Low Impact Forestry Forestry As If The Future Mattered:

Low Impact Forestry: Forestry as If the Future Mattered Mitch Lansky, 2002 Sustainable forestry is right where organic gardening was a generation ago at the very beginning of working out the techniques and technologies that will let logging thrive at a scale appropriate to both the human and natural communities that depend on the forest This book is at if you will pardon the expression the absolute cutting edge of that process Bill McKibben author of *The End of Nature* *Hope Human and Wild Enough* and other books If the future really mattered How would forests be managed to improve rather than degrade future timber values How would trees be cut to minimize damage to the residual forest How would foresters measure success towards minimizing damage How would loggers be paid to lower logging impacts How would forests be managed in a way that ensures the survival of all native species How would woodlot owners be able to afford this type of management Low Impact Forestry Forestry as if the Future Mattered answers these questions and more Using Maine as a case study this book offers forestry goals and guidelines that emphasize quality and value while conserving biodiversity and supporting communities for the long term

Children of the Northern Forest Jamie Sayen, 2024-01-05 This no holds barred narrative of the failure of conservation in northern New England's forests envisions a wilder more equitable lower carbon future for forest dependent communities Jamie Sayen approaches the story of northern New England's undeveloped forests from the viewpoints of the previously unheard the forest and the nonhuman species it sustains the First Peoples and in more recent times the disenfranchised human voices of the forest including those of loggers mill workers and citizens who like Henry David Thoreau wish to speak a kind word for nature From 1988 to 2016 paper companies sold their timberlands and closed seventeen paper mills in northern New England Policy makers ceded veto power to large absentee landowners who tried to preserve the status quo by demanding additional tax cuts and other subsidies for economic elites They vetoed measures designed to restore and preserve forest health at present about half of the former industrial forests are classified as degraded and the regional economy continues to be trapped in low value commodity markets This book operates as a case study of how a rural resource region can respond to a global economy responsible for climate change habitat loss and degradation and environmental injustice Sayen offers a blueprint for restoring vast wildlands and transitioning to a lower carbon high value adding local economy while protecting the natural rights of humans nonhumans and unborn generations

Forestry and Environmental Change John L. Innes, Gordon M. Hickey, H. F. Hoen, 2005 Considerable emphasis has been placed on the interactions between environmental change and forests in recent years Reports have been produced detailing scenarios of forest development associated with particular changes in climate Similarly scenarios have been produced looking at likely trends in air quality However many studies have failed to recognize that some of the biggest changes for forests are related to the socioeconomic environment rather than the physical environment This book considers the interactions between forestry and environmental climatic change from social and economic perspectives *You Had a*
