## **Secret Of The Muses Retold Classical Influences On Italian Authors Of The Twentieth Century:**

**Secret of the Muses Retold** John T. Kirby, 2000 Precious repositories of ancient wisdom Musty relics of outmoded culture Timeless paragons of artistic achievement Hegemonic tools of intellectual repression Just what are the classics anyway and why do or should we still pay so much attention to them What is the literary canon What is myth and how do we use it These are some of the questions that gave rise to John Kirby's *Secret of the Muses Retold* This new study of works by five twentieth century Italian writers investigates the abiding influence of the Greek and Roman classics and their rich legacy in our own day The result is not only a splendid introduction to contemporary Italian literature but also a lucid and stimulating meditation on the insights that writers such as Umberto Eco and Italo Calvino have tapped from the wellspring of ancient tradition Kirby's book offers an impassioned plea for the recuperation of the humanities in general and of classical studies in particular No expertise in Greek Latin Italian or literary theory is presumed and both traditional and postmodern perspectives are accommodated

**A Companion to the Classical Tradition** Craig W. Kallendorf, 2010-02-01 A

Greek Identity and the Athenian Past in Chariton Steven D. Smith, 2007 I Chariton of Aphrodisias secretary of the rhetor Athenagoras shall relate a love story that took place in Syracuse Thus begins the earliest of the canonical Greek romances the 1st century CE historical novel known as *Callirhoe* Chariton's erotic tale is about the constancy of love in a world where virtue is always in danger of being corrupted Chaereas and Callirhoe fall in love but then are tragically separated after the heroine believed dead is buried alive Each is eventually sold into slavery in the East and Callirhoe herself contemplates the abortion of her unborn child when she is forced to marry a man she does not love Hero and heroine are finally reunited in the foreign city of Babylon only to be plunged into a war between Persia and Egypt Classical Athenian historiography philosophy oratory myth and drama were all integral in shaping this timely work of fiction set in the years following Athens' doomed Sicilian Expedition 415-413 BC Chariton's novel is more than just a romanticized representation of a famous episode from Greek history The novel is clearly meant to be read for pleasure but it also has a political edge By imaginatively redeploying Athenian literature and political discourse in the construction of his fictional world Chariton gives voice to contemporary concerns about freedom tyranny the ever expanding meaning of Greek identity and the role of Greek culture in a world dominated by Rome This is a book that will be of value to anyone interested in Greek literature the classical tradition and the complex relationship between art and empire

*First Pages* Giancarlo Maiorino, 2010-11 Titology a term first coined in 1977 by literary critic Harry Levin is the field of literary studies that focuses

on the significance of a title in establishing the thematic developments of the pages that follow While the term has been used in the literary community for thirty years this book presents for the first time a thoroughly developed theoretical discussion on the significance of the title as a foundation for scholarly criticism Though Maiorino acknowledges that many titles are superficial and indexical there exists a separate and more complex class of titles that do much more than simply decorate a book's spine To prove this argument Maiorino analyzes a wide range of examples from the modern era through high modernism to postmodernism with writings spanning the globe from Spain and France to Germany and America By examining works such as *Essais* *The Waste Land* *Ulysses* and *Don Quixote* First Pages proves the power of the title to connect the reader to the thematic cultural and literary context of the writing as a whole Much like a facade to a building the title page serves as the frontispiece of literature a sign that offers perspective and demands interpretation

**Ulysses in Black** Patrice D. Rankine, 2008-12-30 In this groundbreaking work Patrice D Rankine asserts that the classics need not be a mark of Eurocentrism as they have long been considered Instead the classical tradition can be part of a self-conscious prideful approach to African American culture esthetics and identity *Ulysses in Black* demonstrates that similar to their white counterparts African American authors have been students of classical languages literature and mythologies by such writers as Homer Euripides and Seneca

**Emotions across Cultures** David Konstan, 2022-06-21 It is now recognized that emotions have a history In this book eleven scholars examine a variety of emotions in ancient China and classical Greece in their historical and social context A general introduction presents the major issues in the analysis of emotions across cultures and over time in a given tradition Subsequent chapters consider how specific emotions evolve and change For example whereas for early Chinese thinkers worry was a moral defect it was later celebrated as a sign that one took responsibility for things In ancient Greece hope did not always focus on a positive outcome and in this respect differed from what we call hope Daring not to do or undaring was itself an emotional value in early China While Aristotle regarded the inability to feel anger as servile the Roman Stoic Seneca rejected anger entirely Hatred and revenge were encouraged at one moment in China and repressed at another Ancient Greek responses to tragedy do not map directly onto modern emotional registers and yet are similar to classical Chinese and Indian descriptions There are differences in the very way emotions are conceived This book will speak to anyone interested in the many ways that human beings feel

**The City and the Ocean** I-Chun Wang, Jonathan White, 2012-01-24 Throughout history cities have been locations of human encounter Equally they have been contexts for the trade of goods and services for the evolution of various forms of urban space and for the production development and enrichment of culture and technology Many cities grew up along shorelines which themselves constitute some of the globe's most important cultural boundaries For above all else it is water that has separated but also connected different communities races religions and nations down through recorded time With the rapid advance in technologies of communication encounters between cultures have multiplied at a rate that no individual can follow or control The present

book constitutes a space of memory in its own right one of its chief reasons d tre being that a group of diverse scholars herein maps certain key encounters between peoples past as well as present and the urgent issues generated in consequence No one person could have traced such diversity and made sense of it whereas a scholarly grouping of persons reporting on phenomena from around the world such as is provided here offers its readers a vision of global change and development With the twentieth and twenty first centuries a new set of mega cities in Asia Africa and Latin America has emerged to challenge the primacy of European and North American metropolitan centres This expanded landscape is here interpreted with special attention as already mentioned to cities located at coastlines hence generally speaking more exposed to globalizing trends Migrants exiles and refugees ethnic and racial minorities as well as alternative or countercultural groupings continue to complicate the ways in which cities articulate their now pluralized identities in terms of and by means of literature history architecture social events and other forms of artistic and cultural production The international scholars whose work is assembled in these pages are well placed to engage with the intersecting themes and issues of the volume Contributors have mapped different examples from Homeric narrative through Renaissance drama and its representation of crossways of culture such as Rhodes and Malta to an earlier time in the development of a New World city such as Boston others look at the twentieth and twenty first centuries complexity of great world cities and of oceanic migration or trade between them Shanghai Singapore London Detroit Shantou Macau and Saigon are some that are dealt with in detail Emphasis falls on both the historical reality of those contexts as well as how they have been culturally represented
