crossing Just like the mirror metaphor that reflects everything to all and sometimes intervenes in distortions the patchwork analogy allowed the book to take responsibility for the disclosure of preservation actions on a global scale The book has a pioneering role insofar since it is the only publication with such characteristics concerns and coverage The work studies the interconnection between cultural properties and international relations by understanding them as a mosaic before the bridges that intertwine people and borders The main goal of this work is to illustrate in what way intergovernmental relations have been privileging heritage and culture as acting fields for its broader needs Therefore the book addresses topics related to the international agenda focusing on its less debated themes Two examples of these undervalued matters are the link between actors preservationist actions and the universe of world cultural heritage The book also pursues a critical dialogue between interdisciplinary fields that narrow heritage frontiers in search to contribute with a spectrum of academic perspectives and inter national study cases To serve distinct economic social or political purposes institutionalized heritage embodied by different values becomes instrumentalized in a top down direction In a development frame when we perceive culture as indispensable to human life the past is transformed into exchange currency Through the creation of alternative fields of action usually in a bottom up logic the present builds new heritage connections Digital heritage s preservation dissemination and appreciation have been representing these same nets
