Staging Women and the Soul-Body Dynamic in Early Modern England Sarah E. Johnson, 2016-04-01 Though the gender coded soul body dynamic lies at the root of many negative and disempowering depictions of women Sarah Johnson here argues that it also functions as an effective tool for redefining gender expectations Building on past criticism that has concentrated on the debilitating cultural association of women with the body she investigates dramatic uses of the soul body dynamic that challenge the patriarchal subordination of women Focusing on two tragedies two comedies and a small selection of masques from approximately 1592-1614 Johnson develops a case for the importance of drama to scholarly considerations of the soul body dynamic which habitually turn to devotional works sermons and philosophical and religious treatises to elucidate this relationship Johnson structures her discussion around four theatrical relationships each of which is a gendered relationship analogous to the central soul body dynamic puppeteer and puppet tamer and tamed ghost and haunted and observer and spectacle Through its thorough and nuanced readings this study redefines one of the period's most pervasive analogies for conceptualizing women and their relations to men as more complex and shifting than criticism has previously assumed It also opens a new interpretive framework for reading representations of women adding to the ongoing feminist re-evaluation of the kinds of power women might actually wield despite the patriarchal strictures of their culture

The Divine Ideas Tradition in Christian Mystical Theology Mark A. McIntosh, 2021 This study brings to life the striking role of the divine ideas tradition in the teaching of its central exponents and suggests how the divine ideas might

constructively inform Christian theology and spirituality today **Becoming Human** J. Allan Mitchell, 2014-05-01 *Becoming Human* argues that human identity was articulated and extended across a wide range of textual visual and artifactual assemblages from the twelfth to the fifteenth centuries J Allan Mitchell shows how the formation of the child expresses a manifold and mutable style of being To be human is to learn to dwell among a welter of things A searching and provocative historical inquiry into human becoming the book presents a set of idiosyncratic essays on embryology and infancy play and games and manners meals and other messes While it makes significant contributions to medieval scholarship on the body family and material culture *Becoming Human* theorizes anew what might be called a medieval ecological imaginary Mitchell examines a broad array of phenomenal objects including medical diagrams toy knights tableware conduct texts dream visions and scientific instruments and in the process reanimates distinctly medieval ontologies In addressing the emergence of the human in the later Middle Ages Mitchell identifies areas where humanity remains at risk In illuminating the past he shines fresh light on our present **Gothicka** Victoria Nelson, 2012-04-23 *The Gothic* has taken a revolutionary turn in this century Today s Gothic has fashioned its monsters and devils into heroes and angels and is actively reviving supernaturalism in popular culture Nelson argues that this mainstreaming of a spiritually driven supernaturalism is a harbinger of what a post Christian religion in America might look like **Victorian Literature and Finance** Francis O'Gorman, 2007-03-22 Victorian Britain offered to the globe an economic structure of unique complexity The trading nation at the heart of a great empire developed the practices of advanced capitalism currency banking investment money markets business practices and theory intellectual property legislation from which the financial systems of the contemporary world emerged Cultural forms in Victorian Britain transacted with high capitalism in a variety of ways but literary critics interested in economics have traditionally been preoccupied either with writers hostility to industrial capitalism in terms of its shaping of class or with the development of consumerism *Victorian Literature and Finance* is the first extended study to take seriously the relationships between literary forms and those more complex discourses of Victorian high finance These essays move beyond the examination of literature that was merely impatient with the perceived consequences of capitalism to analyse creative relationships between culture and economic structures Considering such topics as the nature of currency women and the culture of investment the profits of a modern media age the dramatization of risk on the Victorian stage the practice of realism in relation to business theory the culture of speculation at the end of the century and arguments about the uncomfortable relationship between literary and financial capital *Victorian Literature and Finance* sets new terms for understanding and theorizing the relationship between high finance and literary writing in the nineteenth century **Mask Makers and Their Craft** Deborah Bell, 2014-01-10 *Profiling 30 mask makers* from around the world this book explores the motivations and challenges of contemporary artists working to bring the traditional methods and conventions of mask making to an evolving global theatre There are 181 photographs including two sections of color plates which illustrate how the

