Patent and Trademark Office, 2002 **Efficient Predictive Algorithms for Image Compression** Luís Filipe Rosário Lucas, Eduardo Antônio Barros da Silva, Sérgio Manuel Maciel de Faria, Nuno Miguel Morais Rodrigues, Carla Liberal Pagliari, 2017-02-09 This book discusses efficient prediction techniques for the current state of the art High Efficiency Video Coding HEVC standard focusing on the compression of a wide range of video signals such as 3D video Light Fields and natural images The authors begin with a review of the state of the art predictive coding methods and compression technologies for both 2D and 3D multimedia contents which provides a good starting point for new researchers in the field of image and video compression New prediction techniques that go beyond the standardized compression technologies are then presented and discussed In the context of 3D video the authors describe a new predictive algorithm for the compression of depth maps which combines intra directional prediction with flexible block partitioning and linear residue fitting New approaches are described for the compression of Light Field and still images which enforce sparsity constraints on linear models The Locally Linear Embedding based prediction method is investigated for compression of Light Field images based on the HEVC technology A new linear prediction method using sparse constraints is also described enabling improved coding performance of the HEVC standard particularly for images with complex textures based on repeated structures Finally the authors present a new generalized intra prediction framework for the HEVC standard which unifies the directional prediction methods used in the current video compression standards with linear prediction methods using sparse constraints Experimental results for the compression of natural images are provided demonstrating the advantage of the unified prediction framework over the traditional directional prediction modes used in HEVC standard *Aëtiana V (4 vols.)* Jaap Mansfeld, David Runia, 2020-08-10 A new reconstruction and text of the Placita of A tius ca 50 CE accompanied by a full commentary and an extensive collection of related texts This compendium arguably the most important doxographical text to survive from antiquity is known through the intensive use made of it by authors in later antiquity and beyond Covering the entire field of natural philosophy it has long been mined as a source of information about ancient philosophers and their views It now receives a thorough analysis as a remarkable work in its own right This volume is the culmination of a five volume set of studies on A tius 1996 2020 A tiana I ISBN 9789004105805 1996 II Parts 1 set ISBN 9789004172067 2008 III ISBN 9789004180413 2009 IV ISBN 9789004361454 2018 and V Parts 1 4 It uses an innovative methodology to replace the seminal edition of Hermann Diels 1879 *Method in Ancient Philosophy* Jyl Gentzler, 1998 *Method in Ancient Philosophy* brings together fifteen new specially written essays by leading scholars on a broad subject of central importance It is characteristic of human beings that they direct their activities by reasoning Methods of reasoning

even toward the same ends vary Self conscious reflection on the methods of reasoning marks the beginning of philosophy in the West examination of how the ancient Greeks reasoned and how they thought about methods of reasoning helps us to see how they came to hold the views they did and how we have come to think as we do For the views of the ancients have had a considerable influence upon our own assumptions about the demarcations between different kinds of enquiry and the sorts of methods that are appropriate for them The aims of the volume are thus both exegetical and philosophical Most of the essays focus on Socrates Plato or Aristotle but earlier and later ancient philosophy is brought into the picture by essays on Eleatic and Epicurean thought

Introductory Econometrics Humberto Barreto, Frank Howland, 2005-12-26 This highly accessible and innovative text with supporting web site uses Excel R to teach the core concepts of econometrics without advanced mathematics It enables students to use Monte Carlo simulations in order to understand the data generating process and sampling distribution Intelligent repetition of concrete examples effectively conveys the properties of the ordinary least squares OLS estimator and the nature of heteroskedasticity and autocorrelation Coverage includes omitted variables binary response models basic time series and simultaneous equations The authors teach students how to construct their own real world data sets drawn from the internet which they can analyze with Excel R or with other econometric software The accompanying web site with text support can be found at www.wabash.edu

edu econometrics The Liberation of Life Charles Birch, John B. Cobb, 1985-01-10 This book is about the liberation of the concept of life from the bondage fashioned by the interpreters of life ever since biology began and about the liberation of the life of humans and non humans alike from the bondage of social structures and behaviour which now threatens the fullness of life's possibilities if not survival itself It falls into a tradition of writings about human problems from a perspective informed by biology It rejects the mechanistic model of life dominant in the Western world and develops an alternative ecological model which is applicable to the life of the cell and the life of the human community For the first time it brings together in one work the insights of modern biology with those of a modern holistic philosophy and a liberal theology in a way which challenges conventional approaches to science agriculture sociology politics economics development and liberation movements

Virtual and Augmented Architecture (VAA'01) Bob Fisher, Kenneth Dawson-Howe, Carol O'Sullivan, 2001-06-18 This book focuses on the use of computer vision and graphics in architecture It arose from a convergence of several hot topics 1 visualization of built environments for engineering historical and other purposes 2 virtual reconstruction of architecture from visual data of existing structures whether via photogrammetric or range sensing techniques and 3 augmentation of video data of architecture with useful information The focus here is on architecture and how to present it enhance its abilities make it easier to understand and make it accessible to a larger public Collective interest in this topic led to the International Symposium on Virtual and Augmented Architecture whose papers are contained in this book As editors we were very pleased about how well the different papers chosen gave a nice focus to the topic and conference It is clear that there are many different research approaches still active in this area this makes it an exciting time We hope that this book captures that excitement and succeeds in bringing it to you
