A Philosophy of Second Language Acquisition Marysia

Johnson, 2008-10-01 How does a person learn a second language In this provocative book Marysia Johnson proposes a new model of second language acquisition SLA a model that shifts the focus from language competence the ability to pass a language exam to language performance using language competently in real life contexts Johnson argues that current SLA theory and research is heavily biased in the direction of the cognitive and experimental scientific tradition She shows that most models of SLA are linear in nature and subscribe to the conduit metaphor of knowledge transfer the speaker encodes a message the hearer decodes the sent message Such models establish a strict demarcation between learners mental and social processes Yet the origin of second language acquisition is located not exclusively in the learner's mind but also in a dialogical interaction conducted in a variety of sociocultural and institutional settings says the author Drawing on Vygotsky's sociocultural theory and Bakhtin's literary theory she constructs an alternative framework for second language theory research teaching and testing This approach directs attention toward the investigation of dynamic and dialectical relationships between the interpersonal social plane and the intrapersonal individual plane Johnson's model shifts the focus of SLA away from a narrow emphasis on language competence toward a broader view that encompasses the interaction between language competence and performance Original and controversial *A Philosophy of Second Language Acquisition* offers an introduction to Vygotsky's sociocultural theory and Bakhtin's literary theory both of which support an alternative framework for second language acquisition an examination of the existing cognitive bias in SLA theory and research a radically new model of second language acquisition

The Age Factor in Second Language Acquisition David Michael Singleton, Zolt Lengyel, 1995-01-01 This book takes a hard look at some of the assumptions that are customarily made concerning the role of age in second language acquisition The evidence and arguments the contributors present run counter to the notion that an early start in second language learning is of itself either absolutely sufficient or necessary for the attainment of native like mastery of a second language Another theme of the book is a doubt that there is a particular stage of maturity beyond which language learning is no longer fully possible In short the book presents a challenge to those who take it as given that second language learning is inevitably different in its essential nature from language acquisition in the childhood years and that second language knowledge acquired beyond the critical period is

in all circumstances and in all respects doomed to fossilize at a non native like level Second Language Acquisition Myths Steven Brown, Jenifer Larson-Hall, 2012-03-15 This volume was conceived as a first book in SLA for advanced undergraduate or introductory master s courses that include education majors foreign language education majors and English majors It is also an excellent resource for practicing teachers Both the research and pedagogy in this book are based on the newest research in the field of second language acquisition It is not the goal of this book to address every SLA theory or teach research methodology It does however address the myths and questions that non specialist teacher candidates have about language learning Steven Brown is the co author of the introductory applied linguistics textbook *Understanding Language Structure Interaction and Variation* textbook and workbook The myths challenged in this book are Children learn languages quickly and easily while adults are ineffective in comparison A true bilingual is someone who speaks two languages perfectly You can acquire a language simply through listening or reading Practice makes perfect Language students learn and retain what they are taught Language learners always benefit from correction Individual differences are a major perhaps the major factor in SLA Language acquisition is the individual acquisition of grammar *The Routledge Handbook of Second Language Acquisition and Language Testing* Paula Winke, Tineke Brunfaut, 2020-12-28 This Handbook with 45 chapters written by the world s leading scholars in second language acquisition SLA and language testing dives into the important interface between SLA and language testing shared ground where researchers seek to measure second language performance to better understand how people learn their second languages The Handbook also reviews how to best measure and evaluate the second language L2 learners personal characteristics backgrounds and learning contexts to better understand their L2 learning trajectories Taking a transdisciplinary approach to research the book builds upon recent theorizing and measurement principles from the fields of applied linguistics cognitive science psychology psycholinguistics psychometrics educational measurement and social psychology The Handbook is divided into six key sections 1 Assessment concepts for SLA researchers 2 Building instruments for SLA research 3 Measuring individual differences 4 Measuring language development 5 Testing specific populations and 6 Measurement principles for SLA researchers Motivation and Second Language Acquisition Zoltán Dörnyei, Richard Schmidt, Richard W.
