Memory Warp Mark Pendergrast, 2021-10-22 In *Memory Warp* Mark Pendergrast sounds a clarion call to stop the ongoing pseudoscience of repressed memory therapy which has destroyed millions of families and continues to do so In the 1990s Pendergrast's book *Victims of Memory* helped to debunk the repressed memory craze Now more than two decades later he revisits the subject and proves that this form of therapy is still widespread still destroying family relationships and causing false allegations of terrible crimes against innocent parents and caregivers With meticulous research and captivating writing Pendergrast brings coverage of this issue up to date

They Know Us Better Than We Know Ourselves Bridget Brown, 2007-08-01 What's really

behind Americans persistent belief in alien abductions Since its emergence in the 1960s belief in alien abduction has saturated popular culture with the ubiquitous image of the almond eyed alien appearing on everything from bumper stickers to bars of soap Drawing on interviews with alleged abductees from the New York area Bridget Brown suggests a new way for people to think about the alien phenomenon one that is concerned not with establishing whether aliens actually exist but with understanding what belief in aliens in America may tell us about our changing understanding of ourselves and our place in the world They Know Us Better Than We Know Ourselves looks at how the belief in abduction by extraterrestrials is constituted by and through popular discourse and the images provided by print film and television Brown contends that the abduction phenomenon is symptomatic of a period during which people have come to feel increasingly divested of the ability to know what is real or true about themselves and the world in which they live The alien abduction phenomenon helps us think about how people who feel left out create their own stories and fashion truths that square with their own experience of the world

The Believer Ralph Blumenthal,2021-03-15 The Believer is the weird and chilling true story of Dr John Mack This eminent Harvard psychiatrist and Pulitzer Prize winning biographer risked his career to investigate the phenomenon of human encounters with aliens and to give credibility to the stupefying tales shared by people who were utterly convinced they had happened Nothing in Mack s four decades of psychiatry had prepared him for the otherworldly accounts of a cross section of humanity including young children who reported being taken against their wills by alien beings Over the course of his career his interest in alien abduction grew from curiosity to wonder ultimately developing into a limitless unwavering passion Based on exclusive access to Mack s archives journals and psychiatric notes and interviews with his family and closest associates The Believer reveals the life and work of a man who explored the deepest of scientific conundrums and further leads us to the hidden dimensions and alternate realities that captivated Mack until the end of his life A Simple Explanation of Extraterrestrials (ETs) ; C. D. Gragg,2010 This book describes the extraterrestrials ETs physical appearance and mental capabilities This includes an excellent photograph of an ET It gives details of their human alien hybrid breeding program It gives some guidance on recognizing hybrids who are trying to pass as humans It describes in some detail 13 of the 57 known types of ETs This includes the discovery of two new types the Super Giants and the Minigrays It includes four generations of Mayans and their interaction with the ETs It includes one generation of Mayans channeling to the next generation about a cataclysmic future event It gives details of the treaty between President Eisenhower and the ETs

Animals as Religious Subjects Celia Deane-Drummond,Rebecca Artinian-Kaiser,David L. Clough,2013-07-18 This book examines one of the most pressing cultural concerns that surfaced in the last decade the question of the place and significance of the animal This collection of essays represents the outcome of various conversations regarding animal studies and shows multidisciplinary at its very best namely a rigorous approach within one discipline in conversation with others around a common theme The contributors discuss the most relevant disciplines regarding this conversation namely

philosophy anthropology religious studies theology history of religions archaeology and cultural studies The first section Thinking about Animals explores philosophical anthropological and religious perspectives raising general questions about the human perception of animals and its crucial cultural significance The second section explores the intriguing topic of the way animals have been used historically as religious symbols and in religious rituals The third section re examines some Christian theological and biblical approaches to animals in the light of current concerns The final section extends the implications of traditional views about other animals to more specific ethical theories and practices How to Talk to an Alien Nancy du Tertre,2015-10-19 Even for nonbelievers the author s palpable excitement over the subject matter is endearing and entertaining Ufologists won t want to miss this work Foreword Reviews In 1972 American astronomer and ufologist J Allen Hynek first coined the term close encounter He also identified three types of close encounters with UFOs Since then several more types of encounters have been proposed A close encounter of the fourth kind is an alien abduction A closer encounter of the fifth kind is voluntary bilateral contact with an alien species We are no longer just looking at strange flying objects in the skies now we are beginning to interact with the actual pilots crew and passengers Do aliens exist In 2013 one poll showed that nearly half of all Americans 48 percent believe UFOs may be a sign of extraterrestrial visitation another found that 10 percent of Americans claim to have actually witnessed an actual UFO and yet another showed that 2.9 million Americans believe they had actually been abducted by aliens If aliens exist and are visiting us we need to talk Who will speak to them on behalf of planet Earth Who can translate their intentions good or evil toward the human race How can we learn about their advanced technologies Can aliens speak human languages These and even more fascinating questions are all addressed in How to Talk to an Alien Nancy du Tertre covers the various considerations involved with extraterrestrial communication including the use of alien technology ET linguistics and the possibility of using telepathy and dreams Her handbook for the future should be on every thinking person s bookshelf Jim Marrs New York Times bestselling author

The Making of the New Spirituality James A. Herrick,2004-12-02 James A Herrick offers an intellectual history of the New Religious Synthesis examining the challenges it poses to Judeo Christian tradition demonstrating its sources and manifestations in contemporary culture and questioning its acceptance in church and society **UFOs** Karl Svozil,2023-08-01 Unidentified phenomena in space in the Earth s atmosphere and in waters are too important to leave their exploration to the military and scientific laypersons Their proper scientific study is important for a variety of reasons in particular scientists and the public at large need to know the basic facts to be informed about the way evidence is recorded and to understand the difference between reliable evidence and fiction as well as between plausible explanations and fantasy With this objective the book surveys the history of UFO observations the variety of recorded phenomena and recounts the efforts of investigative commissions and their published findings Although wild rumors are demystified in the process this is not an exercise in rumor bashing An open and at the same time critical mindset is the key Many narratives and hypothesis

appear implausible relative to our present state of knowledge but this alone should not lead to their outright exclusion. Thus the author also pays attention to UFO sightings that have so far eluded explanation in terms of known physics or meteorology. Here the reader will encounter some of the more speculative but scientifically tenable proposals, for example relating to sudden zigzag motion without apparent inertia or recognizable propulsion, yet always with a clear guide to their plausibility. Last but not least, the book outlines plans and suggestions for future research capable of revealing the existence and intentions of extraterrestrial intelligences, outer space engineers or technologies so far known only from science fiction.
