Secret Fallout Ernest J. Sternglass,1981      **Low-Level Radiation and Immune System Damage** Joseph J. Mangano,2018-01-31 Atomic weapons and nuclear power plants they promised to ensure world peace and provide efficient energy to Americans during the 1940s and 1950s Meanwhile the post war prosperity led to the most dramatic population explosion ever witnessed in the United States the baby boomer generation Times and politics may change but many baby boomers as well as their descendants now live with an unforeseen result of the nuclear age Rates of immune related diseases have risen steadily throughout the past few decades from allergies to cancer While advances in medical care have kept death rates relatively low the increased prevalence of certain diseases cannot be ignored Low Level Radiation and Immune System Damage An Atomic Era Legacy establishes an undeniable connection between the nuclear build up of the past and the widespread health problems seen today While baby boomers were growing up in the 40s and 50s above ground atomic bomb tests and start ups of civilian nuclear power plants were carried out without fear of public exposure to radioactive emissions Although the consequences of low level radiation are still hotly debated Mangano s research findings emphasize a direct link between nuclear exposure and immune system deficiency In addition to substantial data on immune disease trends among Americans born between the mid 1940s and mid 1960s Mangano also examines similar issues concerning baby boomer children and grandchildren Health professionals environmentalists historians and students alike will find much to learn from these pages As America and the world come to terms with the post Cold War era there are still many lessons to recognize consider and learn from the still recent past Low Level Radiation and Immune System Damage An Atomic Era Legacy explores a relentless trend that will not soon be over with potential repercussions into the 21st century      Secret Fallout Ernest J. Sternglass,1981 This book presents evidence on the cumulative effects of low level radiation on health      **The Freedom of Information Reform Act** United States. Congress. House. Committee on Government Operations. Government Information, Justice, and Agriculture Subcommittee,1985      **Iraq: Silent Death (Penerbit USM)** Christian P Scherrer, Silent Death documents mass murder by the use of banned Uranium weapons The spread of genetic disorders is among the most heinous and criminal forms of modern warfare Its ever lasting impact on humans is inherently genocidal Such weapons have since 1991 been used in Iraq Afghanistan the Balkans and Lebanon Universiti Sains Malaysia Penerbit Universiti Sains Malaysia      Downwind of the Atomic State James C. Rice,2025-04 2024 Outstanding Academic Title given by Choice Reviews How the scientific community overlooked ignored and denied the catastrophic fallout of decades of nuclear testing in the American West In December of 1950 President Harry Truman gave authorization for the Atomic Energy Commission to conduct weapons tests and experiments on a section of a Nevada gunnery range Over the next eleven years more than a hundred detonations were conducted at the Nevada Test Site and radioactive debris dispersed across the communities just downwind and through much of the country In this important work James C Rice tells the hidden story of nuclear weapons

testing and the negligence of the US government in protecting public health Downwind of the Atomic State focuses on the key decisions and events shaping the Commission's mismanagement of radiological contamination in the region specifically on how the risks of fallout were defined and redefined or importantly not defined at all owing to organizational mistakes and the impetus to keep atomic testing going at all costs Rice shows that although Atomic Energy Commission officials understood open air detonations injected radioactive debris into the atmosphere they did not understand or seem to care that the radioactivity would irrevocably contaminate these communities The history of the atomic Southwest should be a wake up call to everyone living in a world replete with large complex organizations managing risky technological systems The legacy of open air detonations in Nevada pushes us to ask about the kinds of risks we are unwittingly living under today What risks are we being exposed to by large organizations under the guise of security and science

**Mad Science** Joseph Mangano, 2012-10-01 Will Americans once again play nuclear roulette Just one year after the Fukushima meltdown all 54 reactors in Japan have been closed and may never be restarted Germany recently closed several reactors and will shutter them all within a decade Italy revoked its pledge to build new reactors keeping that nation nuclear free All these decisions are based on the understanding that reactors are extremely dangerous and expensive In the U S the remnants of the once overwhelmingly powerful nuclear lobby are making their last stand for clean nuclear energy The sixty year old vision of power too cheap to meter words originally uttered by a banker promoting the industry is back While other countries end their reliance on nuclear energy Americans contemplate its revival even as existing reactors which produce a fifth of U S electricity pass retirement age and are corroding In Mad Science Joseph Mangano strips away the near smothering layers of distortions and outright lies that permeate the massive propaganda campaigns on behalf of nuclear energy He explores the history of the industry with its origins in the Manhattan Project through its heightening promotion during the Cold War and its entwinement with nuclear weapons Mad Science includes an account of nuclear accidents and meltdowns and their consequences from Chernobyl to Santa Susana and beyond as well as a point by point refutation of pro nuke arguments Atomic energy is unsafe it deals with staggeringly poisonous substances at every stage of its creation uneconomical in the extreme and impractical

