Grace Stevens Wright,1952 Research in Education ,1974 **School & Society** James McKeen Cattell,Raymond
Walters,Will Carson Ryan,1915 **The Pedagogy of Secondary-School Mathematics** Shizao Zhang,2023-07-31 This book
elucidates the principal aspects and characteristics of secondary school mathematics teaching and learning in China It
combines the cultivation of students mathematical abilities with the improvement of teaching skills and explores from both
theory and practice to create mathematical pedagogy which has been widely recognized by experts in this field This book
presents a number of mathematics teaching principles and methods and has been used as an important resource book for
mathematics teachers education Practical Theorising in Teacher Education Katharine Burn,Trevor Mutton,Ian
Thompson,2022-07-28 This insightful collection offers a timely contribution to the body of research on practical theorising in
teacher education Acknowledging the importance of experience and reflective practice in teaching this book simultaneously
embraces the essential need for teachers at all career stages to engage effectively and critically with evidence from research
Drawing together a range of perspectives from university based and school based teacher educators this book examines the
challenges and critiques advanced when practical theorising was first proposed as well as recent tensions created by the
performative culture that now pervades education It illustrates the constant renegotiation and renewal necessary to sustain
such an approach to beginners learning investigating a range of tools developed by teacher educators to help beginning
teachers navigate these demands Demonstrating the value of practical theorising and therefore promoting powerful
professional learning for practitioners this book is essential for teachers at all career stages including trainee teachers and
student teachers Samuel Pepys, Isaac Newton, James Hodgson, and the Beginnings of Secondary School Mathematics
Nerida F. Ellerton,M. A. (Ken) Clements,2017-03-02 This book tells one of the greatest stories in the history of school
mathematics Two of the names in the title Samuel Pepys and Isaac Newton need no introduction and this book draws
attention to their special contributions to the history of school mathematics According to Ellerton and Clements during the
last quarter of the seventeenth century Pepys and Newton were key players in defining what school mathematics beyond
arithmetic and elementary geometry might look like The scene at which most of the action occurred was Christ s Hospital
which was a school ostensibly for the poor in central London The Royal Mathematical School RMS was established at Christ s
Hospital in 1673 It was the less well known James Hodgson a fine mathematician and RMS master between 1709 and 1755
who demonstrated that topics such as logarithms plane and spherical trigonometry and the application of these to navigation
might systematically and successfully be taught to 12 to 16 year old school children From a wider history of school education
perspective this book tells how the world s first secondary school mathematics program was created and how slowly but
surely what was being achieved at RMS began to influence school mathematics in other parts of Great Britain Europe and
America The book has been written from the perspective of the history of school mathematics Ellerton and Clements s

analyses of pertinent literature and of archival data and their interpretations of those analyses have led them to conclude that RMS was the first major school in the world to teach mathematics beyond arithmetic on a systematic basis to students aged between 12 and 16 Throughout the book Ellerton and Clements examine issues through the lens of a long time theoretical perspective From a historiographical perspective this book emphasizes how the history of RMS can be portrayed in very different ways depending on the vantage point from which the history is written The authors write from the vantage point of international developments in school mathematics education and therefore their history of RMS differs from all other histories of RMS most of which were written from the perspective of the history of Christ s Hospital *Current Index to Journals in Education* ,1996
