Secondary Education in the Nineteenth Century R. L. Archer, 2015-06-26 Excerpt from Secondary Education in the Nineteenth Century The period of which we commonly think when we hear or speak of the nineteenth century began in 1789 and ended in 1918 The landmarks of educational history coincide very conveniently with those of wider history The year 1918 might well be chosen as our terminus by reason of the passing of Mr Fisher's bill even if it had not been the year of the Armistice Even if the years from 1789 to 1815 had not witnessed the Napoleonic wars they might have been chosen as our starting place because they saw the foundation of the monitorial schools and the reawakening of our ancient universities These two disconnected sources of educational energy for a long time distributed power over distinct areas it was not till the middle of the century that even a ladder was suggested as a means of ascent from the region served by the one to that served by the other it was not till the Act of 1902 that elementary and higher education were treated as parts of a single whole and it was not till the Act of 1918 that universal education from fourteen to eighteen the years which the children of the wealthy had throughout the nineteenth century spent at a public school was brought into sight Here then the work of the preceding century has reached a definite landmark The history of twentieth century education will not naturally fall into two divisions That of the nineteenth century does In the one story the universities are the centre from which activity radiated About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works      **Secondary Education in the Nineteenth Century** R. Archer,1931      *Inventing Secondary Education* Robert Douglas Gidney,Winnifred Phoebe Joyce Millar,1990 The received view is that secondary education in Ontario is a result of Egerton Ryerson s Education Act of 1871 But R D Gidney and W P J Millar show that Ryerson and the Provincial Education Office responded to rather than directed policy in higher education In fact the system in place today is evidence of Ryerson s failure to implement the programs he wanted      **Education in the Nineteenth Century** Robert Davies Roberts,1901      *Girls' Secondary Education in the Western World* J. **Secondary Education in England 1870-1902** Prof John Roach,John Roach,2012-10-12 In this comprehensive and extensively researched history John Roach argues for a reassessment of the relative importance of State regulation and private provision Although the public schools enjoyed their greatest prestige during this period in terms of educational reform and progress their importance has been exaggerated The role of the public school he suggests was social rather than academic and as such their power and influence is to be interpreted principally in relation to the growth of new social elites the concept of public service and the needs of the empire for a bureaucratic ruling class Only in the modern progressive movement launched by Cecil Reddie and the private provision for young women was lasting progress made Even before the 1902 Education Act however the State had spent much time and effort regulating and reforming the old educational endowments and it is in these initiatives that the foundations for the public provision of secondary educational reform are to be found      *The Renaissance of Women Translators in 19th-Century Greece* Vasiliki Misiou,2023-03-31 This volume offers an in depth exploration of the translation activity of Greek women translators in the nineteenth century illuminating the role of translation as a means of resistance against sociocultural norms and the enduring impact of their work on the rise of

feminism in Greece Drawing on frameworks from the sociology of translation the book situates the practices and behaviours of women translators within this specific sociocultural and historical context to underscore the importance of translation in their lives and society Drawing on authentic texts including dedication letters and prologues Misiou unpacks the discourses themes strategies and dialogues individual translators employed to affirm a sense of agency in their claims to education and civil rights their role in cultural life as producers of texts and to give greater voice to the wider community of women translators The volume showcases women translators as agents and mediators of cultural and social change and active contributors to the theory and practice of translation expanding theoretical discourse on gender and translation and offering directions for future research This book will be of particular interest to scholars in translation studies particularly those with an interest in translation and gender feminist translation studies and translation history
