Second Workshop On Grand Unification:

The Second Workshop on Grand Unification LEVEILLE,SULAK,UNGER,2012-12-06 Recently there has been rapid progress towards understanding the separate theories of the strong weak and electromagnetic interactions within the framework of the standard $SU(3) \times SU(2) \times U(1)$ model The purpose of the Second Workshop on Grand Unification was to discuss the physics beyond the standard model and the major topic was grand unified theories which unify the strong weak and electromagnetic sectors Grand unified theories are presently being used to calculate experimentally accessible quantities such as the proton lifetime and nucleon decay branching ratios Meanwhile experiments are currently being performed and new dedicated experiments mounted to measure these quantities Reports on these experimental and theoretical activities occupied much of the workshop Furthermore since grand unified theories allow one to extrapolate the behavior of the universe back to the first instants after the big bang their cosmological implications and the constraints on these theories from cosmology were of great interest at the workshop The conference opened with a keynote address by S L Glashow in which he discussed among other topics baryon minus lepton number conservation neutrino masses and a neutrino free universe To maximize the interplay between theorists and experimentalists theoretical and experimental talks were interleaved An experimental highlight of the workshop was the presentation by S Miyake of three candidate events for proton decay

Thanh Van Tran,1982 Origin of Symmetries C. D. Froggatt,H. B. Nielsen,1991 The development in our understanding of symmetry principles is reviewed Many symmetries such as charge conjugation parity and strangeness are no longer considered as fundamental but as natural consequences of a gauge field theory of strong and electromagnetic interactions Other symmetries arise naturally from physical models in some limiting situation such as for low energy or low mass Random dynamics and attempts to explain all symmetries even Lorentz invariance and gauge invariance without appealing to any fundamental invariance of the laws of nature are discussed A selection of original papers is reprinted **High Energy Physics and Nuclear Structure** P. Jones,J.E. Jones,2012-12-06 The Origin and Evolution of Galaxies is the outstanding problem of modern cosmology Fortunately we have a firm cosmological framework on which to base our theories the hot big bang and recently there has been substantial progress in providing observations which potentially can constrain these theories The problem of galaxy formation is as a consequence one involving many diverse branches of physics and astrophysics It has been the aim of the school and this compendium of lectures and seminars to bring together these diverse aspects at a level enabling research workers to understand what is going on in other corners of the subject and to see how progress in each area impinges on the others We are grateful to the contributors to this volume for allowing us considerable editorial license with their articles We have attempted to provide a representative sample of the talks that were given at the school besides the texts of the invited lecturers It is regrettable that for reasons of space we have had to leave out a number of other contributions **Particles And Cosmology - International School** V A Matveev,E N Alexeev,Valery A Rubakov,Igor I
