

STAGES OF SECOND LANGUAGE ACQUISITION

1 PRE-PRODUCTION

What should you expect at this stage? This stage is also known as the "silent period." Children do not speak, but are actively listening to the sounds and words of the new language that they are immersed in.

What can you do about it? Continue to immerse your child in a rich language environment. Continue to use the new language to elicit nonverbal responses, or ask a child questions in a new language and allow them to respond in their first language.

2 EARLY PRODUCTION

What should you expect at this stage? Children will begin to say a few words and short phrases. There will likely be grammatical errors (and that's okay!).

What can you do about it? Ask yes/no questions to children. Accept one or two-word answers. Build basic vocabulary and talk about objects in your surroundings. Read stories and continue to immerse children in a rich language environment.

Mommy

I hungry.

Daddy bye-bye.

3 SPEECH EMERGENCE

What should you expect at this stage? Children can string words together into phrases, sentences, and questions. Comprehension continues to increase. Grammatical accuracy improves.

What can you do about it? Bring in a diversity of text through stories and educational media. Build academic vocabulary (e.g. introduce different shapes). Write simple stories together.

I want this shirt.

Where did dog go?

[Child can recite stories with simple sentence patterns]

4 INTERMEDIATE FLUENCY

What should you expect at this stage? Children gain fluency and can use complex sentences in speech or writing to express opinions and share thoughts. Grammar will be more consistent and accurate.

What can you do about it? Provide opportunities for children to use the language in different subject areas and formal settings. Encourage children to learn new content and concepts in this new language. Move away from focusing only on language development.

I really don't like... because...

Remember when we did... and this happened and that happened?

5 ADVANCED FLUENCY

What should you expect at this stage? Children will be proficient and fluent with near-native fluency. Children may misuse idiomatic expressions at times and, depending on the language and the child, may have a slight accent.

What can you do about it? Continue to encourage your child to use the language in authentic social and formal situations and to express themselves consistently.

[Nothing different from a child's first language.]

Second Language Acquisition In Childhood:

Second-language Acquisition in Childhood: School-age children Barry McLaughlin, 1984 **Second-language Acquisition in Childhood: Preschool children** Barry McLaughlin, 1984 The Age Factor in Second Language Acquisition David Michael Singleton, Zolt Lengyel, 1995-01-01 This book takes a hard look at some of the assumptions that are customarily made concerning the role of age in second language acquisition. The evidence and arguments the contributors present run counter to the notion that an early start in second language learning is of itself either absolutely sufficient or necessary for the attainment of native like mastery of a second language. Another theme of the book is a doubt that there is a particular stage of maturity beyond which language learning is no longer fully possible. In short, the book presents a challenge to those who take it as given that second language learning is inevitably different in its essential nature from language acquisition in the childhood years and that second language knowledge acquired beyond the critical period is in all circumstances and in all respects doomed to fossilize at a non-native like level. *Second Language Acquisition in Childhood* Barry McLaughlin, 1987-05-01 **Second Language Acquisition in Childhood** B. McLaughlin, 2013-10-28 First published in 1987. Throughout human history, learning a second language has been an important part of the educational process. From ancient times to the present, school children have had to struggle to learn a second language and in many cases third and fourth languages. To be educated meant to know a language other than the language of one's family and community. The contemporary American educational system is one of the few in recorded history that allows its products to remain monolingual. **Second Language Acquisition and the Younger Learner** Jenefer Philp, Rhonda Oliver, Alison Mackey, 2008 This new volume of work highlights the distinctiveness of child SLA through a collection of different types of empirical research specific to younger learners. Characteristics of children's cognitive, emotional, and social development distinguish their experiences from those of adult L2 learners, creating intriguing issues for SLA research and also raising important practical questions regarding effective pedagogical techniques for learners of different ages. While child SLA is often typically thought of as simple and often enjoyable and universally effortless, in other words, as children's play, the complex portraits of young second language learners which emerge in the 16 papers collected in this book invite the reader to reconsider the reality for many younger learners. Chapters by internationally renowned authors together with reports by emerging researchers describe second and foreign language learning by children ranging from pre-schoolers to young adolescents in home and school contexts with caregivers, peers, and teachers as interlocutors. **Second-Language Acquisition in Childhood** Barry McLaughlin, 1984 First published in 1987. Routledge is an imprint of Taylor & Francis, an information company. **Do children learn second languages easier than adults? A comparative analysis of child and adult second language acquisition** Kevin Salzmänn, 2014-06-13 Seminar paper from the year 2014 in the subject Didactics for the subject English Pedagogy / Literature Studies, grade 2.3 University of Kassel, Institut für Anglistik / Amerikanistik course.

Introduction to Second Language Acquisition language English abstract In the field of Second Language Acquisition SLA researchers often get confronted with a controversial issue Are children better second language learners than adults Do they always outperform older learners After a general introduction into the field of SLA this term paper focuses on the relevance of age in second language learning Theories of critical and sensitive periods during the learning process will be examined in order to emphasize that age has an important impact on effective SLA Afterwards specific differences in child and adult SLA will be taken into consideration how do children acquire a second language and how is it different from the acquisition of an older person By answering these questions differentiated it might be possible to come to a conclusion whether children or adults are better second language learners
