Gordimer **Lost in Transition** Yiu-Wai Chu,2013-05-13 In this timely and insightful book Yiu Wai Chu takes stock of Hong Kong's culture since its transition to a Special Administrative Region of the People's Republic of China in 1997. Hong Kong had long functioned as the capitalist and democratic stepping stone to China for much of the world. Its highly original popular culture was well known in Chinese communities and its renowned film industry enjoyed worldwide audiences and far reaching artistic influence. Chu argues that Hong Kong's culture was lost in transition when it tried to affirm its international visibility and retain the status quo after 1997. In an era when China welcomed outsiders and became the world's most rapidly developing economy, Hong Kong's special position as a capitalist outpost was no longer a privilege. By drawing on various cultural discourses such as film, popular music and politics of everyday life, Chu provides an informative and critical analysis of the impact of China's ascendancy on the notion of One Country Two Cultures. Hong Kong can no longer function as a bridge between China and the world, writes Chu, and must now define itself from global, local and national perspectives.

Lost in Cyburbia James Harkin,2010-09-07 The early twentieth century saw the slow but steady exodus of the population from inner cities to the suburbs. We are currently witnessing a similar transformation as our new century establishes itself, but in an entirely different realm. As new technologies proliferate, personal computers, the communication gadgetry of mobile devices and access to the internet, our culture is participating in a mass electronic migration. James Harkin christens this destination to Cyburbia, the ether of online where we spend so much of our lives. Once upon a time there were no text messaging, no e-mail and no social networking sites like Facebook, Bebo, Twitter and MySpace. The introduction of these new forums for communication has radically transformed the way that we live and we can only guess what will come next. Innovative and extremely timely, *Lost in Cyburbia* describes the architecture of our digital life, how it has developed over the past seventy years and how it will evolve in the future. The narrative recounts how the theories of Norbert Wiener, the inventor of cybernetics, and Marshall McLuhan inspired the counterculture radicals in the sixties and seventies and traces how their pioneering idealistic and theoretical work laid the groundwork for a system whose central idea is bringing about direct communication between peers outside the reach of authority. Harkin explores what it means to be in the loop and our obsession with instant access to information and how it is shared over networks and considers what has been lost and what has been gained. Are we more connected than ever before or more isolated? Have our thinking processes been forever altered? Is the democratic nature of the net slowly being eroded by corporate interests? Or, as once hoped, will the net enable the awakening of a new kind of global consciousness?