**Footprints to a Legacy** Robert L. Campbell, 2009-04-02 In this sometimes disturbing and frightening memoir of experiences interviews and government documents Robert Campbell seeks to level the playing field for many atomic veterans after he discovered how great a difference could exist between contemporaneous records and later reconstructed versions of the same nuclear operations Using the Freedom of Information Act Robert tried to match real time data with the footprints experiences of veterans who lived it and compare this information when possible to later versions postulated by officials who were not present at these operations Very interesting reading

**Linked Arms** Thomas V. Peterson, 2012-02-01 Through character development snappy dialogue and vivid scenes Linked Arms tells the story of a rural people's successful struggle to keep a major nuclear dump out of Allegany County in western New York Five times over a

twelve month period hundreds of ordinary people merchants teachers homemakers professionals farmers and blue collar workers ignored potential jail terms and large fines to defy the nuclear industry and governmental authority by linking arms in the bitter cold to thwart the siting commission through civil disobedience The hearts and minds of the resisters emerge in the narrative as we find out why these people found civil disobedience compelling how they organized themselves and what moral dilemmas they addressed as they fought for their convictions While becoming more engaged in the resistance they confronted critical issues in contemporary America democratic decision making environmental policy legal rights corporate responsibility and the technology of nuclear waste Some of the book s highlights include conversations that took place between Governor Cuomo Assemblyman Hasper and the protestors which thoughtfully probe who should bear the financial burden of a failed and dangerous technology the scientific and technological issues discussed between Ted Taylor a nuclear physicist who was one of the key people in the Manhattan project and the leaders of the resistance and the citizens initiation of a lawsuit that eventually reached the Supreme Court and abrogated the central provision in the 1987 congressional law that mandated states build low level nuclear dumps across the country These dialogues and vignettes illustrate how the civil disobedience and dogged determination of the people of Allegany County changed the course of history Maralinga Frank Walker,2014-08-26 The story reaches out and grabs you by the throat Dr Clare Wright historian and author of The Forgotten Rebels of Eureka The facts are shocking The treachery is chilling The fallout ongoing This edition contains a new author note with shocking new material that has come to light as a result of the groundbreaking original publication Investigative journalist Frank Walker s Maralinga is a must read true story of the abuse of our servicemen scientists treating the Australian population as lab rats and politicians sacrificing their own people in the pursuit of power During the Menzies era with the blessing of the Prime Minister the British government exploded twelve atomic bombs on Australian soil RAAF pilots were ordered to fly into nuclear mushroom clouds soldiers told to walk into radioactive ground zero sailors retrieved highly contaminated debris none of them aware of the dangers they faced But the betrayal didn t end with these servicemen Secret monitoring stations were set up around the country to measure radiation levels and a clandestine decades long project stole bones from dead babies to see how much fallout had contaminated their bodies their grieving parents were never told This chilling expos drawn from extensive research and interviews with surviving veterans reveals the betrayal of our troops and our country An amazing tale utterly gripping it reads like a thriller Jon Faine ABC Radio Melbourne This book will contribute to a much greater awareness and perhaps much more action on this issue Fran Kelly ABC Radio National Walker demonstrates powerfully why regardless of the context in which the testing took place the emotional legacy of Maralinga will linger in the Australian psyche just as do Gallipoli Bodyline and Singapore The cost in terms of damage to health the environment and public trust in government will remain with us for generations to come The Australian Shocking revelations Margaret Throsby Midday Interview ABC Classic FM An extraordinary story there are things here that would make your hair

stand on end Philip Clark ABC Radio Canberra This book should be on the school syllabus Andrew O Keefe Weekend Sunrise

The War in the Country Thomas Pawlick,2009 Rural life in North America has changed dramatically over the past few decades Corporate backed factory farms mining interests and large scale tourist developments have replaced the family farm and the small farmers who remain are strangled by debt hounded by government and harassed by regulations Rural First Nations face a similar struggle as do small town businesses However those who seek to make rural life extinct are meeting with some fierce resistance In this book a writer who is a farmer himself uses the microcosm of his own rural community to portray the groups involved and the battles they are fighting The outcome of these clashes will decide not only the future of rural life but also the quality and sustainability of our food our water our soil and our air Jacket **Clouds of Deceit** Joan