mythic iconography of masks is used in the modern fields of dance mime theatre and storytelling Topics include the ways in which mask artists and performers maintain a sense of universality despite varying local customs the legacies of Italian mask makers Amleto and Donato Sartori and of the California based Dell Arte International School of Physical Theatre and the ways in which traditional approaches in mask artistry continue to influence commercial mask performance ventures in film on Broadway and in touring companies Victorian Automata Suzy Anger, Thomas Vranken, 2024-03-28 The relationship between lifelike machines and mechanistic human behaviour provoked both fascination and anxiety in Victorian culture This collection is the first to examine the widespread cultural interest in automata both human and mechanical in the nineteenth century It was in the Victorian period that industrialization first met information technology and that theories of physical and mental human automatism became essential to both scientific and popular understandings of thought and action Bringing together essays by a multidisciplinary group of leading scholars this volume explores what it means to be human in a scientific and industrial age It also considers how Victorian inquiry and practices continue to shape current thought on race creativity mind and agency This title is part of the Flip it Open programme and may also be available Open Access Check our website Cambridge Core for details *Staging the Absolute* Thomas Seifrid, 2023-10-02 Staging the Absolute argues that an array of practices and beliefs came together to define an essential aspect of Russian and Soviet culture in the twentieth century the persistent desire to interrupt or disrupt history Drawing on sources that define the nature of public rituals the book reveals the pervasive presence of the impulse to impede history in Russia's modern era and the realization of the idea in the form of the Stalinist show trials of the 1930s Thomas Seifrid analyses Soviet festivals public displays of agitational propaganda and urban planning together with such modernist precursors as fin de siècle and early twentieth century projects for reviving the theatre modernist adaptations of puppet theatre the Faust legend and its vogue in early twentieth century Russia and the nineteenth century panorama The book reveals that what binds these otherwise disparate phenomena together is a shared impatience with history and a corresponding desire to appropriate urban space Illuminating the deeper meanings in these revived archaic forms Staging the Absolute shows how pervasive the interest in disrupting history was in the Russian modern era *A New Vocabulary for Global Modernism* Eric Hayot, Rebecca L. Walkowitz, 2016-11-29 Bringing together leading critics and literary scholars A New Vocabulary for Global Modernism argues for new ways of understanding the nature and development of twentieth century literature and culture Scholars have largely understood modernism as an American and European phenomenon Those parameters have expanded in recent decades but the incorporation of multiple origins and influences has often been tied to older conceptual frameworks that make it difficult to think of modernism globally Providing alternative approaches A New Vocabulary for Global Modernism introduces pathways through global archives and new frameworks that offer a richer more representative set of concepts for the analysis of literary and cultural works In separate essays each inspired by a critical term this collection explores what happens to the foundational concepts

of modernism and the methods we bring to modernist studies when we approach the field as a global phenomenon Their work transforms the intellectual paradigms we have long associated with modernism such as tradition antiquity style and translation New paradigms such as context slum copy pantomime and puppets emerge as the archive extends beyond its European center In bringing together and reexamining the familiar as well as the emergent the contributors to this volume offer an invaluable and original approach to studying the intersection of world literature and modernist studies

The Living Image in the Middle Ages and Beyond Kamil Kopania, Henning Laugerud, Zuzanna Sarnecka, 2025-02-25 This edited volume discusses images that bleed speak cry move and behave in ways we usually attribute to living creatures Living images have been the object of devotion as well as targets of destruction and they have been marginalised in both culture and cultural studies for their ambivalence as well as their transgressive nature But what is it that makes images the loci of such powerful properties The present volume is an attempt to recuperate the living image draw it from the margins and reilluminate its importance for cultural history The title of this book reflects the ambition of the contributions to navigate between the Middle Ages of the past and the Middle Ages of the present Our aim is to provide new theoretical reflections and methodologies concerning the study of material agency and living images both historically and today The chapters include close examination of surviving objects and archival research as well as theoretical reflections and span chronologically and geographically across Europe from North to South medieval to modern The book will be of interest to scholars working in art history medieval studies material culture theatre studies and religious history

