Children's Self-determination in the Context of Early Childhood Education and Services Federico Farini, Angela Scollan, 2019-06-26 This book investigates the position of young

children's self-determination within a range of social contexts such as education, social care, mass media, health, politics, law and the family. It brings to the fore the voices of the children in the present with their interests, agendas and rights. Based on original primary research, the chapters tackle hegemonic discourses on children's self-determination as well as current policies and practices. They address a broad range of topics from the planning of role play to national policies from the use of digital technologies for pedagogy to children's health and well-being and from democratic practices in the classroom to the preservation of traditional family values. The book presents case studies to unravel how childhood and young children's self-determination are constructed at the intersection with intergenerational relationships. Coming from different disciplines and using a diverse range of methodological traditions, the contributions in the volume eventually converge to generate a rich, complex and multi-layered analysis of contemporary cultures of childhood and young children's rights. **The Routledge**

International Handbook of Early Childhood Play Tina Bruce, Pentti Hakkarainen, Milda Bredikyte, 2017-06-14. Historical changes in play are taking place in childhood all over the world with the digitalisation of children's lives. Researchers are worried about the disappearance of advanced forms of play and the prioritization of time spent with loving adults supporting play with babies and toddlers. At the same time, our understanding about the crucial importance of individual development is becoming clearer. The Routledge International Handbook of Early Childhood Play explores these issues and more. It proposes the importance of adult participation in play as adult guidance brings the possibility of moral, cultural and symbolic elements to children's play and enhances the educational opportunities in adult-child joint play. The book also examines the aesthetic dimension of play and its role in the development of imagination and creativity. With contributors from many parts of the world, this unique handbook brings together the latest research and highlights practice which focuses on play. This is an essential and engaging read for all students, academics, teachers and practitioners with an interest in play. Play in the Early Years Marilyn Fleer, 2013-03-28. The Early Years Learning Framework is a key component of the Australian Government's National Quality Framework for early childhood education and care. Play-based learning is an important focus in both the Framework and in early childhood education degrees at Australian universities. Play in the Early Years is a comprehensive study of pedagogy and play in early childhood education by a globally recognised leader in the field. Marilyn Fleer examines how play has been thought about across time, culture and institutions including in childcare, family day care, schools and community groups. The book presents and analyses the latest research and theories about early childhood pedagogy and play. Vignettes and real-world examples help students connect theory to practice while end-of-chapter glossaries help to consolidate understanding of key concepts and ideas. This is an accessible and engaging textbook that will be an invaluable resource for practitioners and undergraduate students of early childhood education. **International Handbook of Early Childhood Education** Marilyn Fleer, Bert van Oers, 2017-10-10. This international handbook gives a comprehensive overview of findings from longstanding and contemporary research, theory and practices in early childhood education in the Northern

Young Minds in Social Worlds Katherine Nelson, 2010-03-30 Katherine Nelson re-centers developmental psychology with a revived emphasis on development and change rather than foundations and continuity She argues that children be seen not as scientists but as members of a community of minds striving not only to make sense but also to share meanings with others A child is always part of a social world yet the child's experience is private So Nelson argues we must study children in the context of the relationships interactive language and culture of their everyday lives Nelson draws philosophically from pragmatism and phenomenology and empirically from a range of developmental research Skeptical of work that focuses on presumed innate abilities and the close fit of child and adult forms of cognition her dynamic framework takes into account whole systems developing over time presenting a coherent account of social cognitive and linguistic development in the first five years of life Nelson argues that a child's entrance into the community of minds is a slow gradual process with enormous consequences for child development and the adults that they become Original deeply scholarly and trenchant *Young Minds in Social Worlds* will inspire a new generation of developmental psychologists
