Willingham, Nancy S. Cole, 2013-12-16 There have been many important changes in the participation of women and men in American society over the past quarter century Tests play a role in those changes by providing evidence of the diverse achievement and proficiency of women and men They aid the learning process and reflect inequalities in opportunity to learn and participate In addition they provide useful information in considering what alternatives in education and work make most sense for individuals and influence views about groups of students educational programs and a wide range of issues For all of these reasons it is important that tests assess fairly and reflect accurately the ways young people are and are not achieving as well as desired

The test performance of women and men is a research topic of historical interest and has received much attention in recent years. Because of this increased interest, there is a great deal of new research and data available. The purpose of the study presented in this volume was to review this new information with two objectives in mind: to clarify patterns of gender difference and similarity in test performance and related achievements, and to see what implications those findings might have for fair assessment and as a corollary, to examine the assessment process as a possible source of gender differences. This study is interested in tests used in education to assess developed knowledge and skill. In order to gain a broader view of gender similarity and difference, the contributors looked at other types of measures and other characteristics of young women and men. Their hope is to contribute to a firmer basis for insuring fairness in tests, an objective which is particularly important as the field moves increasingly to new forms of assessment in which there is less experience.

Serving Students with Disabilities Holley A. Belch, 2011-09-28. This issue examines what student services professionals can do to ensure the success of the growing population of students with disabilities. The contributors explore the critical role that community and dignity play in creating a meaningful educational experience for students with disabilities and show how to help these students gain meaningful access and full participation in campus activities. In addition to such common concerns as fulfilling legal requirements and overcoming architectural barriers, the contributors also address a full range of important issues such as effective approaches to recruitment and retention strategies for career and academic advising and the impact of financial resources on funding programs and services. This is the 91st issue of the quarterly journal *New Directions for Student Services*.
