Outsmart Your Instincts Adam Hansen, Ed Harrington, Beth Storz, 2017-01-10

Evolution is killing innovation Just trust your gut is great advice when your instincts tell you to run from a lion in the jungle But when it comes to thinking innovatively about your business those same instincts can be your own worst enemy Cognitive biases the instinctual mental shortcuts we all have in our brains that shape how we see and respond to the world around us can also be the archnemeses of innovation innovative thinking New ideas appear too risky Data gets discounted if it doesn't match the hypothesis of the researcher And even like minded innovation enthusiasts can find that enacting disruptive change is tough when they all see things the same way It's time to let go and learn a new way to think Created by innovation experts *Outsmart Your Instincts* cleverly merges behavioral science with business savvy Using the trademarked Behavioral Innovation model the authors provide an in depth examination of eight unique biases Negativity Confirmation and Conformity among them that get in the way of creativity creative thinking and show us how we can overcome these barriers and break from the status quo With clever thought provoking activities accessible writing and easy to follow advice *Outsmart Your Instincts* shows us how and why we react to new ideas the way we do and then helps us rethink what we think Once we learn to outsmart our own instincts we can take on challenges as true innovators who rely on all of our brains powers not just our guts and be equipped to outsmart the competition

Eugene O'Neill's Creative Struggle Doris Alexander, 1992-04-15 In *Eugene O'Neill's Creative Struggle* Doris Alexander gives us a new kind of inside biography that begins where the others leave off It follows O'Neill through the door into his writing room to give a blow by blow account of how he fought out in his plays his great life battles love against hate doubt against belief life against death to an ever expanding understanding It presents a new kind of criticism showing how O'Neill's most intimate struggles worked their way to resolution through the drama of his plays Alexander reveals that he was engineering his own consciousness through his plays and solving his life problems while the tone imagery and richness of the plays all came out of the nexus of memories summoned up by the urgency of the problems he faced in them By the way of O'Neill this study moves toward a theory of the impulse that sets off a writer's creativity and a theory of how that impulse acts to shape a work not only in a dramatist like O'Neill but also in the case of writers in other mediums and even of painters and composers The study begins with *Desire Under the Elms* because that play's plot was consolidated by a dream that opened up the transfixing grief that precipitated the play for O'Neill and it ends with *Days Without End* when he had resolved his major emotional philosophical struggle and created within himself the voice of his final great plays Since the analysis brings to bear on the plays all of his conscious decisions ideas theories as well as the life and death struggles motivating them documenting even the final creative changes made during rehearsals this book provides a definitive account of the nine plays analyzed in detail *Desire Under the Elms* *Marco Millions* *The Great God Brown* *Lazarus Laughed* *Strange Interlude* *Dynamo* *Mourning Becomes Electra* *Ah Wilderness* and *Days Without End* with