Twentieth-Century Russian Poetry Katharine Hodgson, Joanne Shelton, Alexandra Smith, 2017-04-21 The canon of Russian poetry has been reshaped since the fall of the Soviet Union A multi authored study of changing cultural memory and identity this revisionary work charts Russia's shifting relationship to its own literature in the face of social upheaval Literary canon and national identity are inextricably tied together the composition of a canon being the attempt to single out those literary works that best express a nation's culture This process is of course fluid and subject to significant shifts particularly at times of epochal change This volume explores changes in the canon of twentieth century Russian poetry from the 1991 collapse of the Soviet Union to the end of Putin's second term as Russian President in 2008 In the wake of major institutional changes such as the abolition of state censorship and the introduction of a market economy the way was open for wholesale reinterpretation of twentieth century poets such as Iosif Brodskii Anna Akhmatova and Osip Mandelstam their works and their lives In the last twenty years many critics have discussed the possibility of various coexisting canons rooted in official and non official literature and suggested replacing the term Soviet literature with a new definition Russian literature of the Soviet period Contributions to this volume explore the multiple factors involved in reshaping the canon understood as a body of literary texts given exemplary or representative status as classics Among factors which may influence the composition of the canon are educational institutions competing views of scholars and critics including figures outside Russia and the self canonising

activity of poets themselves Canon revision further reflects contemporary concerns with the destabilising effects of emigration and the internet and the desire to reconnect with pre revolutionary cultural traditions through a narrative of the past which foregrounds continuity Despite persistent nostalgic yearnings in some quarters for a single canon the current situation is defiantly diverse balancing both the Soviet literary tradition and the parallel contemporaneous literary worlds of the emigration and the underground Required reading for students teachers and lovers of Russian literature Twentieth Century Russian Poetry brings our understanding of post Soviet Russia up to date

Medieval Robots E. R. Truitt, 2015-06-11 Medieval robots took such forms as talking statues mechanical animals or silent metal guardians some served to entertain or instruct while others performed surveillance or discipline Medieval Robots explores the forgotten history of real and imagined machines that captivated Europe from the ninth through the fourteenth centuries

Comics and Stuff Henry Jenkins, 2020-04-14 Considers how comics display our everyday stuff junk drawers bookshelves attics as a way into understanding how we represent ourselves now For most of their history comics were widely understood as disposable you read them and discarded them and the pulp paper they were printed on decomposed over time Today comic books have been rebranded as graphic novels clothbound high gloss volumes that can be purchased in bookstores checked out of libraries and displayed proudly on bookshelves They are reviewed by serious critics and studied in university classrooms A medium once considered trash has been transformed into a respectable if not elite genre While the American comics of the past were about hyperbolic battles between good and evil most of today's graphic novels focus on everyday personal experiences Contemporary culture is awash with stuff They give vivid expression to a culture preoccupied with the processes of circulation and appraisal accumulation and possession By design comics encourage the reader to scan the landscape to pay attention to the physical objects that fill our lives and constitute our familiar surroundings Because comics take place in a completely fabricated world everything is there intentionally Comics are stuff comics tell stories about stuff and they display stuff When we use the phrase and stuff in everyday speech we often mean something vague something like etcetera In this book stuff refers not only to physical objects but also to the emotions sentimental attachments and nostalgic longings that we express or hold at bay through our relationships with stuff In *Comics and Stuff* his first solo authored book in over a decade pioneering media scholar Henry Jenkins moves through anthropology material culture literary criticism and art history to resituate comics in the cultural landscape Through over one hundred full color illustrations using close readings of contemporary graphic novels Jenkins explores how comics depict stuff and exposes the central role that stuff plays in how we curate our identities sustain memory and make meaning *Comics and Stuff* presents an innovative new way of thinking about comics and graphic novels that will change how we think about our stuff and ourselves