Smith,2011-12-01 The full story of Britain s nuclear weapons tests in the 1950s has only recently begun to emerge Here for the first time through interviews and eye witness accounts from men who watched the mushroom clouds drift over Australia and the Pacific Ocean the tests are vividly recreated Using official documents recently made public evidence gathered by the Australian government s Royal Commission of Inquiry into the tests and her own experience as an investigative journalist Joan Smith argues forcefully that the bomb tests are far from being a historical anecdote They remain with us in the shape of the victims servicemen civilians and aborigines who witnessed them and through Britain s continuing programme of nuclear weapons tests in the United States In this disturbing and horrific book first published in 1985 Joan Smith raises crucial questions about the British government s responsibility to the people who took part in the tests and shows how their effects may yet have a devastating impact on Britain s nuclear industry **Nuclear Politics in America** Robert J. Duffy,1997 Duffy

s work traces nuclear politics from the creation of a powerful subgovernment through the public lobby reforms of the late 1960s and early 1970s and the deregulatory backlash of the Reagan years He demonstrates that while policies did change in the 1970s they did not change as much as other accounts have suggested and that the industry continued to receive considerable federal support The book is particularly significant for extending the discussion of nuclear policy through the Bush and Clinton years including the controversy over waste disposal new licensing procedures enacted in the 1992 Amendments to the Atomic Energy Act and the effects of deregulation of electric utilities Amazon com viewed August 24 2020

*Elements of Controversy* Barton C. Hacker,1994-01-01 Unforgettable congressional hearings in 1978 revealed that fallout from American nuclear weapons testing in the 1950s had overexposed hundreds of soldiers and other citizens to radiation Faith in governmental integrity was shaken and many people have assumed that such overexposure caused great damage Yet important questions remain the most controversial being did the radiation overexposure in fact cause the cancers and birth defects for which it has been blamed *Elements of Controversy* is the result of a decade of exhaustive research in AEC documentary records and the full clinical and epidemiological literature on radiation effects More concerned with uncovering the historical story than with assigning blame Barton Hacker concludes that every precaution was taken by

the AEC to avoid harming test participants or bystanders And he points out the biomedical literature suggests that these precautions worked Yet top officials in Washington for whom the success of nuclear weapons was of overriding importance had asserted that testing involved no risks at all Discrepancies between unverifiable government claims and the revelations that some actual risk was present explain the origins and angry persistence of the controversies Hacker argues The Department of Energy delayed publication of Hacker s study for five years and while his controversial book is sure to draw objections from both sides of the radiation hazard debates it will provide a much needed guide to understanding their polemics Unforgettable congressional hearings in 1978 revealed that fallout from American nuclear weapons testing in the 1950s had overexposed hundreds of soldiers and other citizens to radiation Faith in governmental integrity was shaken and many people have assumed that such overexposure caused great damage Yet important questions remain the most controversial being did the radiation overexposure in fact cause the cancers and birth defects for which it has been blamed Elements of Controversy is the result of a decade of exhaustive research in AEC documentary records and the full clinical and epidemiological literature on radiation effects More concerned with uncovering the historical story than with assigning blame Barton Hacker concludes that every precaution was taken by the AEC to avoid harming test participants or bystanders And he points out the biomedical literature suggests that these precautions worked Yet top officials in Washington for whom the success of nuclear weapons was of overriding importance had asserted that testing involved no risks at all Discrepancies between unverifiable government claims and the revelations that some actual risk was present explain the origins and angry persistence of the controversies Hacker argues The Department of Energy delayed publication of Hacker s study for five years and while his controversial book is sure to draw objections from both sides of the radiation hazard debates it will provide a much needed guide to understanding their polemics     Diet for the Atomic Age Sara Shannon,1987     *Corporate Crime and Violence* Russell Mokhiber,1988 This well documented report on the corporate behavior that has an adverse impact on public health and environment provides an overview of the problems and offers solutions and reforms to make corporations more responsive to the public good     *Living in the Environment* George Tyler Miller,1985     *Energy And The Social Sciences* Ernest J Yanarella,Ann-marie Yanarella,1982-06-27     Death Marshall Houts,Irwin H.
