Rudolf Steiner speaks of the human being as the model of creation the primary focus of the cosmos In an extensive exposition he talks of the constellation of cosmic forces zodiac and planets amongst which we find ourselves situated Only a true knowledge of our human nature and the spiritual forces which surround us the microcosm within the greater macrocosm can enable humanity to progress he says This book is an important contribution to that goal the development of a contemporary spiritual science of the human being *Slow Light: Invisibility, Teleportation, And Other Mysteries Of Light* Sidney Perkowitz,2011-07-26 Slow Light is a popular treatment of today s astonishing breakthroughs in the science of light Even though we don t understand light s quantum mysteries we can slow it to a stop and speed it up beyond its Einsteinian speed limit 186 000 miles sec use it for quantum telecommunications teleport it manipulate it to create invisibility and perhaps generate hydrogen fusion power with it All this is lucidly presented for non scientists who wonder about teleportation Harry Potter invisibility cloaks and other fantastic outcomes Slow Light shows how the real science and the fantasy inspire each other and projects light s incredible future Emory physicist Sidney Perkowitz discusses how we are harnessing the mysteries of light into technologies like lasers and fiber optics that are transforming our daily lives Science fiction fantasies like Harry Potter s invisibility cloak are turning into real possibilities Please click here for more info a **In the Presence of Mystery** Michael H. existence sensations thoughts surroundings and so on But what is it really That question has stumped philosophers of every religion and culture since the beginning of mankind but Tapan Das Ph D reveals the answer in this groundbreaking book on the nature of consciousness He begins by examining the two scientific views of consciousness monistic and dualistic The monistic view says that the brain does all the functions and as such there is nothing called consciousness The dualistic view says that the brain and consciousness are two separate things Through extensive research and analysis Das has found that the frequency of brain waves depends on the alertness of the mind that is the level of consciousness Therefore consciousness is a function of brain wave frequency Whether you're a cognitive scientist psychologist neuropsychologist neuroscientist philosopher or just someone interested in knowing more about humanity you'll enjoy discovering Solutions to the Mystery of Consciousness
