## **Secret Life Of The Hedgehog:**

**Secret Life of the Hedgehog**, 1979      **Beastly Britain** Karen R. Jones, 2025-05-13 The remarkable history of Britain and its animals told through ten iconic species Have you ever wondered why we count sheep to get to sleep Or where the phrase red herring comes from Across British history animals have been written about in poetry painted in oils and even recorded in law Loved or feared familiar or endangered animals are everywhere to be seen In this enchanting beautifully illustrated study Karen R Jones takes a journey through the history of ten animals to show the extraordinary story of beastly Britain Jones looks at animals including foxes and hedgehogs newts and beetles ghostly hounds and even the Loch Ness Monster She reveals the place of animals in British cultural identity and sheds new light on the most iconic moments of British history from the Black Death to World War II The story of these isles may be told by human voices but it is fully brought to life by listening to the squawks bellows and howls that make Britain what it is      *Against Life* Alastair Hunt, Stephanie Youngblood, 2016-03-15 The contributors to *Against Life* think critically about the turn to life in recent theory and culture Editors Alastair Hunt and Stephanie Youngblood shape their collection to provocatively challenge the assumption rife throughout the humanities that life needs to be cultivated affirmed and redeemed The editors and their contributors explore how we might be better off daring to think ethics and politics as well as the project of the humanities in more radical terms as a refusal to choose life What forms of equality and freedom might emerge if we did not organize being together under signs of life Taken together the essays in *Against Life* mark an important turn in the ethico political work of the humanities      Modularity in Development and Evolution Gerhard Schlosser, Gu nter P. Wagner, 2004-07 *Modularity in Development and Evolution* offers the first sustained exploration of modules from developmental and evolutionary perspectives Contributors discuss what modularity is how it can be identified and modeled how it originated and evolved and its biological significance Covering modules at levels ranging from genes to colonies the book focuses on their roles not just in structures but also in processes such as gene regulation Among many exciting findings the contributors demonstrate how modules can highlight key constraints on evolutionary processes A timely synthesis of a crucial topic *Modularity in Development and Evolution* shows the invaluable insights modules can give into both developmental complexities and their evolutionary origins      The Countryman John William Robertson Scott, 1980      **Hedgehogs, Killing, and Kindness** Laura McLauchlan, 2024-05-14 How our understanding of and relationship to hedgehogs reveals the complex interactions between culture technology bodies conservation and care for other animals Across the globe the bumbling hedgehog has been framed in a variety of ways throughout history as a symbol of both good and bad luck of transformation of vengeance and of wit and reincarnation In recent years it has also in different parts of the world been viewed as a pest for its predation on ground nesting birds and has thus become a target for culling In *Hedgehogs Killing and Kindness* Laura McLauchlan explores how human actors have interacted with hedgehogs and other species through time and attends to the questions these interactions

raise when it comes to ending and preserving life in the name of species conservation and wildlife rehabilitation Grounded in rich empirical material and careful critique Hedgehogs Killing and Kindness traces the author's own more than human transformative experience and elucidates how care is shaped by and shapes various cultural and material forces McLauchlan urges us to rethink and reflect on how cares are normalized and at what and whose expense what it might mean to care in more responsive ways and finally whether it is possible to kill with kindness in this rapidly changing and conflicting world A valuable addition to the understanding and practices of multispecies ethnography environmental anthropology and the broader environmental humanities this book sheds a necessary light on the fraught space between caring for and killing to care for other than human animals on our one precious planet
