumes, none of which appeared on his own personal short-list, and this undesirable state of affairs is clearly one to avoid. BAAL uses three different judges for the final stage of the judging; usually the previous year's prizewinner agrees to sit on the panel, and some attempt is made to provide for continuity among the judges so as to avoid wild changes of
