*The Secret in Medieval Literature* Albrecht Classen, 2022-10-17 The Secret in Medieval Literature Alternative Worlds in the Middle Ages explores the many strange phenomena both in the Middle Ages and today that do not find any good rational explanations Those do not pertain to magic or to religion in the traditional sense of the word they are secrets of an epistemological kind and tend to defy human rationality without being marginal or irrelevant At first sight we might believe that we face elements from fairy tales but the medieval cases discussed here go far beyond such a simplistic approach to the mysterious dimension of secrets In fact as this book argues medieval poets commonly engaged with alternative forces and described their workings within the human context both in the Latin West and in the East without being able to come to terms with them critically Those mysteries appear both in heroic epics and courtly romances among other genres and they figure more frequently than we might have assumed On the one hand we could conceive of those secrets as the product of literary liberties and imagination on the other those secrets prove to be rather serious agents intervening in the lives of the fictional protagonists By the same token our modern world is not all rationality and material conditions either The study of secrets in the Middle Ages thus opens the pathway toward a new epistemology both for the people in the pre modern age and us today

The Mysteries of Christianity Matthias Joseph Scheeben, 2023-03-17 The Mysteries of Christianity is Matthias Joseph Scheeben's youthful magnum opus a logically rigorous and spiritually profound dogmatic theology In its pages he explores the intelligibility of Christianity's supernatural mysteries and their deep connectedness ultimately demonstrating that Christian theology constitutes a science before the court of human reason even as its object transcends human comprehension Scheeben's task is to present a unified view of the whole panorama of revealed truth and he pursues this by considering nine key Christian mysteries the Trinity creation sin the Incarnation the Eucharist the Church and its sacraments justification eschatological glory and predestination Since the mystery of the Trinity is the root of the supernatural order Scheeben begins here showing that the foundation of the salvific economy lies in the eternal processions of persons in God the begetting of the Son and the spiration of the Spirit being in different ways the cause of the life of grace in the human soul When the Son and the Spirit are sent into the world in the Incarnation and through the bestowal of grace they provide the way for human beings to see God face to face in the beatific vision the end for which God created humans Among the means of return to God Scheeben particularly emphasizes the Eucharist on account of its close connection with the mystery of the Incarnation By placing his treatment of the Eucharist before that of the Church he signals that his is a genuinely Eucharistic ecclesiology centered on the abiding presence of the incarnate divine Son
