Getting MAD: Nuclear Mutual Assured Destruction, Its Origins and Practice, 2004 Nearly 40 years after the concept of finite deterrence was popularized by the Johnson administration nuclear Mutual Assured Destruction MAD thinking appears to be in decline The United States has rejected the notion that threatening population centers with nuclear attacks is a legitimate way to assure deterrence Most

recently it withdrew from the Anti Ballistic Missile Treaty an agreement based on MAD American opposition to MAD also is reflected in the Bush administration s desire to develop smaller more accurate nuclear weapons that would reduce the number of innocent civilians killed in a nuclear strike Still MAD is influential in a number of ways First other countries like China have not abandoned the idea that holding their adversaries cities at risk is necessary to assure their own strategic security Nor have U S and allied security officials and experts fully abandoned the idea At a minimum acquiring nuclear weapons is still viewed as being sensible to face off a hostile neighbor that might strike one s own cities Thus our diplomats have been warning China that Japan would be under tremendous pressure to go nuclear if North Korea persisted in acquiring a few crude weapons of its own Similarly Israeli officials have long argued without criticism that they would not be second in acquiring nuclear weapons in the Middle East Indeed given that Israelis surrounded by enemies that would not hesitate to destroy its population if they could Washington finds Israel s retention of a significant nuclear capability totally understandable

U.S.-UK Nuclear Cooperation After 50 Years Jenifer Mackby,Paul Cornish,2008-07-02 As Britain and the United States commemorate five decades of the special nuclear relationship embodied in the 1958 Mutual Defense Agreement MDA two leading research institutes one on either side of the Atlantic have collaborated to examine that history The Center for Strategic and International Studies in Washington D C and the Royal Institute of International Affairs Chatham House London enlisted senior officials scientists academics and members of industry who have been involved in the implementation of the MDA over the years The contributors were asked to recount how the U S UK nuclear relationship flourished despite such obstacles as the halt in the scientific cooperation that had spurred the Manhattan Project the Suez crisis and sharp disagreements over scientific political and technical issues They were also asked to look to the future of this unparalleled transatlantic relationship Abstracts from 36 oral histories taken with among others Des Browne UK secretary of state for defence James Schlesinger former U S secretary of energy and Harold Brown former U S secretary of defense add to the historical dimension of this work The resulting collection of histories analyses and anecdotes provides valuable reading for an understanding of how the two nations were drawn together by a common threat during a turbulent era as well as how they will face future challenges in a radically changed security environment Amazon com

Access to Justice Ellie Palmer,Tom Cornford,Yseult Marique,Audrey Guinchard,2016-01-28 Building on a series of ESRC funded seminars this edited collection of expert papers by academics and practitioners is concerned with access to civil and administrative justice in constitutional democracies where for the past decade governments have reassessed their priorities for funding legal services embracing new technologies that reconfigure the delivery and very concept of legal services cutting legal aid budgets and introducing putative cost cutting measures for the administration of courts tribunals and established systems for the delivery of legal advice and assistance Without underplaying the future potential of technological innovation or the need for a fair and rational system for the prioritisation and funding of legal services the book questions whether the absolutist

approach to the dictates of austerity and the promise of new technologies that have driven the Coalition Government's policy can be squared with obligations to protect the fundamental right of access to justice in the unwritten constitution of the United Kingdom

Access to Justice and Legal Aid Asher Flynn, Jacqueline Hodgson, 2017-01-26 This book considers how access to justice is affected by restrictions to legal aid budgets and increasingly prescriptive service guidelines As common law jurisdictions England and Wales and Australia share similar ideals policies and practices but they differ in aspects of their legal and political culture in the nature of the communities they serve and in their approaches to providing access to justice These jurisdictions thus provide us with different perspectives on what constitutes justice and how we might seek to overcome the burgeoning crisis in unmet legal need The book fills an important gap in existing scholarship as the first to bring together new empirical and theoretical knowledge examining different responses to legal aid crises both in the domestic and comparative contexts across criminal civil and family law It achieves this by examining the broader social political legal health and welfare impacts of legal aid cuts and prescriptive service guidelines Across both jurisdictions this work suggests that it is the most vulnerable groups who lose out in the way the law now operates in the twenty first century This book is essential reading for academics students practitioners and policymakers interested in criminal and civil justice access to justice the provision of legal assistance and legal aid
